Printers' Tools and Machinery

John Ryan Foundry

S. E. Corner . . . . . .
Water and Frederick Sts.

BALTIMORE, MD., U.S.A.

September, 1894

SPECIAL NOTICE.

Since November 1st, 1892, the Type Foundries of the John Ryan Co., John G. Mengel & Co., Chas. J. Cary & Co. (Baltimore Type Foundry), and Hooper, Wilson & Co., have been conducted under one management, the name being JOHN RYAN FOUNDRY, Baltimore. All correspondence, checks, etc., should be so directed.

The stock of all the Foundries will be found at the John Ryan Foundry, where sorts, etc., for the various faces formerly cast by the several Foundries may be obtained. This arrangement economizes time and gives to the printer a service much more satisfactory than was formerly possible.

If it is desired to open an account at a foundry where you have no acquaintance, send references or the money. Or, if you wish a cut or small package, send the money; it does not pay to charge it. Confidence is of especial value in rendering business relations pleasant, and nothing else so tends to give confidence as prompt payment.

The weight of a single parcel by mail is limited to four pounds. The rate is one cent per ounce. But it is safer and generally cheaper to forward over two pounds by express, and over fifty pounds by freight. Goods cannot be sent to Canada by mail.

If goods fail to arrive within a reasonable time, notify us and we will send a tracer after them. If freight charges seem too heavy, advise us of the rate and amount paid. On the arrival of goods, check them by the bill, and notify us at once of any shortage or discrepancy.

Remittances should be by New York draft (preferred), check or postal money order.

After goods have been properly dispatched, whether by mail, express or freight, the law decides that they are at the purchaser's risk.

Terms cash, when special time is not agreed upon. Prices subject to change without notice.

THE POINT SYSTEM.

This new labor-saving system of type bodies has for its unit a division of space called a *point*. This unit is exactly the twelfth part of the Pica, and all the other bodies are multiples of and are measured by it. This enables the printer to use the different sizes in combination with each other without any trouble in the matter of justification—a thing almost impossible with the old bodies.

In relation to space measurement, 83 ems of the standard Pica (12-point) body are equal to 35 centimeters of the metrical system of measure. 12 points is equal to .166 of an inch.

The full Point System is as follows:

Name under Point System.	Name under Old System.	Name under Point System.	Name under Old System.
1 Point body	American.	16 Point body	Columbian.
2 " "	Saxon.	18 " "	Great Primer.
3 " "	Excelsior.	20 " "	Paragon.
3½ " "	Brilliant.	22 " "	2-line Small Pica.
4 " "	Semi-Brevier.	24 " "	2-line Pica.
4½ " "	Diamond.	28 " "	2-line English.
5 " "	Pearl.	30 " "	5-line Nonpareil.
5½ " "	Agate.	32 " "	Double Columbian.
6 " "	Nonpareil.	36 " "	2-line Great Primer.
7 " "	Minion.	40 " "	Double Paragon.
8 " "	Brevier.	42 " "	7-line Nonpareil.
9 " "	Bourgeois.	44 " "	Canon.
10 " "	Long Primer.	48 " "	4-line Pica.
11 " "	Small Pica.	54 " "	9-line Nonpareil.
12 " "	Pica.	60 " "	5-line Pica.
14 " "	English.	72 " "	6-line Pica.

Each size is a factor. Three Nonpareils (6) are a Great Primer (18); three Breviers (8) are a Double Pica (24); a Pica (12) and a Semi-Brevier—two 6-to-Pica leads (4) are Columbian (16); a Double English (28) and a Brevier (8) are a Double Great Primer (36), and a Long Primer (10) and a Nonpareil (6) are a Columbian (16). So with all the other sizes making up the combination of two or more sizes of type in a word or line, the simplest thing imaginable in composition.

General Information.

SUGGESTIONS TO PRINTERS.

In ordering sorts to match type you already have, state the number of face as well as size of body; or if you cannot do this, then send a capital letter H and a lower case m, as little used as possible, of the fonts the sorts are to work with; also state number of pounds or ounces you wish of each particular sort.

Job fonts, such as Title, Antique, Clarendon, Ornamented, etc. (except some Scripts that ordinary spaces and quads will not work with), are put up without spaces and quads, and if you want them it will be necessary to mention it when ordering.

HINTS ON THE PURCHASE OF TYPE.

Select faces and bodies carefully. Buy according to your ability and need, but only what you can use to profit. Consider where you can use a face before you purchase it. Don't buy it because it is a pretty style; it may be pretty and yet unsuitable for your general work.

Buy as large fonts as you can afford. One font of 500 pounds of Long Primer is more useful and more durable than two fonts Long Primer and Bourgeois of 250 pounds each. Small fonts are unequally and unduly worn. The two small fonts will cost more, earn less and wear out sooner than one large font.

Select uniform faces as far as possible. The plain symmetry of uniform faces is always pleasing. For a large office it is most desirable to select complete series of a number of useful faces. It saves the compositor's time and the uniformity of the work pleases the eye. In such case let these series be very perceptibly unlike; but in all cases maintain the uniformity of each series. Do not allow your customers to choose for you. To buy faces without system, to please a passing fancy, is sure to cause trouble.

Order sorts suitable for your own peculiar class of work. The assortment sold by the Founder is for general work only. The special work, which may require a profusion of figures, capitals, points, etc., must have these special sorts added to the font.

Have plenty of leads. The free use of leads is not only profitable in measurement, but is economical in extending the capacity of the font.

PROPORTIONS OF TYPE.

Regular 100-lb. fonts of Body Type are proportioned as follows:

	lbs.	oz.
Lower case	57	.00
Points	3	.00
References	1	.02
Commercial marks		.06
Figures	3	.08
Fractions		.10
Capitals	10	.00
Small Caps	3	.00
Dashes	1	.02
Braces		.08
Spaces	8	.00
Quads	12	.00
	100 pounds	

Italic, 9 lbs. to 100.

SCHEME FOR ORDERING SORTS.

Weight of Letters to the Box—

a c d h i m n o r s t u, each	2 pounds.
b f g l p v w y, each	15 ounces.
j k q x z and figures, each	6 "
e	3 pounds.
The capitals, each	5 ounces.

Number of Letters to the Pound—

a b d g h k n o p q u v x y z	582 each.
c e r s t	682 "
m	398 "
f i j l	850 "
Period and comma	1400 "
Caps average	400 "
Small Caps average	460 "

The above figures are estimated for Brevier, and the proportion of letters of other sizes to the pound may easily be obtained by comparison.

A pair of ordinary cases holds 50 lbs. of type.

STANDARD SIZES OF NEWSPAPERS.

The following are the regular sizes of newspapers in most general use. We would advise parties planning new newspapers to adopt one of these standard sizes. Width of column, 13 Pica ems. Nonpareil column rules are used for 4, 5, 6 and 7-column papers; brevier column rules for 8 and 9-columns. The length of column given here is face measurement.

Name of Sheet.	Size of Paper.	Size of Form.	Head Rule.	Column Rule.
5-column Folio..	20×26	17¾×23¾	11⅛	17¾
6-column " ..	22×31	19¾×28¼	13⅜	19¾
7-column " ..	24×35	21¾×33	15⅝	21¾
8-column " ..	26×40	23¾×37⅜	17⅞	23¾
9-column " ..	28×44	25¾×42⅜	20¼	25¾
4-col. Quarto....	22×31	18¾×29	8⅞	13¾
5-col. "	26×40	23¼×37	11⅛	17¾
6-col. "	30×44	27¾×41	13⅜	19¾
7-col. "	35×48	32½×45	15⅝	21¾

RULE TO CALCULATE THE SPEED OF PULLEYS.

EXAMPLE 1.—To find the size of driving: Multiply the diameter of the driven by the number of revolutions it should make, and divide the product by the revolutions of the driver. The quotient will be the size of the driver.

EXAMPLE 2.—The diameter and revolutions of the driver being given, to find the diameter of the driven that shall make a given number of revolutions: Multiply the diameter of the driver by its number of revolutions, and divide the product by number of revolutions of the driver. The quotient will be the size of the driven.

EXAMPLE 3.—To find number of revolutions of the driven pulley: Multiply the diameter of the driver by its number of revolutions, and divide by diameter of driver. The quotient will be the number of revolutions of the driven.

SIZES OF NEWSPAPER CHASES.

7 column folio chases are made up thus:

inches.

15⅝ width of head rule.
⅝ width of side stick.
⅞ room for Patent Quoin No. 2.

17⅛ width of each chase inside.
⅞ width of iron in back of each chase.
1⅛ " " " front " "

19⅛ width of each chase outside.

Length of each chase.

inches.

21¾ length of column rule.
¼ Great Primer foot slug.
⅝ foot stick.
⅞ Patent Quoin No. 2.

23½ length of inside of each chase.
1⅛ iron at top.
1⅛ " bottom.

25¾ length outside each chase.

Size over all the pair: 25¾×38¾ inches.

If column rules are thicker than Nonpareil, the additional width must be made in the chases. If No. 1 Quoin is used ¼ inch less room is required in both width and length, which makes the pair over all 26×38¾ inches.

8 column chases. Nonpareil column rule.

inches.

17⅞ width of head rule.
⅝ width of side stick.
⅞ width of Patent Quoin No. 2.

19⅜ width inside each chase.
⅞ width of iron in back of chase.
1⅛ " " " front "

21⅜ width of each chase outside.

Length of chase.

inches.

23¾ length of column rule.
⅝ foot stick.
⅞ Patent Quoin No. 2.

25⅛ inside each chase.
1⅛ iron at top of chase.
1⅛ iron at bottom of chase.

27½ length of each chase outside.

Size over all—27½×42¾ inches.

INSTRUCTIONS FOR ORDERING WOOD TYPE.

In ordering wood type, write plainly the full title of letter, stating the size of font (whether it is 3 A, 4 A, or 5 A,) and whether it is caps, caps and figures, or caps, lower case and figures, that is wanted. It will prevent the possibility of mistakes if the total number of characters and the list price of the font is stated.

Figures are put up in fonts of 26, 37, 48 and 52, for 2, 4, 5 and 6-A fonts, but 26 figures only will be sent unless otherwise ordered.

In ordering sorts, send, if possible, one of each of the letters wanted. This will insure exact copies.

Wood type should always be kept in a cool, dry place. To clean the surface, use a soft, oiled rag—it is ruinous to use lye or water. Our wood type has a smooth and highly polished face, and if properly cleaned and stored will last for years. The best way to store wood type is to put it away in a dust-tight cabinet, of which a variety of styles are made. If it is not so stored, all large wood type should be set up on the edge, lengthwise, when put away, so both sides may be equally exposed to the air, to prevent warping.

SCALE OF WOOD TYPE FONTS.

HOW TO ESTIMATE BODY TYPE.

To estimate the quantity of solid type required for newspaper or book work, find the number of square inches to be set, and divide the same by 4, which will give the approximate weight of matter in pounds; to which add 25 per cent. for sorts, or dead letters remaining in the case.

One square inch of type weighs 4 ounces, heavy.

ESTIMATE FOR MEDIUM-SIZE JOB OFFICE.

Quarter Medium Job Press	$250 00
22½-inch Paper Cutter	80 00
Imposing Stone and Frame (24×36)	24 00

BRIGHT MAIDENS

Senorita Wranglers in Gay Gotham's Modern Society.

HER SUPER-EDUCATED WOMEN.

Their Industrial, Commercial and Social Advantages.

SMART GIRLS POOR HELPMATES.

Higher Education of Girls Declared to be "A Waste of Raw Material"—The Coming Woman is Making a Home for Herself and Babies—The Progressive Bachelor Girl Should Have Man on Hand to Love and Pay the Bills.

Somebody wants to know what effect "senorita wranglers" with their 400 arithmetic marks will have on the fashionable and industrial society.

It isn't likely that the beaten college fellows will marry them, for the world knows that smart women are not in matrimonial demand. Men fear the erudite maidens. They are too critical to be comfortable and too intellectual to enjoy the common food of an every-day life. To be forever

THE ELEPHANT

He Talks Freely to Crowds of Admiring Auditors.

HIS INTERIOR IS DISTURBED.

The Tom Reed of Coney Island, New York, and His Troubles.

LOVERS IN HIS DIAPHRAGM.

Boys Chasing Each Other on One's Spinal Column is Fun for the Boys, but no Fun for Elephants—Spectacles Furnished for Bathers on the Beach—Men Who Prefer Tigers to Elephants.

I am only an Elephant! And I am not well. That's why I growl.

I have elephantiasis, which, in my case, means acute enlargement of the elephant. Nobody has ever seen a bigger elephant than I am.

Certain disappointed parties at first thought the World's Fair would prove to be to Chicago the biggest elephant in this country, but latterly they have modified their opinions.

I have stood on this beach for lo! these many years with trunk packed

CHARGED WITH BIGAMY

Tyson, Released from Prison, Has His Wife Arrested.

SHE SAYS IT IS ONLY SPITE WORK

He Had Asked Her to Help Him and She Firmly Refused.

Silas S. Tyson, who was recently released from State Prison, having served one year on a charge of robbery, has entered a complaint of bigamy against his wife before Justice Hudson at Paterson. She denies the charge and says it is made through spite.

Mrs. Tyson is twenty-four years of age and has been married three times. She says her maiden name was Valentine, and her first marriage was with a man named Sweeney. She was then fourteen years of age. She was

THE EUTAW HOUSE CLOSED.

Pending a Change in the Management, Extensive Improvements Will be Made.

As the clocks were striking the hour of 12 last night the lights in the Eutaw House were extinguished, doors were closed and barred and Col. Charles Wood's regime as manager came to an end. During the evening and at night many of the habitues of the house, not only guests, but also those who for years had found the commodious office a comfortable place to lounge in, called at the hotel to pay

THE LAST VICTIMS

Of the Fort Carroll Excursion Disaster Found.

NINE LAID TO REST

Grief at the Homes of the Deceased—The Official Investigation This Morning—Captain Boone Did Not Run Away—Mother and Her Child in One Grave.

THE U. S. INVESTIGATION BEGUN

The last two bodies of victims of the Fort Carroll disaster were found yesterday morning and brought to the city on the tugboat Robert H. Cook. They are those of Maggie Eller, 13 years old, of 43 N street, northwest, Washington, D. C., and Willie Haas, of 2118 Calverton road. Both bodies were very much disfigured.

It was some time before ten o'clock when the bodies were pulled up by grapples near the scene of the accident. The bodies lay close together.

FINANCIAL AND COMMERCIAL.

FINANCIAL.

There was a marked change in the Wall street stock market to-day, and bulls had their innings after the long depression. No gold was engaged for shipment and stocks were strong from the very opening, the advance being practically unchecked from start to finish. The market was more active in the afternoon than in the morning, and the bears, as predicted on Monday, "did some tall climbing" to recover their stocks. Every stock on the list made a good advance and the closing was at top prices. London prices came very irregular this morning, in sympathy with our market of yesterday, but, on the whole, they showed a decidedly improved state of affairs, and a great many more stocks had gains than losses. The principal stocks to show advances were Northern Pacific preferred, Louisville and Nashville, Norfolk and Western, Wabash preferred, Erie, and Atchison preferred, while Lake Shore showed a decline.

The Bank of England having raised the price for American gold another half-penny yesterday, it was thought likely that gold shipments will be made for some time yet, and the strength of the market at the opening and the good foreign buying proved quite a surprise to the street. Sterling exchange is getting quite weak again, and a high banking authority says that the importers have now pretty well paid up their indebtedness, and that he anticipates a collapse in the exchange market in the next week or ten days. It is probably on account of the softening in the rate of exchange that the Bank of England has raised its premium for American gold.

Cable dispatches to private firms to-day say that the financial strain abroad shows signs of easing up, and may shortly be entirely relieved, and the buying for foreign account this morning looked as though the report had a basis in fact. London has been a buyer of our stocks for two days now, and it is estimated that their purchases amounted to about one hundred

AGATE No. 5.

(Five and a-half Point.)

It is evident that the peaceful spirit of this free country is not infused into every foreigner who takes out his naturalization papers.

Aristides was shelled out of the city of Athens because it bored the citizens to hear him so continually called just.

Although America had been discovered years before Shakespeare's time, the great author has not alluded to the New World anywhere in his plays.

The only license in the State that remains at the old rate is the marriage license, though the attachments are dear.

The pharmacists of Paris have expressed the opinion that plants in rooms are not detrimental to health, as generally supposed, but on the contrary are beneficial, especially to consumptives.

It is known to some of your members that I feel a warm interest in what concerns the welfare of all who work for wages, and in the wise management of the trades unions and other kindred organizations it has become advisable for them to establish for the promotion of their true interests. This feeling being especially strong towards the Printers' Union, with whose members I have had close and very satisfactory business relations for many years, it is my earnest desire, in which I am heartily joined by my friend, Mr. A. J. Drexel, to extend to the time-honored International Typographical Union, as the representative of the united craft in North America, some expression more substantial than words. How to do this in a way that may produce lasting good has engaged the thoughts of both Mr. Drexel and myself, and we conclude that your Union, or such trustees as you may select for the purpose, will know better than ourselves how that good can be best accomplished.

We therefore send you herewith, by the hand of Mr.

THE United States has produced many remarkable men, and from our short experience as a nation there is every reason to believe that, come what complications there may, we can reasonably expect to produce men to steer us safely through them. When men rise above self, there is everything to expect. Baltimore is but a spot of our country, and in no way exceptional: it contains many monuments to prove that selfishness does not consume the soul: that men, wrapped up in the affairs of life, are not unmindful of the welfare of the general public.

Johns Hopkins founded in Baltimore a university and hospital, both of which promise to surpass anything of the kind accomplished by the liberality of an individual. Six million dollars and valuable lands were given by him for the purpose. He was born a short distance from Baltimore in 1795 and died in 1873. He devoted his life to business activity, and many enterprises were carried to successful consummation by his aid.

NONPAREIL OLD STYLE No. 1.

(Six Point.)

THE third and most masterly stroke of this great lawgiver, by which he struck a yet more effectual blow against luxury and the desire of riches, was the ordinance he made that they should all eat in common, of the same bread and same meat, and of kinds that were specified, and should not spend their lives at home, lying on costly couches at splendid tables, delivering themselves up into the hands of their tradesmen and cooks, to fatten them in corners like greedy brutes, and to ruin not their minds only, but their very bodies, which, enfeebled by indulgence and excess, would stand in need of long sleep, warm bathing, freedom from work, and, in a word, of as much care and attention as if they were continually sick. It was certainly an extraordinary thing to have brought about such a result, but a greater yet to have taken away from wealth, as the philosopher Theophrastus observes, not merely the property of being coveted, but its very nature of being wealth. For the rich, being obliged to go to the same table with the poor, could not make use of or enjoy their abundance, nor so much as please their vanity by looking at or showing it. So that the proverb that Plutus, the god of riches, is blind, was nowhere in all the world literally verified but in Sparta. It was there, indeed, that he was not only blind, but like a picture, without either life or motion Nor were they allowed to take food at home first, and then attend the public tables, for every one had an eye on those who did not eat and drink like the rest, and reproached them with being dainty and effeminate. This last ordinance in particular exasperated the wealthier men. They collected in a body against Lycurgus, and from ill words came to throwing stones, so that at length he was forced to run out of the market-place and make to the sanctuary, to save his life; by good-hap he outran all, except one Alcander, a young man otherwise not ill-accomplished, but hasty and violent, who came up so close to him that, when he turned to see who was near him, he struck him upon his face with a stick, and put out one of his eyes. Lycurgus, so far from being daunted and discouraged, stopped short and showed his disfigured face and eye beat out to his countrymen; they, dismayed and ashamed at the sight, delivered Alcander into his hands to be punished, and escorted him home, with expressions of great concern for his ill-usage Lycurgus, having thanked them for the care of his person, dismissed them all, excepting only Alcander; and, taking him with him into his house, neither did nor said anything severely to him, but, dismissing those whose place it was bade Alcander to wait upon him at table. The young man, who was of an ingenuous temper, did as he was ordered without murmuring; and, being thus admitted to live with Lycurgus, he had ample opportunities to observe in him, besides his gentleness and calmness of temper, an extraordinary sobriety and an indefatigable industry; and so, from an enemy, became one of his most zealous admirers, and told his friends and relations that Lycurgus was not that morose and ill-natured man they had formerly taken him for, but the one mild and gentle character of the world. And thus did Lycurgus, for the chastisement of his fault, make of a wild and passionate young man one of the discreetest citizens of Sparta. In memory of this accident, Lycurgus built a temple to Minerva, surnamed

George Peabody gave the Peabody Institute to Baltimore, with an endowment of one million five hundred thousand dollars. Its library mainly contains books of rare value. Its conservatory of music has greatly developed the musical education and taste of the people, and its lecture course provides rich food for the mind. It is an invaluable institution to a great city. Mr. Peabody was born in Massachusetts in 1795 and died in 1869. He left $5,000,000 to his family, after giving $2,500,000 to build lodgings for the poor in London, $2,100,000 for education in the Southern States, and considerably more to various useful institutions in different parts of the country.

Enoch Pratt gave Baltimore the Pratt Free Library and one million dollars to endow it. It has four branches in different parts of the city, each of which has a comfortable reading-room, where the periodicals of the day, reference books, &c., are kept, and books of all kinds are supplied from the Library proper. Mr. Pratt was born in Massachusetts in 1806 and has lived nearly sixty years in Baltimore. He is identified with many of the large enterprises of the city and has done much to advance its general prosperity. He is president of one of the largest banks and is an active business man, giving promise of many years of usefulness yet to come.

John McDonogh was an active business man; he gave Baltimore the McDonogh Institute, an institution where worthy boys are taken at an early age and kept until they become capable of maintaining themselves. They receive a thorough education, and good situations have been found by its officers for every young man it has trained. Mr. McDonogh was born in Baltimore and died in 1850. The institution bearing his name was endowed with $800,000, and has been conducted exactly as its founder desired.

Moses Sheppard left his fortune to provide an asylum for the curable insane. The buildings have been many years in process of erection, and while many are completed and nearly one mil-

For the rich being obliged to go to the same table with the poor, could not make use of or enjoy their abundance, nor so much as please their vanity by looking at or showing it. So that the proverb that Plutus, the god of riches, is blind, was nowhere so literally verified as in Sparta. Nor were they allowed to take food at home first, and then attend the public tables, for every one had an eye on those who did not eat and drink like the rest, and reproached them with being dainty and effeminate. This ordinance in particular exasperated the wealthier men. They collected in a body against Lycurgus, and from ill words came to throwing stones, so that at length he was forced to run out of the market-place and make to the sanctuary, to save his life; by good

LONG PRIMER OLD STYLE No. 2.

(Ten Point.)

THE third and most masterly stroke of this great lawgiver, by which he struck a more effectual blow against luxury and the desire of riches, was the ordinance he made that they should all eat in common, of the same bread and same meat, and of kinds that were specified, and should not spend their lives at home, lying on costly couches at fine tables, delivering themselves up into the hands of their tradesmen and cooks, to fatten them in corners, like greedy brutes, and to ruin not their minds only, but their very bodies, which, enfeebled by indulgence and excess, would stand in need of long sleep, warm bathing, freedom from work and, in a word, of as much care and attention as if they were continually sick. It certainly was an extraordinary thing to have brought about this result, but a greater yet to have taken away from wealth, as has been observed by the philosopher Theophrastus, not merely the property of being coveted, but its very nature of being wealth. For the rich, being obliged to go to the same table with the poor, could not make use of or enjoy their abundance, nor so much as please their vanity by looking at or showing it. So that the proverb that Plutus, the god of riches, is blind, was nowhere in all the word literally verified but in Sparta. Nor were they allowed to take food at home first, and then attend

"Turn, gentle hermit of the dale,
And guide my lonely way
To where yon taper turns the vale
With hospitable ray.

"For here forlorn and lost I tread,
With fainting steps and slow,
Where wilds immeasurably spread,
Seem lengthening as I go."

"Forbear, my son," the hermit cries,
"To tempt the dangerous gloom;
For yonder faithless phantom flies
To lure thee to thy doom.

LAMARTINE was born of aristocratic parents at Macon, on the 21st of October, 1791. His father, whose name was DePrat, was major of a regiment of cavalry in the service of Louis XVI, and his mother was companion to the sister of Louis Philippe, her mother being Madame des Rois, under-governess to the family of the Prince of Orleans. The Revolution which first swept away the crown and sceptre of France, reduced the family of DePrat from

stated periods, their child, in order that the father might be solaced in his sad and gloomy cell, by beholding him through the gratings of his window.

Roman lower-case a to z measures 13⅓ ems.

$4.75 — 10 POINT. — 80 a, 40 A, 20 a

MEN OF GENIUS have usually been condemned to compose their best works, which are usually their earliest ones, under the roof of a garret; and very few literary characters have lived, like Pliny and Voltaire, in a villa or chateau of their own. It has not therefore often happened that a man of genius could raise local emotions by his intellectual suggestions. Aricosta, who built a palace in his verse

my court-yards, and garden, and at once survey all the operations of my

"NO flocks, that range the valley free,
To slaughter I condemn;
Taught by that Power that pities me,
I learn to pity them:

"But from the mountain's grassy side
A guiltless feast I bring;
A scrip with herbs and fruits supplied,
And water from the spring."

Soft as the dew from heaven descends,
His gentle accents fell:
The modest stranger lowly bends,
And follows to the cell.

Roman lower-case a to z measures 12⅔ ems.

$6.00 — 12 POINT. — 62 a, 28 A, 16 a

MESSIEURS:—I am indebted to you, and more, perhaps, than you imagine. The honor of Roman citizenship is even less than the great benefit you have conferred on me. For what do you think was this honor in comparison with that of being placed in the ranks with your authors? It is to rank with the consuls and senators of Rome; it is to be made fellow with the Sallusts and Ciceros! What glory it is to rightfully say, I am a member of this grand immortal republic: I have been received in the society of the demi-gods! Practically, we live together at Leyden under the same roof. Thanks to your kind-

Although I have but a small place there, it is as good as any. I do not leave it but to be at my ease, and to please myself in this delightful

THE UNITED STATES HAS PRODUCED MANY REMARKABLE MEN,

AND FROM OUR SHORT EXPERIENCE AS A NATION

There is every reason to believe that, come what complications there may, we can reasonably expect to produce men to steer us safely through them. When men rise above self, there is everything to expect. Baltimore is but a spot of our country, and in no way exceptional; it contains many monuments to prove that selfishness does not consume the soul; that men, wrapped up in the affairs of life, are not unmindful of the welfare of the general public.

Johns Hopkins founded in Baltimore a university and hospital, both of which promise to surpass anything of the kind accomplished by the liberality of an individual. Six million dollars and valuable lands were given by him for the purpose. He was born a short distance from Baltimore in 1795 and died in 1873. He devoted his life to business activity, and many large enterprises were successful by his aid.

COMIQUE

The above Series was designed and gotten up to meet the wants of printers desiring to combine Brass Rule with their work, without the troublesome justification necessary with type as usually cast; and this can be done only by foundries using the new system of bodies. The face of each type is in the center of the body, which is large enough to give the space between the face and the rule without any leads or cardboard; and the End Pieces are cast on the body that the type and rule make, which are always regular sizes. Our Pica being the same standard as all other foundries, it is not necessary to order rules to match same specially, as regular 12- or 6-to-Pica Rule from any foundry justifies exactly.

MORTISED

This is a unique and handy type, that may be used, not only for regular display lines, but more than half of the letters are so slotted or mortised on the sides as to admit of the insertion of types of smaller bodies, thus producing novel and striking effects, which are heightened by the aid of the extension ornaments.
The letters C, E, F, L, Q and T, are made each in two distinct widths.
The fount is complete with points and figures.

Language and Brain Disease

An interesting pamphlet, which brings the proofs of medical science to show that the grammatical method of teaching languages is faulty, and that the method which produces the best results consists in making the thorough training of auditory and motor speech-centres a fundamental object. It is illustrated with charts.

How America came to receive its Name

It was an error imposed upon the world by an educated man named Martin Waldseemuller, who wrote a treatise on geography. In this book he suggested that the new world be called America, in honor of Americus Vespucius, who, Waldseemuller supposed, had discovered the new country.

BLACK No. 3.

No. 1721. 10 Point (Long Primer) 20 A, 52 a. $3.45

Be it remembered, That on this fourth day of July, eighteen hundred and ninety-three, before me, a Notary Public in and for the City of Rome, State of Georgia, personally appeared Solomon Trustworthy, Printer, who affirmed that the Type purchased at the John Ryan Foundry, in Baltimore, has proved to be the best, both on account of its wearing qualities, smoothness of finish and superior metal used in its manufacture.

And the said Solomon Trustworthy hath further affirmed, that in all his dealings with the officers of John Ryan Foundry they have proved themselves alive to the interests of the Fraternity, and are, therefore, deserving of the patronage of all who work at the art of printing.

In testimony whereof, I have set my hand and affixed my seal on the day aforesaid. Lycurgus Scribe, N. P.

APOLLO.

22 A, 46 a. 8 Point (Brevier) $3.00

The third and most masterly stroke of this great lawgiver, by which he struck a more effectual blow against luxury and the desire of riches, was the ordinance he made that they should all eat in common, of the same bread and same meat, and of kinds that were chosen, and should not spend their lives at home, lying on costly couches at splendid tables, delivering themselves up into the hands of their cooks and tradesmen, to fatten them in corners, like greedy brutes, and to ruin not their minds only, but their very bodies, which, enfeebled by indulgence and excess, would stand in need of long sleep, warm bathing, freedom from work, and, in a word, of as much care and attention as if they were continually sick. It certainly was an extraordinary thing to have brought about this result, but a greater yet to have

POINTER.

No. 1815. 16 A. $1.65 10 Point (Long Primer) 36 a. $1.25

THE CAP FONT INCLUDES ORNAMENTS AND THE TWO SILHOUETTE FIGURES.

A FEW POINTERS regarding the selection of Job Letter for an office afford us an opportunity of showing this, our neat and handsome circular Type; also of using to advantage the appropriate little silhouette figures which accompany it. This letter is designed principally for such work as

CIRCULARS PROGRAMMES OPENINGS
INVITATIONS MENUS Etc.,

a class of work that constitutes a large portion of every Printer's business, and where more than ordinary care is taken to produce neat and elegant effects. It is cut sharp and clear, with special regard for its wearing qualities.

Gothics, Antiques and modern circular letters are staples and indispensables, and retain a permanent value; but care should be taken not to spend too much money on distorted, "struck-by-lightning" letters. These are all right in their places, but, possessing the quality of novelty and not beauty, their value is short lived. The popular taste, in the main, is for plain, readable Type.

We would call the especial attention of the Craft to our POINTER FIGURES, as being far in advance of the old-time index hands, and as possessing an unique energy which is exceedingly attractive.

PENCRAFT No. 2.

18 Point (Great Primer) With 36 Point Initial

Typography vs. Lithography

Neatly Printed Circulars and Diplomas

Progressive Craftsmen

The Three-Line Nonpareil Pencraft having proved so useful in a large number of printing-offices, we add an additional size of lower-case, cast on the same body, which can be used with the original capitals and mortised initials. It will be found convenient where space is limited. Many printers, who take pride in issuing neat and tasty work from their establishments, will welcome it as another step up the ladder leading to the ideal of perfection in typography

PEN TEXT.

No. 1629. 6 A, 6 a, 36 a. $4.35. 12 Point (Pica) Extra Lower Case, $2.55

There are rivers whose course is longer, and whose volume of water is greater, but none which unites almost everything that can render an earthly object magnificent and charming in the same degree as the Rhine, in Germany. As it flows down from the distant ridges of the Alps, through fertile and beautiful regions, passing into the open sea, so it comes down from remote antiquity, associated in every age with momentous events in the history of the neighboring nations. An historic river which presents so many recollections of Roman defeats and conquests, of chivalric exploits in the feudal periods; of the wars and negotiations of modern times, of the coronation of emperors, whose bones repose by its side; upon whose borders stand two grandest monuments of the noble architecture of the middle ages; whose banks present every variety of wild and picturesque rocks, thick forests, fertile plains; fruitful vineyards sometimes gently sloping, sometimes perched upon lofty crags where industry has won a domain among the fortresses of

Adieu to thee, fair Rhine! How long delighted
The stranger fain would linger on his way!
Thine is a scene alike where souls united
Or lonely contemplation thus might stray;
And could the restless vulture cease to prey
On self-condemning bosoms, it were here,
Where Nature, not too sombre nor too gay,
Wild, but not rude, awful yet not austere,
Is to the mellow earth as Autumn to the year.

PEN TEXT.

No. 1630. 18 POINT (GREAT PRIMER) 4A, 4 A, 25 a. $5.00

We sell a Printing Press for $95.00 that printers generally fail to appreciate. We know it to be an indispensable machine in every office that does much work, and in many offices there ought to be several.

It will do more work than any other, better average work, and is quicker made ready. To be sure, it takes only the small work. It is but 6+9½ inches inside chase; but stop one moment and think what 6+9½ is. Won't it take a full letter head? Won't it take your cards, full note circulars, envelopes, labels, tags, and all small dodgers? Stop another moment and think what proportion of the work of your office is of this character, and it won't take you long to see how much faster, cheaper and better you can do this work than you are doing it now on a larger machine.

We guarantee this machine to be stronger and better made than any other small press ever offered for $95.00, and that it is first-class in all respects. Every sensible printer should have one. We have plenty in our warerooms, ready to deliver on receipt of order. Send for circulars.

EARLE TYPEWRITER.

20 A, 108 a. 12 Point (Pica) $7.50

Messrs. Mordecai & Co. are now adding to their stock the purchases they lately made in Europe, as well as ~~the~~ large consignments made by their purchasing agent in London. These goods were selected with a view to the Fall and Holiday trade and comprarise choice selections of Art Works, in Marble, Bronze, China, Porcelain, ~~and~~ Silver, etc. A few lots will be sold by numbers, #192 and 193 being sold at a discount of 25%.

The prices on the others range from 50¢ to $500.00. We have also imported some very fine Steel Engravings, sizes 48½x74. Our stock of Cabinet Furniture, both imported and domestic, has been greatly increased, and affords a good chance for the selection of articles for home use and adornment.

We are prepared to make estimates for every description of Interior Decoration, such as Woodwork, Painting, Frescoing and Papering, and will furnish new and artistic designs in every branch of the business. A visit to our extensive establishment will amply repay those who are desirous of obtaining high-class goods. Polite salesmen always in attendance to exhibit to guests our magnificent display. Catalogue sent to any address on receipt of two 2¢ stamps. All goods delivered free in the city and surrounding country.

12-POINT TYPEWRITER.

Baltimore, Md., September 12, 1893.

Mr. Careful Printer,

Printersville.

Dear Sir:

We would also call your attention to our 12-Point Type Writer, which you might prefer to the Earle. They are both cast of superior metal, and you would not err in taste in selecting either face.

Both are handsome and useful, and we shall be pleased to receive an order for either, or both. These lines are printed in 12-Point Type Writer.

Our stock of new and beautiful faces is large and complete, and embraces the handsomest and latest designs of the various Foundries. Soliciting your valued orders, we are,

Yours very respectfully,

JOHN RYAN FOUNDRY,

Edward P. Suter

Manager.

Font 20A, 100a, $7.00.

This Intelligent Combination of late Improvements is presented for further appreciative consideration. Its tones are of a magnificent singing quality, of marvellous volume, peculiarly penetrating power, and in perfect sympathy with the human voice, while the wave-like melody of its softer modulations enchant all by their purity, increasing the delights of home and enhancing the enjoyments of social gatherings.

Rubhard Lively, M. D.

Dear Sir:—For many years I have been troubled with Weakness of the Back, and an Indisposition to Work. The symptoms have usually commenced on Monday morning and lasted, without intermission, till the following Saturday night. Once my troubles assumed such a serious character as made it necessary to place me in charge of the managers of the House of Correction, but the irksome treatment of that Institution utterly failed to cure.

If you can prescribe anything which will afford relief, you will receive the lasting gratitude of burdened relatives and needy wife and children. Yours Languidly,

Gregory Lackthrift.

Hardscrabble, Oct. 9, 1883.

WEATHER SIGNALS.

ORIGINAL.

Adopted by the U. S. Signal Service.

No. 1.
WHITE FLAG.
CLEAR OR FAIR WEATHER.

No. 2.
BLUE FLAG.
RAIN OR SNOW.

No. 3.
BLACK FLAG.
TEMPERATURE SIGNAL.

No. 4.
WHITE—BLACK CENTRE.
COLD WAVE.

EXPLANATION OF SIGNALS.

No. 1 always indicates clear or fair weather, no rain.

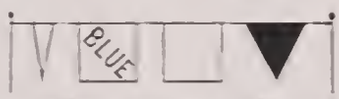
No. 2 always indicates either snow or rain.

No. 3 refers to temperature only. When placed above or before No. 1 or 2 it indicates warmer weather. When placed below or after it indicates colder weather. When not displayed, the indications are that the temperature will remain stationary, or will not vary five degrees from that of the same hour of the preceding day.

No. 4, cold wave flag, indicates the approach of a sudden and decided fall in temperature. This signal is usually ordered up at least twenty-four hours in advance of the cold wave, and for a temperature of 45 deg. or less.

When displayed on flag-poles the signals read downward. When displayed from horizontal supports a small streamer indicates the point from which the signals are read. When in the form of symbols, to be displayed on cars, they are placed one below the other and read downward.

Warmer, Fair Weather, followed by Rain or Snow.



Rain, followed by clear, cold weather.

Rain or Snow, followed by Fair Weather and a Cold Wave.

Warmer Fair Weather

24 POINT WEATHER SIGNAL, PER FONT, $1.00.

The last character may be used to print No. 2 in its proper color.

27	28	29	30	31		

This Calendar presents a bold, handsome appearance, and, unlike all other Perpetual Calendars offered for sale, has no hair lines to break off. The style of type used, as well as the rules, has been selected for its wearing quality, and, with the most ordinary care, will last a lifetime. It can easily be changed from one month to another in a few minutes. When desired, the blank spaces at the beginning and end of each month can be made into single spaces and utilized for advertising purposes. The figures being separate, the Calendar can readily be worked in two colors. The font contains the following number of pieces:

28 point Unique Gothic Figures—53 pieces.

1 2 3 4 5 6

12 point Characters and Logotypes 162 pieces.

◇ / — MON — — ^

18 point Unique Gothic Letters and Figures 41 pieces.

ABCD 1234

6 point Characters, 67 pieces. — —
Slugs, 18 pieces.

Spaces and Quads, about 130 pieces.

PRICE PER FONT, $3.60.

We also furnish a set of twelve months of this Calendar, electrotyped and blocked on wood, for $10.00.

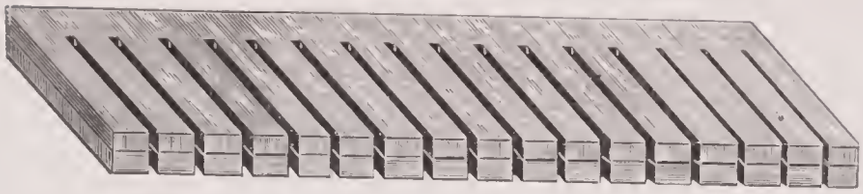
Wide sticks, with 3-inch knees, 10 per cent. more. Brass lined, 25 per cent. more.

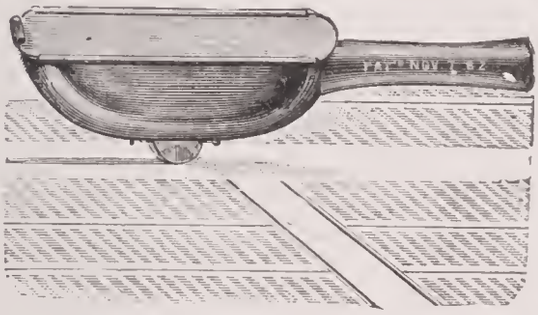
These are the standard styles. Any kind not shown here will be promptly supplied at manufacturers' prices. Sample sticks sent by mail, to any address, on receipt of price.



COMPOSING STICK RACK.

The most compact arrangement ever devised, and the only article ever offered for the purpose. It is a necessity in a well-regulated job office, and saves time usually spent in hunting around for sticks. Large and small sticks occupy a space of only one inch. Pass the bottom of the stick through the slot, letting it hang by the outer flange. The racks are made from two pieces, at right angles, to prevent breaking off.

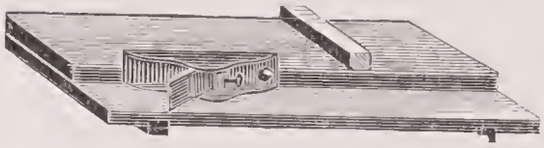
No. 1, for 10 sticks, 60¢. No. 2, for 25 sticks, 75¢. No. 3, for 50 sticks, $1.25. Odd sizes to order.



KENNEDY'S HAND PASTER.

This invention consists of a tight box, with handle and revolving wheel, so constructed that the flow of the paste can be regulated to a nicety, and the line of paste made coarse or fine as required.

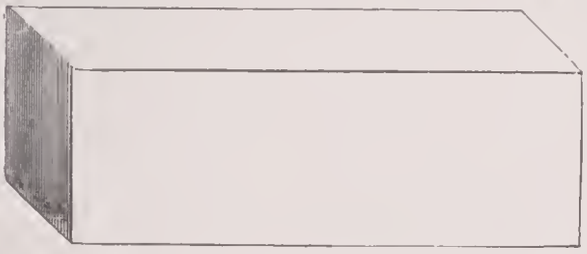
Price, including two wheels, four gates, etc., $3.50



SHOOT BOARD AND PLANE.

A serviceable and handy tool in a printing office for squaring up cuts, blocks, furniture, etc. Newspaper offices using plates cannot get along without it, if good fitting work is desired. The ingenious printer will find it very convenient, and that it will richly repay its purchase.

Hard-wood board, with iron plane ...	$5.50
Iron board	18.00



STEEL STANDARDS.

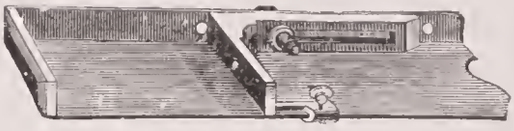
For setting composing sticks to a uniform size
Price, hardened steel $2.50

MITER BOXES.

Hard-wood Miter Box, each	50¢
Box and Saw	$2.25

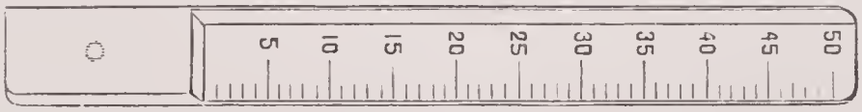
LAMP BRACKET.

With movable socket, each ..... 75¢



STICK CLAMP.

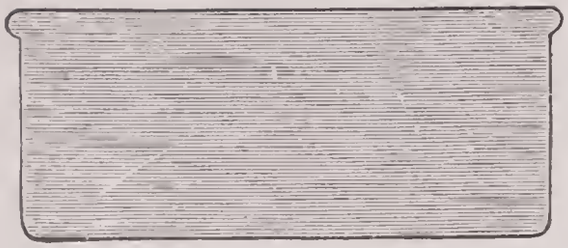
Prevents springing of the knee while spacing.
Price, each, 25¢



STANDARD "GAUGE-SETTING" RULE.

One of the handiest little tools in a printing office. Every job compositor should have one on his stand. It will be found useful in measuring leads and rules, in laying out work, and trying lines. The ingenious workman will find a hundred uses for it, and will wonder how he ever got along without it. The gauge is cut to 50 Pica ems, every fifth em being stamped with figures.

Sent by mail on receipt of price. Initials stamped free. Price, $2.00 each.

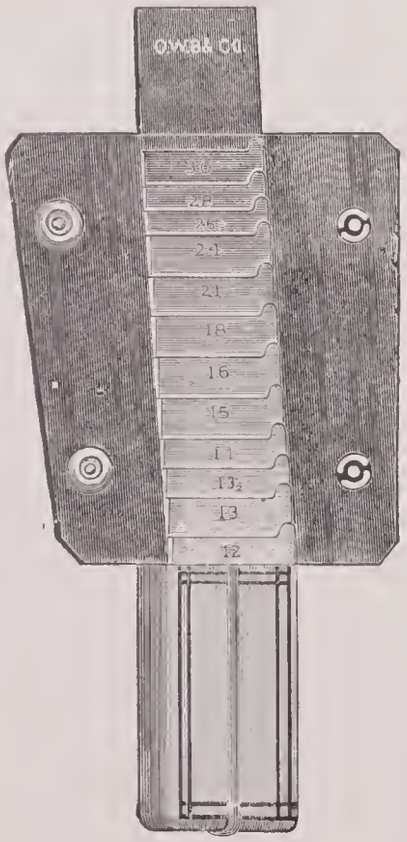


STEEL COMPOSING RULES.

Single column measure, each ..... 25¢
Double " " " ..... 35¢

STEEL MAKE-UP RULES.

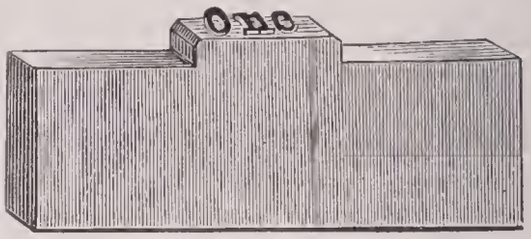
Single column measure, each ..... 30¢
Double " " " ..... 35¢



POCKET RULE CASE.

Guaranteed made of the finest spring steel, and far superior to the cheap cases now advertised.

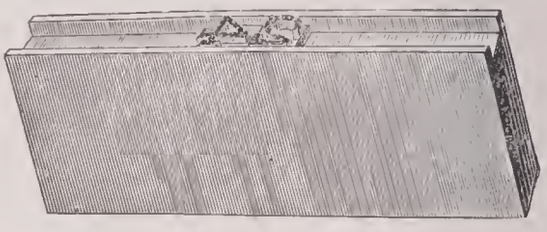
Just what every job compositor needs. A set of finely finished and accurate Composing Rules, made from best steel, inclosed in a strong canvas-lined leather pocket case. Sizes of rules: 12, 13, 13½, 15, 16, 18, 21, 24, 26½, 28 and 30 Pica ems. Each rule with length indicated in plain figures. Price, $1.50



20 TWENTY 20

"TAKE" SLUGS.

Electrotype Slugs, cut to measure, each..... 20¢



ST JOHN "TAKE" SLUGS.

The solid brass line above and below the figure protects them from injury and gives a plain line to measure from. Figures fit the mortise exactly and may be replaced, when worn out, at a trifling cost. Figures can be changed at will.

Practically indestructible. Price, each 25¢.

MALLETS.

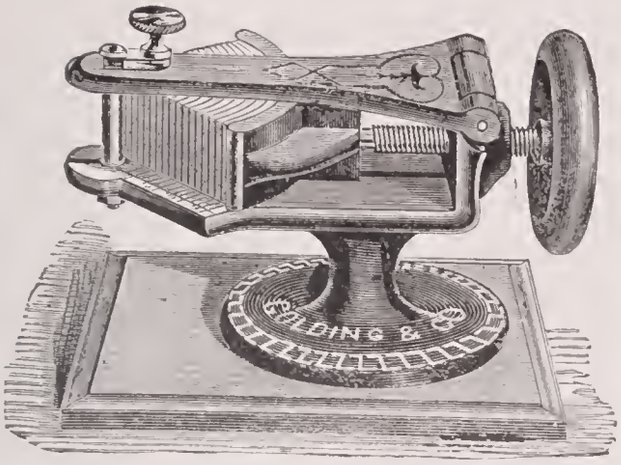
Lignum vitæ, each.....40¢ to 90

SHOOTING STICKS.

Steel, best made, each.....from 50¢ to $1.00

PLANERS.

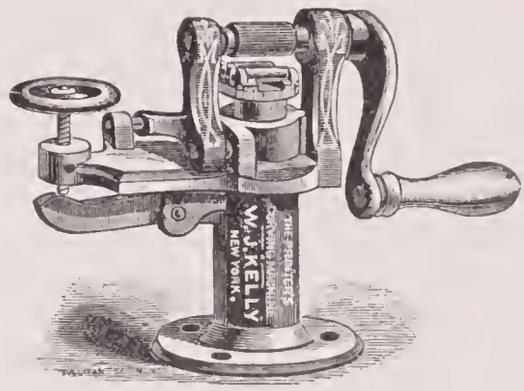
Maple, without leather cap..... 35¢
Maple, with leather cap ..... 50¢
Proof, " " felt covered..... 75¢



GOLDING RULE CURVING MACHINE.

Works easily, is simple, strong, and a desirable adjunct to the printing office.

No. 1. curves ¼ in. to 4 ins. diameter..... $12.00
No. 2. " ¼ in. to 8 ins. " 18.00
Dies for forming square corners, extra..... 1.50



KELLY'S CURVING MACHINE.

This machine has been long and favorably known to the craft as "The Printers' Curver." It will curve thin rules without annealing. Any size curves can be made, or any thickness of rule handled.

Price, $15.00.

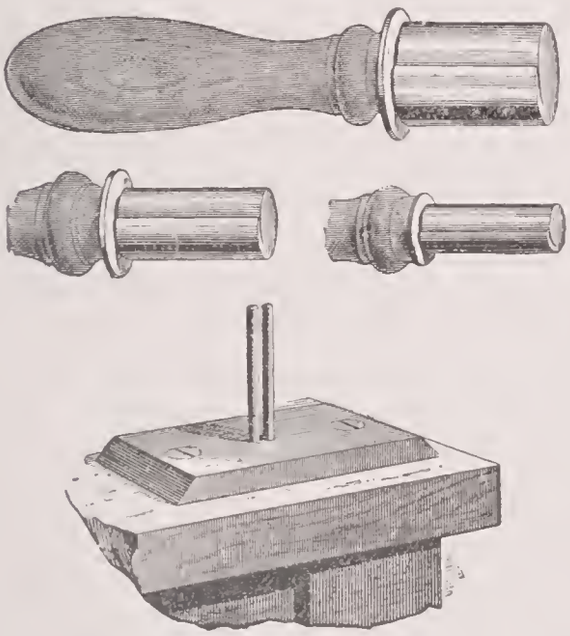
SOLDERING OUTFIT.

This outfit should be kept in every printing office where brass rule work is done. It remedies many defects not otherwise obviated.

Fancy panel work is made remunerative, as the designs may be saved and used again.

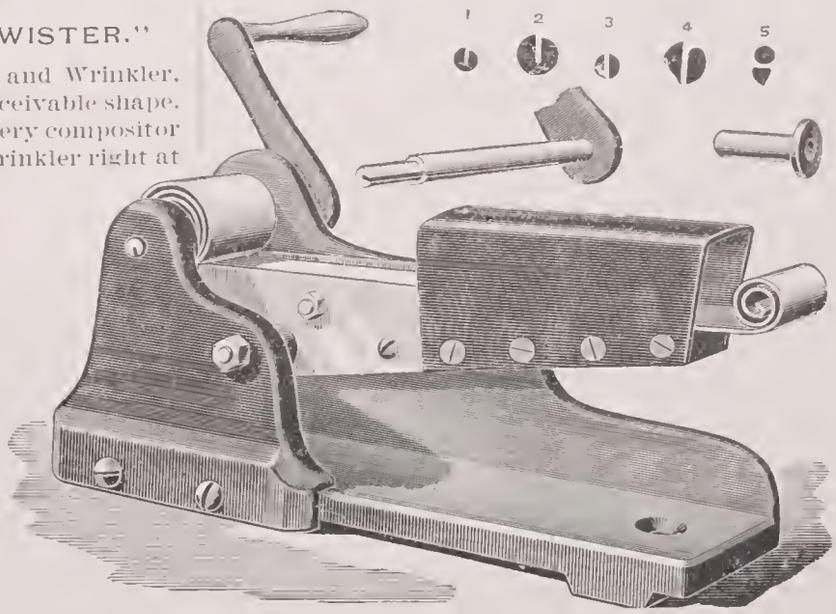
4-oz. Soldering Coppers, each..... 45¢
8-in. Blow Pipes, with ball ..... 35¢
Soldering acid, per small bottle ..... 20¢
Wire solder, per bunch ..... 10¢

Complete outfit, with addition of round pliers, flat pliers, file stone, file, square graver and a 3-inch try square, boxed.....$3.60



THE BARTHOLOMEW "TWISTER."

This Twister acts as both Curver and Wrinkler, and will put a rule in almost any conceivable shape. It may be carried in the pocket. Every compositor can now have his own curver and wrinkler right at his case. Price, per set, $1.00.

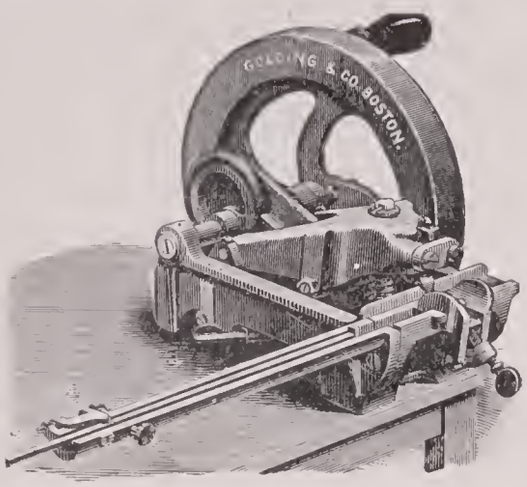


EARHART "WRINKLER."

No printing office is considered complete without a Wrinkler. The designs which can be formed from brass rule with this little machine are practically unlimited.

Five curling and bending tools are furnished with every machine. A sectional end view of each tool is shown in accompanying cut.

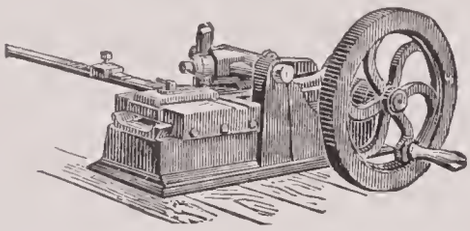
Price, $18.00.



LITTLE GIANT RULE SHAPER.

Combines great speed and steadiness of cut, with simple and effective rule clamp, and also a reliable graduated gauge.

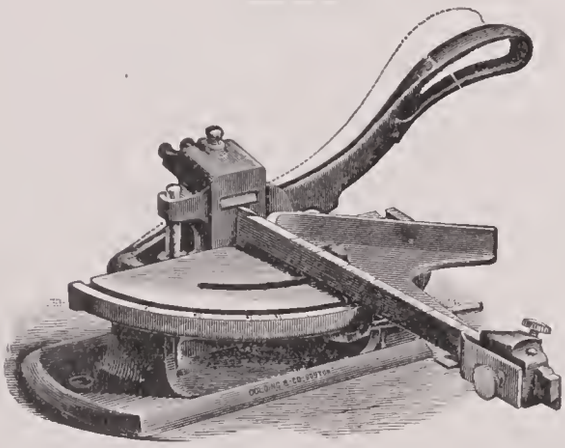
Price $35.00
Fitted with Patent Gauge, extra..... 5.00



MITCHELL'S RULE MITERER.

This machine cuts like a metal planer. The runner carries the rule under the cutting tool, which is automatically lowered at each cut. It will make perfect miters. Capacity, 2-line Pica.

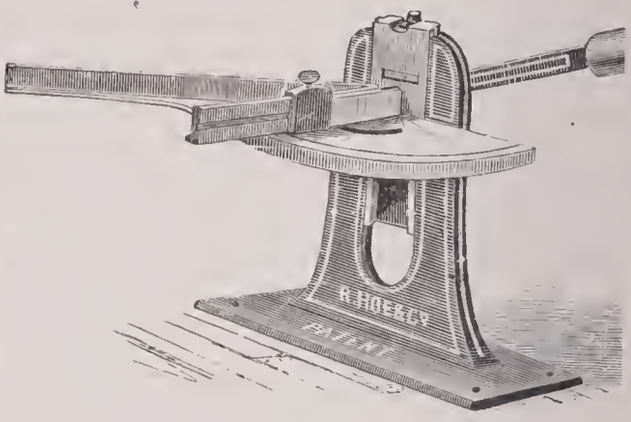
Price, $35.00.



GOLDING UPRIGHT MITERER.

The manufacturers guarantee this machine to cut the same at the bottom as at the top, to have fine adjustment, and a gauge guide accurately graded to Pica. Price, boxed, $18.00.

HOE'S UPRIGHT RULE MITERER.



Price, $18.00.

BINDERS' LIQUID CEMENT.

This Cement is much superior to glue for the following reasons: Being a liquid, it is always ready for use, and can be applied cold as easily as paste. It is much stronger than glue, and will not break or crack easily.

PRICES: Red, Blue, Green or Yellow—Per pt., 70¢; quarts, $1.20; gals., $1.00.

LINEN TAPES.

⅜-inch, two ply, per roll	$ .50

Bone..... each, 25¢, per dozen, $2.00

TYPE MEASURES.

Boxwood Type Measures, guaranteed accurate to standard Point System. 9-in., $1.50. 18 in., $3.00.

The Standard Measure (made of heavy paper and very durable), measuring all sizes of type, 25¢

LABEL HOLDERS.

Price—1×5½ inches, per 100.....$2.75
With Cards and Tacks complete.

By using the brass Label Holders and labeling type cases properly, a most uniform effect is produced. The composing room becomes neater and more attractive and the compositor is kept familiar with the various faces of type in the office—especially those faces seldom used—and much time is saved in distributing. When printing labels, it is well to add to the title the initials of the foundry where the type is made. This will often save time and confusion when ordering either sorts or duplicate fonts.

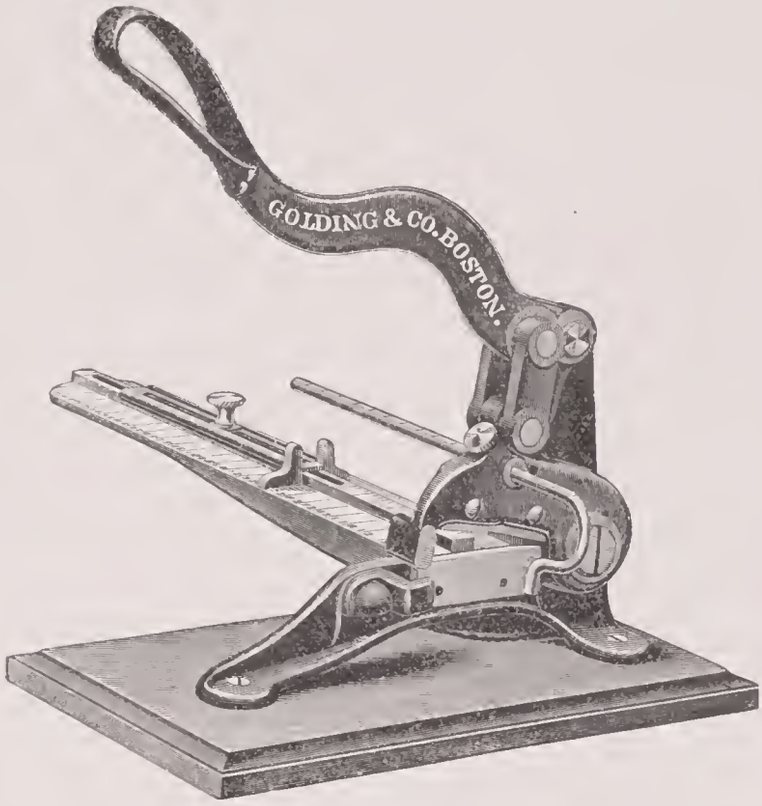
LITTLE GIANT RULE AND LEAD CUTTERS.

A NEW SIZE.

This new size of the justly celebrated Little Giant Rule and Lead Cutter is known as the No. 3. In it all the excellent features of the No. 1 size have been retained and strengthened, and an additional lever connection has been added. Everything has been done to secure the greatest power in a compact space, with a quick and direct action.

The bed is 12 inches long, the gauge extends 18 inches, and the screw which holds the sliding gauge works in a slot cut in the bed, giving a firm grip and a quick adjustment.

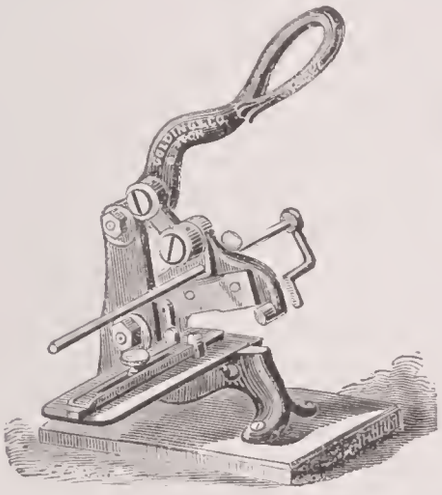
This size will cut Long Primer brass rule with ease.



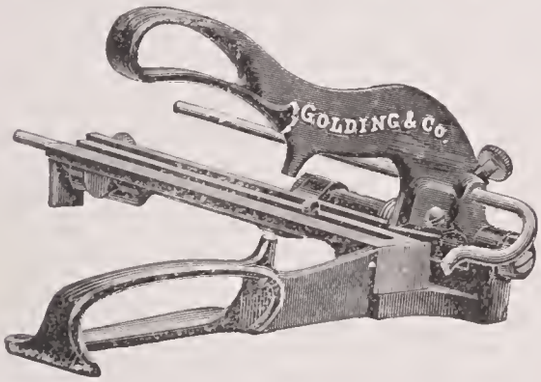
SIZE NO. 3.

These favorite cutters have balanced handles, large bearings and powerful action. Leads should be cut on the front section of the bed, and brass rule on the rear section only. When cutting rule, the bottom of the rule should be placed against the ridge in the centre of the bed.

No. 1, 12-inch gauges	$8.00
No. 2, " graduated to Picas	9.00
No. 3, 18-inch gauges " "	12.00



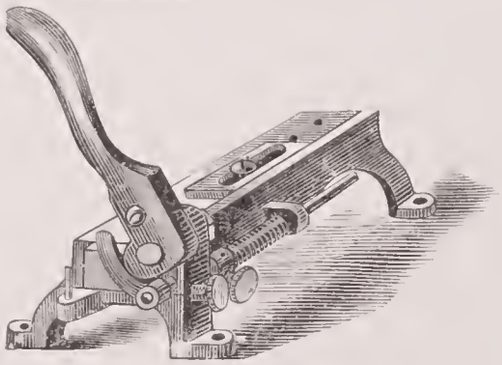
SIZE NO. 1.



NONPAREIL LEAD CUTTER.

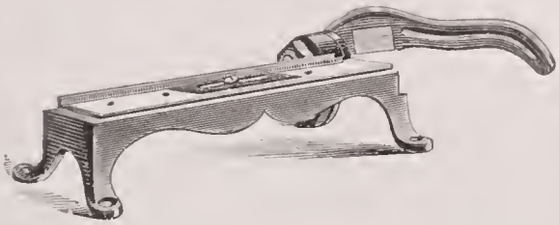
This powerful Lead Cutter has a long adjustable bearing for the lever, and has both front and back gauges. Leads can be cut very rapidly and easily on this cutter by grasping both handles in one hand as in operating hand shears. The lever is held up by a strong spring.

No. 1, plain	$4.00
No. 2, graduated to Pica ems	5.00



THE C. & M. DOUBLE GAUGE.

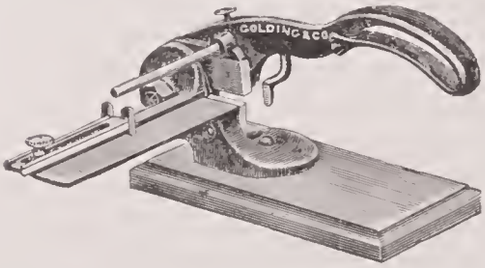
An extra strong and durable Lead Cutter, having adjustable inside and outside gauges. It will cut slugs readily and accurately. Price, $4.00.



C. & M. LEAD CUTTER.

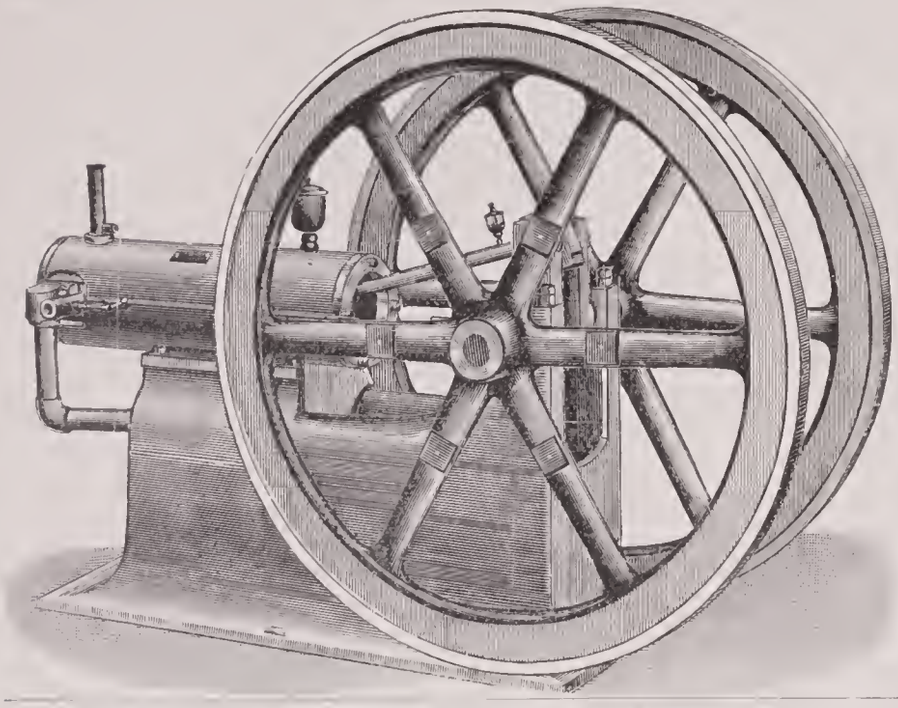
SINGLE GAUGE.

This Cutter is strong, well made, and cuts leads and Nonpareil slugs easily and true. Price, $2.00.



PEARL LEAD CUTTER.

A cheap cutter for leads only, with front and back gauges, and balanced lever. Price, $2.00.



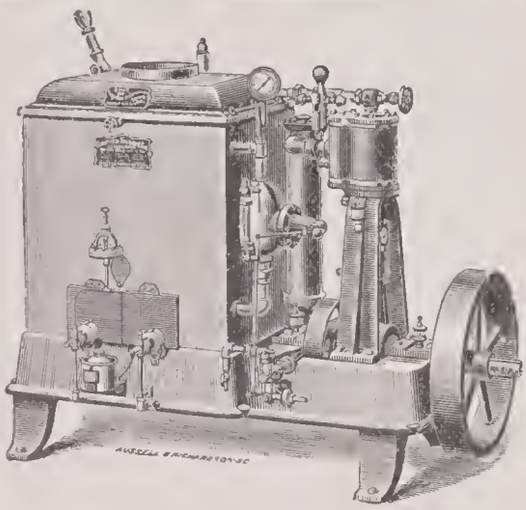
WHITE & MIDDLETON

Gas Engine

The Most Economical Gas Engine Made.

All engines have two balance wheels, with pulley flange to interchange. The annexed cut is the general design of sizes from 1 to 10-horse power.

Prices are given on application.



The Shipman

AUTOMATIC

Steam Engine.

KEROSENE, PETROLEUM, OR NATURAL GAS FUEL.

1, 2, 4, 6 AND 8-HORSE POWER.

Over 25,000 in use. Automatic in fuel and water supply, requiring but little attention.

PRICES, SIZES AND WEIGHTS.

Second-hand Engines, at Greatly Reduced Rates, frequently in stock. Write for particulars.

THE HAWKINS COUNTER.

The Cheapest Instrument on the market for indicating the number of movements of any machine to which it is attached.

The manufacturers claim the following advantages over others now in use:

It has no springs that are deflected to within 1-100 of their limit of elasticity; their life is therefore practically without limit.

There are no movements in it but those of the simplest mechanical kind, and will never give the annoyance generally inseparable from this kind of machine by getting out of order.

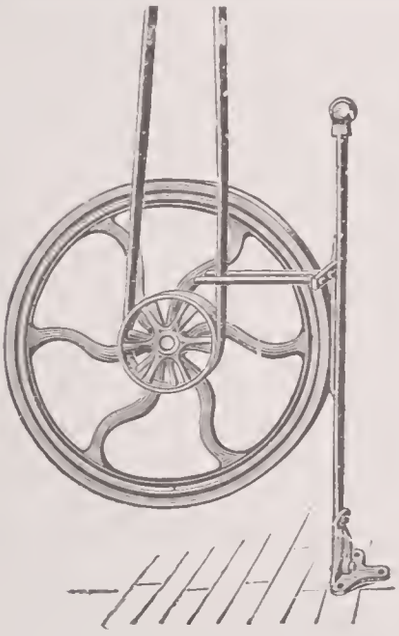
It may be instantly set to zero or at any desired number, from any point or number, by simply turning either diget wheel.

It will stand the roughest use and the highest speed, without failure to indicate correctly.

They are the lowest priced counters now sold that will indicate correctly and wear well.

They will indicate from zero to 100,000, and always exhibit the correct number in large clear figures, nearly as close together as the same sized figures would be written or printed. They occupy a space of but 1×6 inches.

PRICE, ONLY $10.00

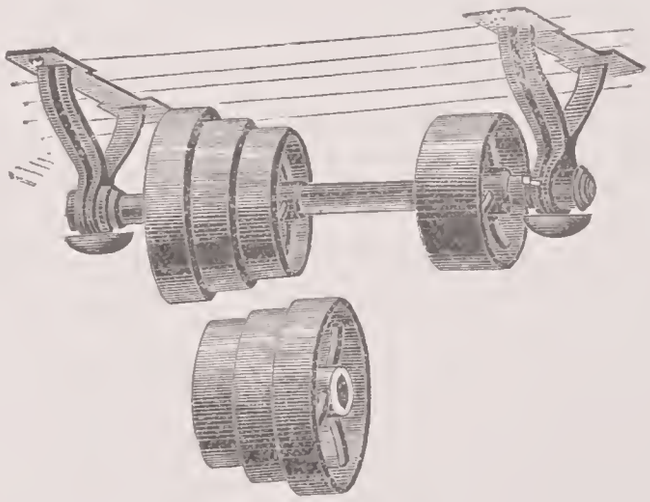


STEAM FIXTURES.

This cut shows our Patented Improved Steam Fixtures attached to the fly-wheel shaft.

The shifter or upright handle has a friction brake which comes immediately in front of wheel when the belt is shifted from the tight to the loose pulley, and by slightly pushing the handle from operator the brake comes in contact with wheel and stops the press at once.

For 6×9½ press	$10.00
8×12 "	12.00
10×15 "	15.00
12×17½ "	15.00



COUNTERSHAFTS AND HANGERS.

Every printer knows how desirable it is to have presses run at different speeds, as their work may require. These fixtures consist of overhead cone pulley, shaft, hangers and small pulley, and extra split cone to go on main shaft.

The one-size fixtures answer for any size press up to half medium by varying the size of the cone on the main shaft.

Price, to take 1 to 1½-inch belting—

3-step cone	$20.00
4-step cone	24.00

In ordering the fixtures, give the number of revolutions the main shaft makes in a minute, and its exact diameter, and we will send to suit required speed.

THE IDEAL TABLETING APPARATUS.

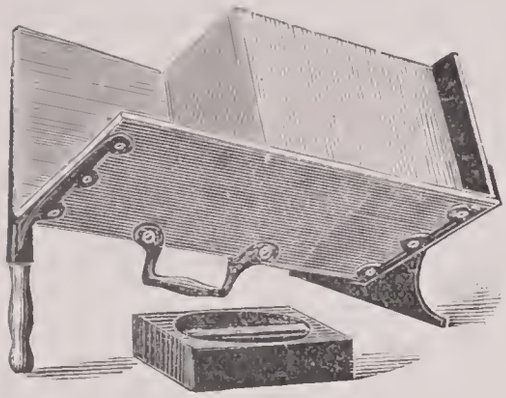


Fig. 1.

This is a simple, common sense apparatus, designed to be used by practical printers. It has no clamps or screws to be operated, and is effective, rapid and thorough. Jogging up by hand will be discontinued by every good printer who once sees the Ideal in use.

Figure 1 shows the apparatus with *iron base plate* in position, forming the bottom of the box, and a small pile of sheets resting upon it. All trash, dust, etc., is sifted out as the sheets are put in, the two side pieces not coming quite together and thus leaving an opening for that purpose.

Fig. 2 shows the pile of sheets ready for gluing. Having the sheets in the box, as shown in Fig. 1, and having placed the iron brick on top of the pile, it is necessary only to grasp the apparatus by the handle and leg and carry the whole outfit to the gluing table or stone; by putting it in a perpendicular position the iron base plate will rest upon the stone on its four legs, with the pile of sheets upon it in perfect order and tightly compressed by the iron brick. Now, continuing to hold the box in a perpendicular position, withdraw it from under the base plate, which is made possible by an ingenious and simple arrangement of the bottom frame of the box, and the pile is left standing upon the base plate, all ready for the glue brush.

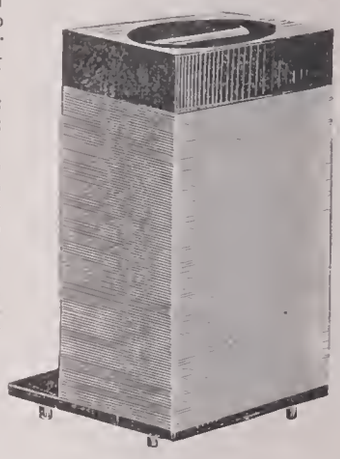

Fig. 2

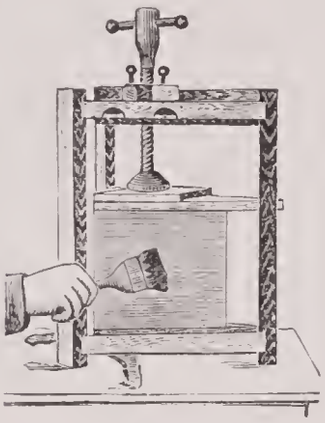
PRICE, complete with Box, Base Plate and Iron Brick, size 8×8×18 inches, capacity 6,000 sheets..... $6.00
Extra Iron Bricks, weight about 25 pounds, each..... 2.50
Extra base plates, each..... 60



WEAVER'S TABLET PRESS.

Price, $5.00.

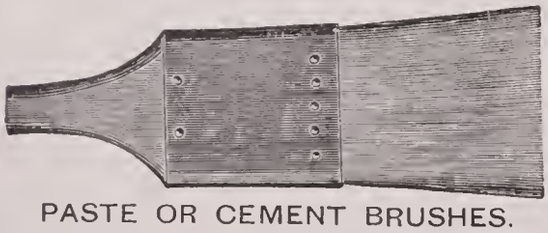
The one style takes any size paper from 1 to 16 inches square and from 100 to 5,000 sheets, holds them securely, presents the edges of the paper free to the brush, and as the block of paper is not suspended between pressure at all, it never slips or slides, and yet does not require so great pressure that the pads swell and crack after being removed from the press.

The block of paper is not disturbed at all, but the squaring boards are taken away, leaving the paper unmoved.

It need not be fastened to any place, but can be used anywhere, and set under the table when not in use.

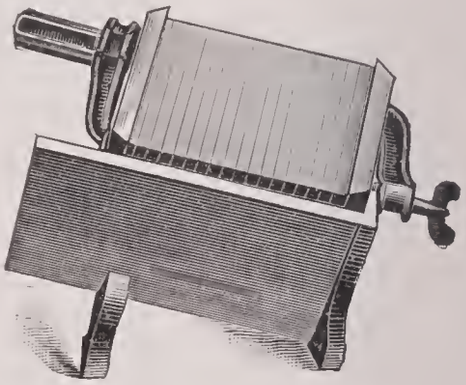
It is made of iron and hard wood, securely put together, and is strong and light.

It is a cheap tool, and those who have purchased it are well satisfied with their outlay.



PASTE OR CEMENT BRUSHES.

French bristles, 1 inch..... 30¢ each.
" " 1½ inch..... 40¢ "
" " 2 inch..... 55¢ "

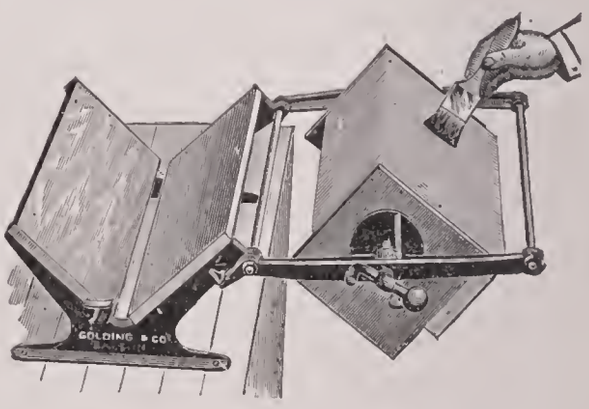


COTT'S TABLET HOLDER AND CLAMP

FOR STRAIGHTENING UP AND HOLDING THE SHEETS WHILE BEING GLUED FOR TABLETS.

Will hold 3,000 sheets of paper, 8×16 inches or any size smaller. It is made sloping, so that the paper will stand alone while being adjusted. Can glue two sides. Clamp separate from the box.

Price, with four beveled press boards..$3.25
Extra Clamps, $1.35 each.



GOLDING TABLET PRESS.

This press is too widely known to need further description.

No. 1 holds 2,000 sheets, 6×12 in. or less..... $7.50
No. 2 " 5,000 " 8×16 " " 14.00

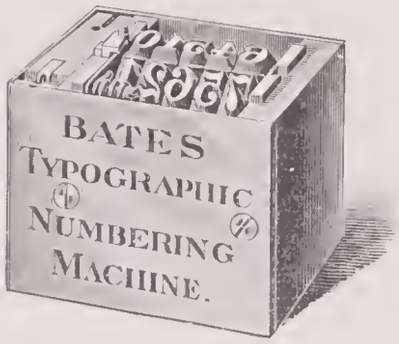
BATES AUTOMATIC NUMBERING MACHINE.

Every figure disc changes automatically in its consecutive order, from 1 to the full numerical capacity of the machine. This cannot, therefore, be classed with the so-called "Automatic Numbering Machines," which are self-changing to 999 only.

The changing from consecutive to duplicate and continuous numbering is effected by the mere moving of the pointer in front of the dial.

The figures are placed close together, insuring the most desirable compact spacing.

One of the important improvements this machine possesses is its inking device. The figures receive ink automatically from a thick felt pad, which is held against them by spring pressure when at rest. To re-ink the pad it is not necessary to remove it from the ink carriage, as formerly. The finger-piece located on the upper part of the inking-apparatus is pressed downward, when the inner frame of the carriage opens outwardly, thus completely exposing the pad for a fresh application of ink. By pressing upward on this frame it locks itself in its proper position.



This is one of the most substantial little tools we have ever seen. Its mechanical construction is a marvel of perfection. It gives the printer a first-class machine at a moderate price.

This machine can be used on any printing press by locking it in a chase or form of type, the same as a cut or electrotype, and it numbers consecutively from 1 to 100,000. It occupies a space of only 1 6-64 of an inch in length by 1 1-32 inch in width. It is entirely self-contained and automatically changes each disc of figures in consecutive order, from 1 to its numerical capacity.

A movable fixture accompanying each machine, upon the printing surface of which is engraved the inscription "No.", may be so attached as to precede the figures, but as it has nothing whatever to do with its operation, the machine is used without it equally as well.

The extreme height to which the figure discs rise above the surface of the type after each impression is but 3,64 of an inch, which is so slight that the rollers cannot be torn or in any way injuriously affected. While an impression is being taken, the figure discs descend to their lowest position, which is type high.

Should any particular job require that the numbering be printed in a different color, the machine may be placed in the chase by itself, the material passed through the press again, and all the advantages of an expensive Paging Machine, so far as other work than paging is concerned, may be derived.

A locking pawl retains the numbering wheels in the downward or type-high position, preventing them from changing while the form is being made ready. A slight pressure with a bodkin upon a lever makes the machine ready for numbering.

Price..... $30.00

STYLES OF FIGURES FURNISHED WITH THE BATES AUTOMATIC NUMBERING MACHINE:

Style A	Style B	Style C	Style D
12345	12345	12345	12345

These prices are for machines made with any of the styles of figures shown.

Each machine is guaranteed in every particular. Directions for operating sent with each machine.

GAUGE PINS.

The styles termed "Gauge Pins" are fastened in the tympan, and are stuck through the top sheets only. The sizes given refer to the height of the gauge-head, or length of the lip, or both. The lip (tongue) is that part which projects forward at the top of the gauge-head. The Low sizes are a Pica high, and the High one quarter inch over all. The Medium are half way between. The "short lips" project but slightly; the "long lips" about one quarter inch, and the others about as illustrated. The sizes as to Gauge Pins make no difference in the price. Those styles made with a tooth or teeth at the bottom of the gauge-head are adjustable.

Description of Numbers—Which now apply to all styles made.—No. 0, small in every way; No. 1, Low; No. 2, Medium; No. 3, High; each with one-sixteenth inch lip. No. 4, Low, little or no lip. No. 5, Medium, one-eighth inch lip. No. 6, Low, and 7, High, each about one-quarter inch lip.

Full printed instructions accompany each set or dozen, neatly boxed, one size in a box. All sizes and tyles mailable. Order by name and size.

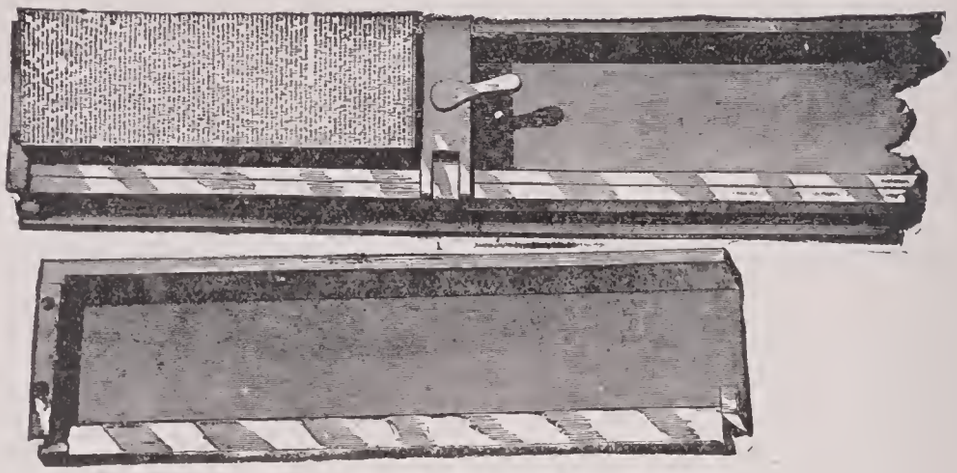
GALLEYS.

LINCOLN ALL-BRASS GALLEY.



The most Durable, Convenient and Useful Galley ever invented. Saves Time, Money and Space.

The advantages of this Galley are apparent to all. There is no handling of sidesticks or quoins. It is compact, the only detachable portion being the clamp at end of galley. The type is always secure and held intact during composition, making up or standing matter.

When sufficient type is placed upon the galley, close up the side, which is caught by a spring catch at the head of the galley, adjust the clamp tightly against the matter at the end and turn the lever to the left. In correcting, loosen the matter by simply turning the lever to the right. The narrowness of the galley makes it very convenient in correcting, as it gives the free use of all the boxes in the lower case. The saving of space on the stone and bank is also a very important feature in all offices.

When ordering galleys, give the exact width of columns.

12 inch News Galleys, all brass	$2.00	24 inch News Galleys, all brass	$3.00

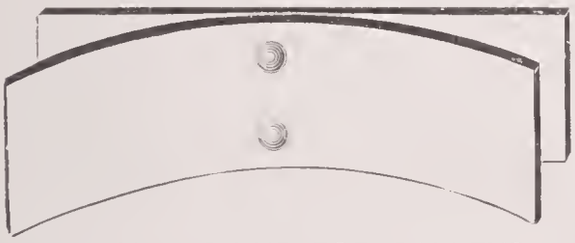
DEARING LEAD DISTRIBUTING GALLEY.

The invention of Mr. O. A. DEARING, and its purpose is indicated by its name. It is a half-rimmed wood galley, with a printed scale on the face, covered with glass. The lines are just a Pica apart and are plainly numbered from 1 to 60, each fifth line and number being more heavily printed than the rest, as shown in the cut. The leads, slugs, or brass rule to be sorted are laid edgewise on the galley across the lines, which register at once their respective lengths. A galley full is quickly distributed by removing successively the longest lengths until it is emptied. Price, $1.25.



FOOT LOCK-UP FOR GALLEYS.

Cheap and Handy, Saving its Cost a Hundred Times Over. Prevents pi in Proving Galleys.

Single column, any newspaper measure..... 15¢
" " per dozen.....$1.25

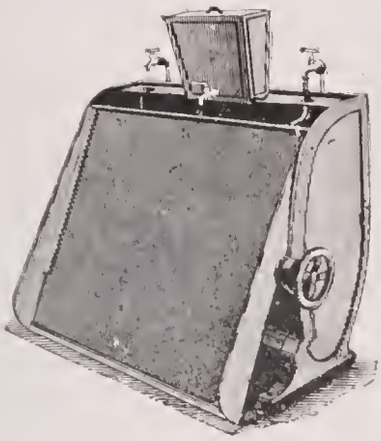
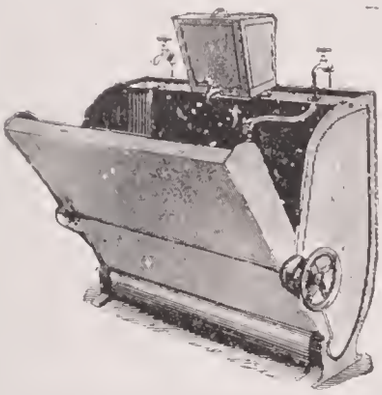
BRASS CURVES AND CLAMPS.

These are valuable in some offices where fancy work is done by unskilled hands.

Price, per case of 170 pieces $8.00.



Position of Machine when ready to Receive a Large Form.



Position of Machine when ready to Wash Large Form.

WILSON'S FORM WASHER.

This machine will highly commend itself to those printers who like a clean pressroom, who want the forms thoroughly clean, and who are also in favor of economy in time and labor. It will take a form 35½×39½ inches. Full directions with machine.

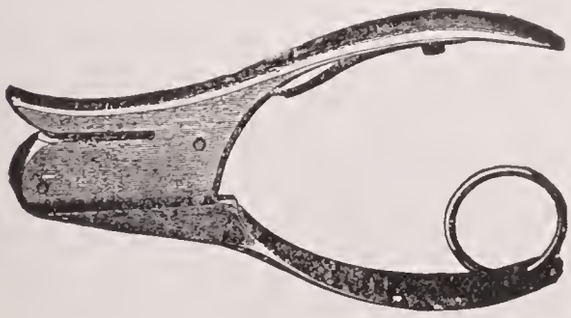
It is simple in operation, with no springs or anything to get out of order, made entirely of iron, and will last a lifetime.

Price, $50.00. Boxing extra.

It is easily placed, can be moved at will, has the best arrangement for drainage, and will not clog.

No more lifting of heavy forms; no more danger of disarranging the form; no more wet and filthy floors; no more dirty, weak or inky lye, as the lye used in this machine always retains its strength, and is at all times perfectly clean when used.

A boy can operate it with ease and dispatch.



PRINTERS' PUNCH.

A strong and durable hand pliers for puncturing leaflets, cards, thin pamphlets, etc., for lace binding. The cut is half size. Makes a small, round hole.

Other shapes to order.

Price, handsomely nickeled $2.50

SAFETY BENZINE CANS.

These Benzine Cans are the best in the market. They have no springs. The stopper is automatic, and it allows the contents of the Can to be kept in control of the operator.

In whatever position the Can may be placed—on its side, upright, or at angle of forty degrees, or its mouth downward—the stopper is always firmly locked and the contents securely held.

Hold the Can with the mouth downward, give it a slight shake or jar with the hand, and the fluid is released.

Made in quart sizes only. Price, 75¢.

BENZINE AND LYE BRUSHES.

A Variety of Styles.

Price, each ..... from 50¢ to 90¢

Rule Blocks made of any style desired.
Extra hooks and pinions inserted in Blocks, 50¢

Steel pinions, 15¢ each; hooks, 10¢ each.
Ratchets, each—brass, 50¢; steel, 75¢

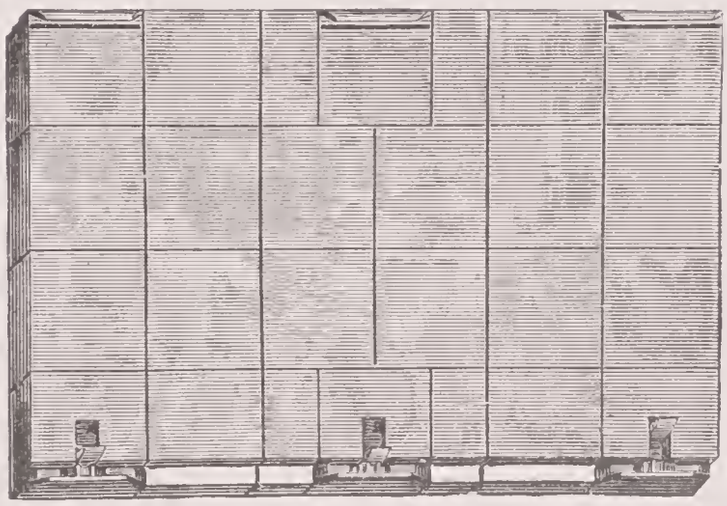
In sending orders, give the size of each block outside, and also the size of the largest and smallest plate to be worked, measuring the back of the plate; or, add three-quarters of an inch to the printing matter, thus: if the matter is 3×5 inches, the Blocks should be 3¾×5¾ inches outside, the bevel on the plate being about an eighth of an inch. The hook and pinion will take five-eighths of an inch, with a little allowance for taking the plate free. All hooks are made ¾-inch thick, unless otherwise ordered.

IMPROVED

Metal Sectional Blocks.

WITH HOOKS AND CATCHES.

SUPERIOR TO ANY OTHER IN THE MARKET.



These Sectional Blocks, with hooks and catches, furnish the best and cheapest mounting for plates. They may be quickly made up into any size page, will last longer than wood blocks, and greatly reduce the labor for making ready, as they furnish an even, unyielding and perfectly reliable base for the plates and bring them to the proper height for printing. They are much better than wood bases, as they will not shrink or warp. The above cut shows a page of the Sectional Blocks, with hooks and catches, ready for the plate. The hooks are operated by a ratchet, the same as those on patent wood blocks. The sections are made in the following sizes; 2×4, 2×8, 4×4, 4×8, and 8×8 Pica ems. In five minutes a page can be made up to fit a plate of any size. Being made with the utmost accuracy, they lock up readily without springing. They may be used on either cylinder or platen presses with equal facility, and are particularly adapted to book printing, as they are convenient to lock up in forms of any number of pages and easily changed to accommodate various sizes of plates.

The manufacturers of the Improved Sectional Blocks have overcome all the objections that apply to the sectional blocks in common use. The hooks for these move freely and are not affected by the lock-up. Closer margins can be made with them than with any other. All sections are planed and trimmed, and are guaranteed perfectly accurate. All the catches are of uniform height and thickness.

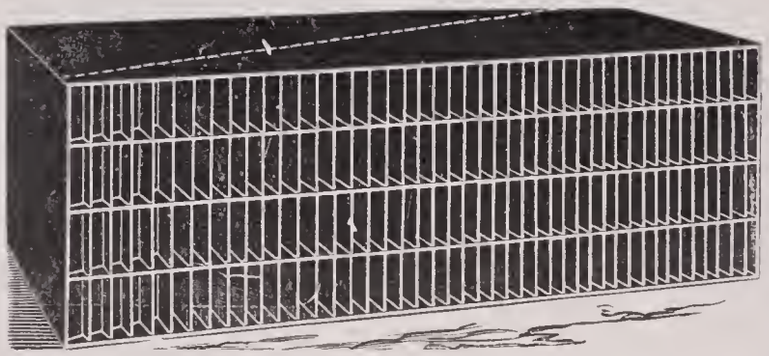
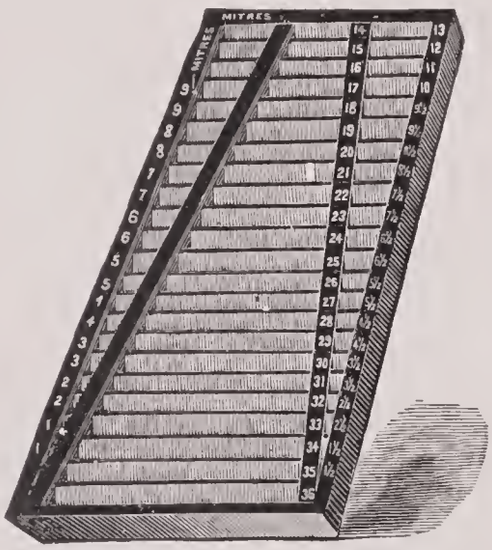
Sectional Block Furniture, made up in pieces of 2×4, 2×8, 4×4, 4×8 and 8×8 Pica ems, per pound ..... 25¢



THE STANDARD RULE RACK.

This old favorite still stands at the head, and for the use of large and medium-size offices it cannot be excelled. It has a separate box for every length and face. By mitering all sets of rules to even Pica ems on the outside, and placing each length in its proper box in this Rack, enough money will be saved in one year to pay for the entire rule outfit. The Rack is about 50 inches in length, holds a ton of rule, and runs up to 50 ems Pica. Special sizes to order. Estimates furnished.

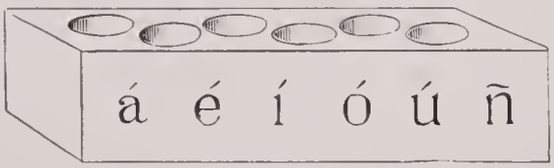
Style as shown by above cut, $15.00. With only two rows, $12.00.



PERFECTION RULE CASE.

This is a graduated case for Brass Rule, and four of them will go into a full-sized blank case. The case will hold about twenty pounds of labor-saving brass rule; and has a separate place for every length by half picas from 1 to 9½, and by picas from 10 to 33. It is very simply and conveniently arranged with the half pica lengths on one side, short pica lengths on the other, and longer lengths between. There is double space for all lengths below ten picas. Each box is accurately spaced, and no box will admit a longer length than marked. Rules cannot fall down.

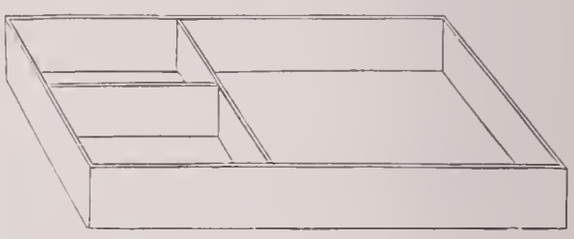
Price, each, 90¢. Set of four, $3.50. Set of four and full-sized Blank Case.....$4.00



ACCENT ANNEX BOXES.

Generally placed across the top of the h box, to hold accents or other outside characters. Very handy.

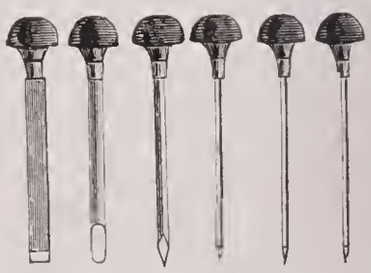
Price, each, 15¢. Per dozen, $1.00.



LEADER BOXES.

This is something newspaper compositors have long wanted.

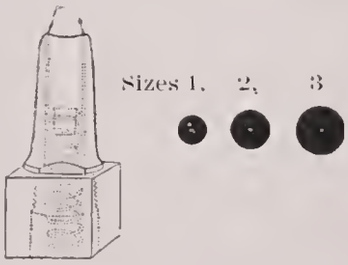
Price, each, 35¢. Per dozen, $3.00.



PRINTERS' GRAVERS.

Very useful set of Tools in the Job Room. Indispensable to the Artistic Printer.

Six tools, sharpened for use $2.50

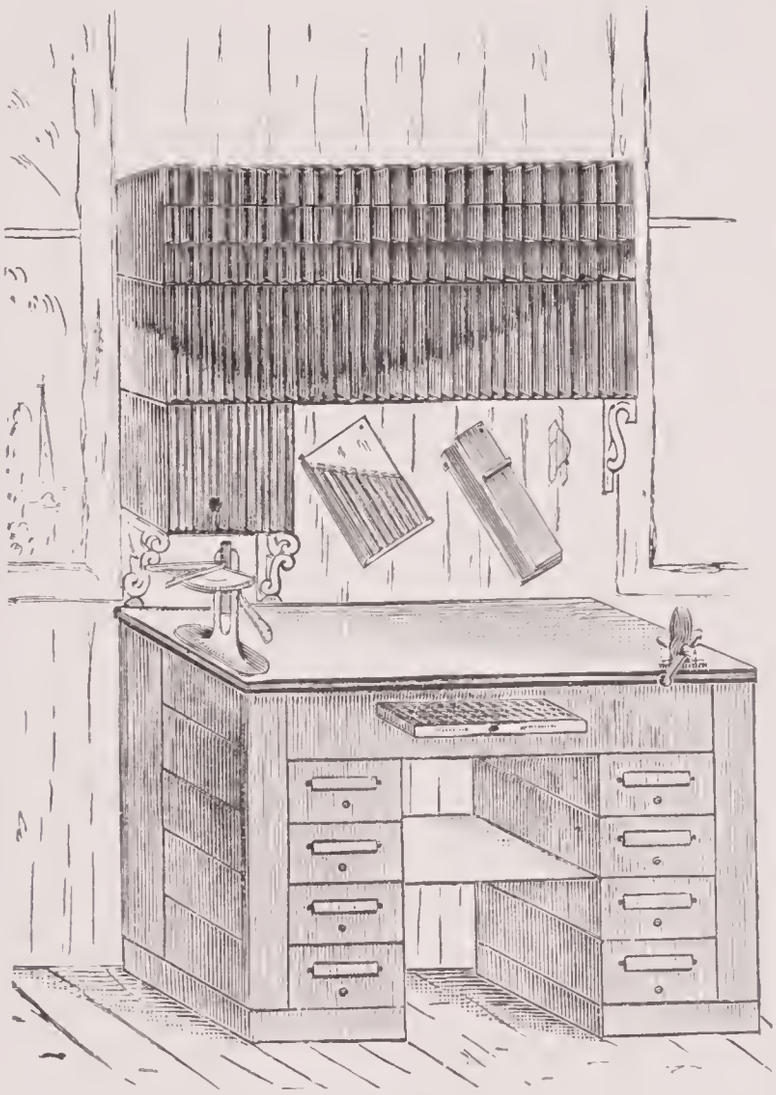


It is easily locked in place in any type form and as the punching and printing can be done at one impression, it will save much time on programmes, orders of dancing, &c., or any work requiring holes for tassels or strings. Made in three sizes on brass base.

ELM CITY CUTTING PUNCH.

Price, packed in box with extra cutting plate. $1.00
A set of the three sizes..... 2.50
Extra Cutting Tubes, each..... 35¢

JOB PRINTERS' HANDY WORK BENCH.



WORK BENCH AND FIXTURES COMPLETE.

This very important adjunct to a well-equipped job printing office consists of the following articles, every one of the best quality, and not one of which can be dispensed with in an office that wishes to secure economy of labor and facility of working:

WORK TABLE.—A well-finished work-bench or table about 5 feet long, 3 feet high, and 2 feet wide. This has a solid plank top, and is strong and firm. It has 4 drawers for quadrats of the most used job sizes, divided to accommodate en, em, 2-em and 3-em quads; a like number of drawers for leaders, similarly divided; a drawer divided appropriately for short rules and leads; handy shelf under same.

LEAD RACK.—Dearing Patent Lead Rack, elsewhere described, 18 inches high, holding leads from 6 ems to 50 ems in length. Holds a ton.

VISE.—An iron Vise fitted to bench. Its importance cannot be over-estimated.

RULE RACK.—Above the Lead Rack is a 3-section Rule Rack, of the same length and arranged for three or more faces and styles of rule. It will accommodate a ton of rule.

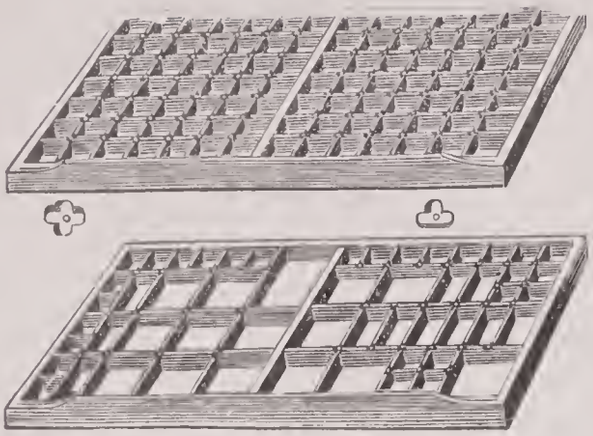
QUOTATION FURNITURE RACK.—Holds a 50-lb. font of labor-saving quotations. It has a space for every size piece, and all sizes come flush with the front.

LEAD DISTRIBUTING GALLEY (see cut and description elsewhere).—The first and only device ever used for this purpose. This galley alone will save enough money to pay for the whole outfit.

SHOOT BOARD.—For squaring cuts, furniture and plates. Complete with plane.

This entire outfit, complete, will be furnished for $75.00.

NEWS AND JOB CASES.



NEWS CASES OR PAIRS.

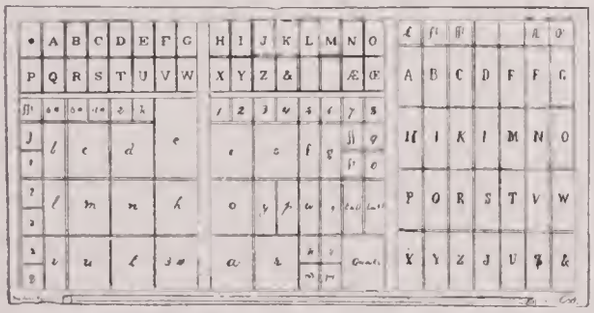
News Cases are made in two styles—Plain and Patent Clasp. The patent differ from the plain only in having every partition secured by a patent brass clasp and long pin, clinched to the bottom of the case, making the case of unusual strength. Both are full size—32⅓×14½×1 9-16 inches.

Price—Patent, per pair.....$1.75
" Plain " 1.60

JUMBO JOB CASE.

A mammoth case, with all the waste room of the ordinary case saved and put where it is needed. It will easily hold double fonts of 60 and 72-point job type, and is especially desirable for poster printers.

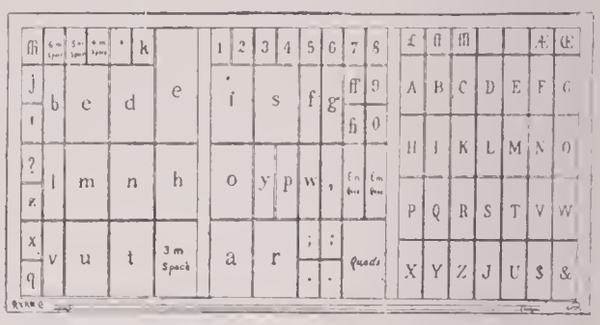
Price, each.....90¢
Express charges from factory added.



IMPROVED NEW YORK CASE.

We have simply removed the principal defects of the old case, and made it worthy of a place in any office. It holds caps, small caps and lower case. Note the extra size of the cap boxes.

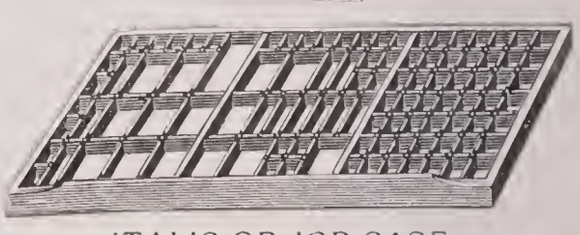
Price, each.....$1.20



CALIFORNIA JOB CASE.

The job case, *par excellence*, of the world. A box for every letter, and large enough to hold the type that belongs in the case. It costs no more than the old styles.

Price, each.....90¢



ITALIC OR JOB CASE.

This case differs from the California only in having 49 small boxes for caps, in place of the 35 large boxes of the former case. Why the 14 extra boxes are there no man living knows. Sent only when specially ordered.

Price, each.....90¢

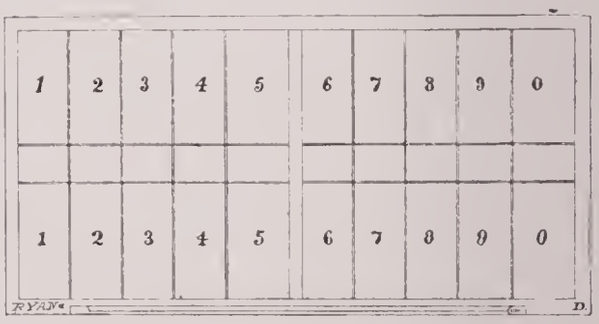


FIGURE CASE.

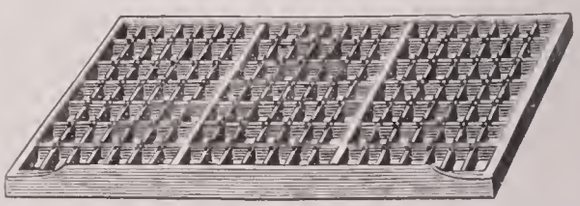
A case that will recommend itself to every intelligent printer. It is just the thing for surplus figures or piece fractions.

Price, each.....90¢
Express charges from factory added.

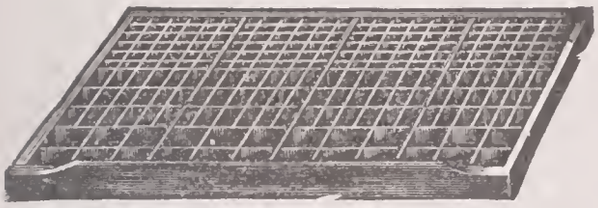


TRIPLE CASE.

Holds three separate small fonts of cap letter Handy for a font of caps, small caps or lower case.

Price—Patent clasp, each.....$1.00
" Plain, " 90

JOB CASES.



BORDER CASE.

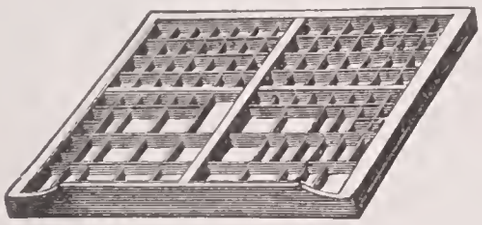
Designed for keeping borders or ornaments. The case will hold twelve separate fonts of borders.

Price, each.....$1.25
Express charges from factory added.

TWO-THIRD CALIFORNIA JOB.

This case is, without exception, the best two-third case ever made. Its economy is beyond question. It will readily hold a double font of large body type.

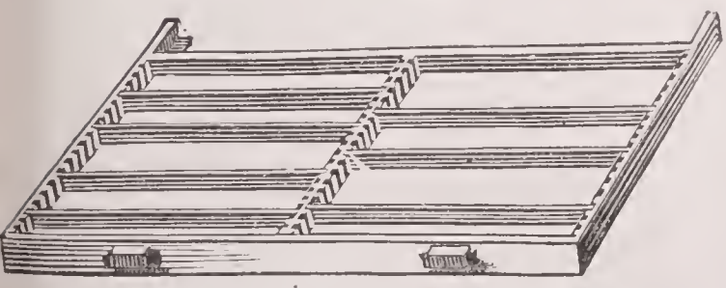
Price, each.....75¢



TWO-THIRD IMPROVED JOB CASE.

The best two-third case yet made to hold caps, small caps and lower case. Size 19×22⅜ inches.

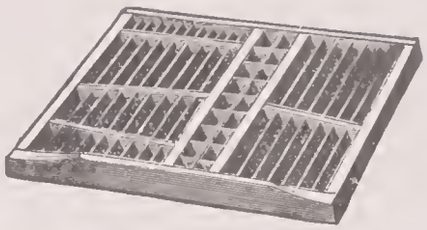
Price, each.....90¢



WOOD TYPE CASE.

For keeping wood type. Has adjustable strips, allowing for any size type.

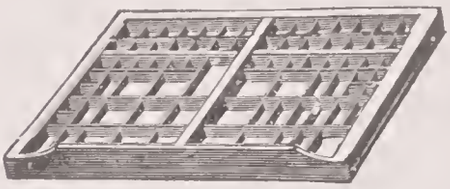
Price, each.....$1.30



TWO-THIRD RULE CASE.

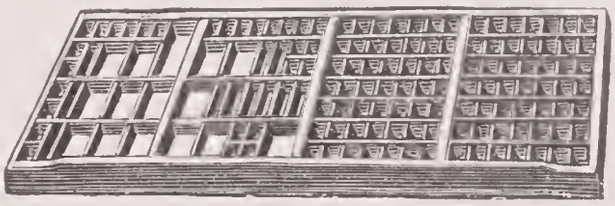
Holding rules cut from 1 to 50 ems in length, half em lengths from 1½ to 9½ ems, and all the right and left miters. This case has been on the market for years, and is familiarly known to every printer.

Price, each.....90¢



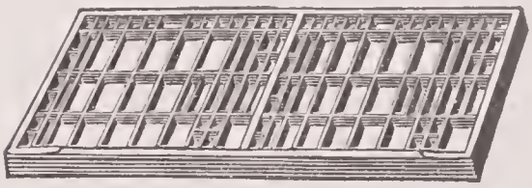
TWO-THIRD YANKEE JOB.

Price, each.....75¢



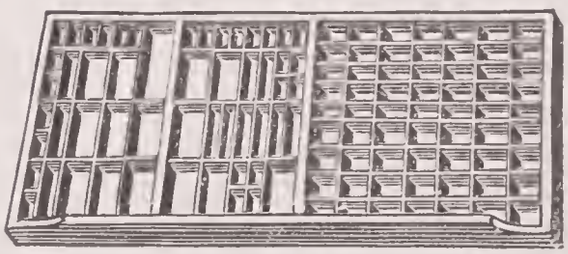
IMPROVED MIDDLETOWN JOB CASE.

New Pattern, each.....$1.20
Express charges from factory added.



DOUBLE LOWER CASE.

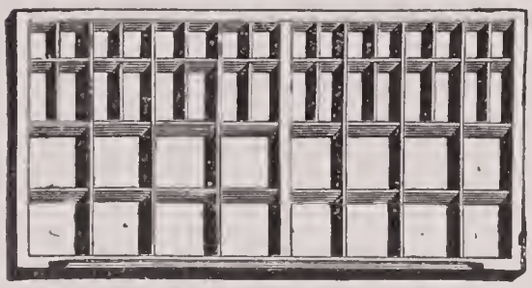
Each.....$1.20



PATTERSON JOB CASE.

Each.....$1.00
Express charges from factory added.

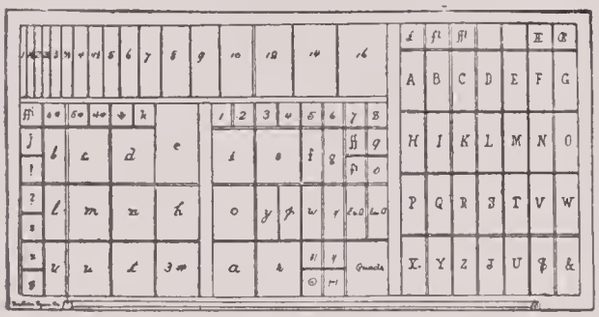
JOB CASES.



SPACE AND QUAD CASE.

No job office should be without several of these useful labor-saving cases. They save the quads and spaces as well as time.

Price, each. $1.00

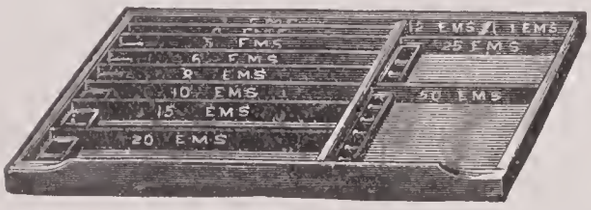


THE BALTIMORE CASE.

This case is our latest contribution to the money-saving devices for the benefit of the job printers of the country. It is a case that will contain a 25-lb. font of type and a 10-lb. font of Brass Leaders to match, all in one compact case.

Brass Leaders are bought by practical printers from motives of economy. They are as much a part of the font as quads and spaces, and are *not* economical if not in the same case with the type. This is the first successful attempt to bring them together without impairing the usefulness of the case.

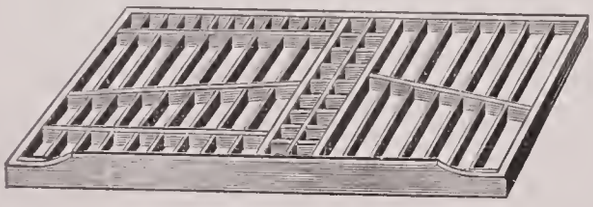
Price, each..... .. ..$1.25



METAL FURNITURE CASE.

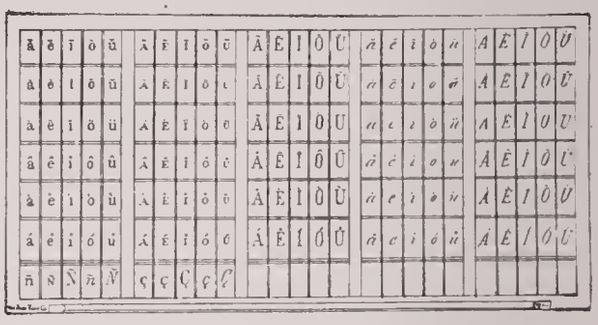
For very small fonts of metal furniture these cases have proved useful and handy. We keep them in stock, but for all large fonts we recommend the racks shown elsewhere.

Price, each.....$1.25



FULL SIZE RULE CASE.

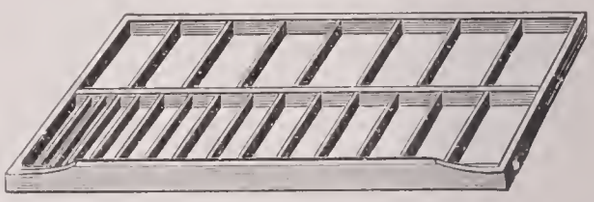
Price, each.....$1.15



ACCENT CASE.

A complete accent case in every particular. It is so simple that a boy can learn it in a few minutes. It holds every accent ordinarily made by type founders, both roman and italic.

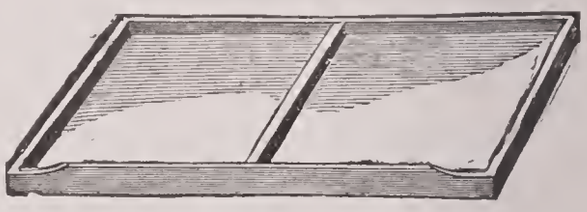
Price, each.....$1.20



OLD STYLE LEAD CASE.

This old-fashioned lead case is still occasionally called for, on account of its cheap price. We recommend the racks shown elsewhere, but will fill orders for these cases on demand. They are arranged for holding lengths of labor-saving leads from 1 to 26 pica ems.

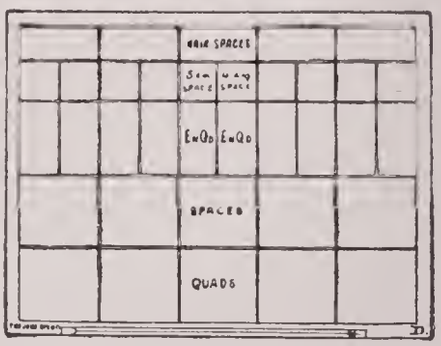
Price, each.....$1.00
Express charges from factory added.



BLANK CASE.

For keeping electrotypes or small jobs. It can also be used for wood type.

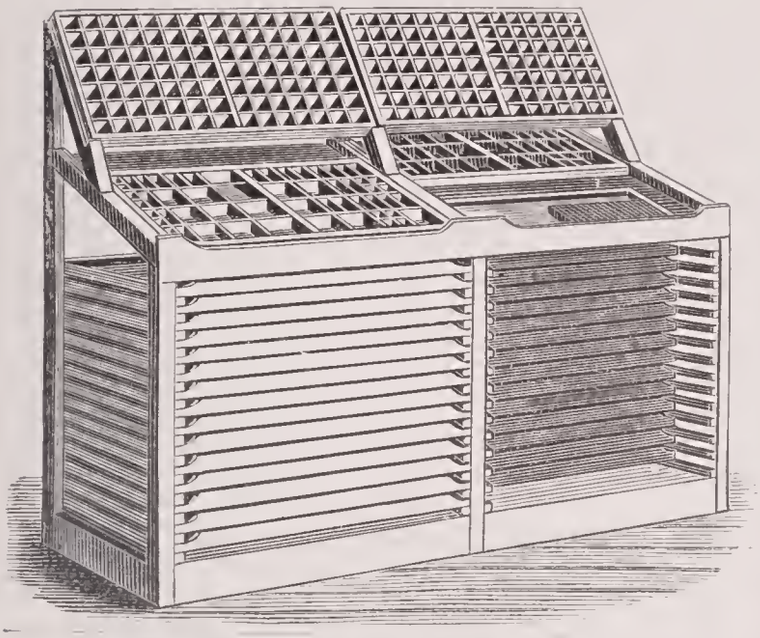
Price, each.....65¢



TWO-THIRD QUAD AND SPACE CASE.

A new case, specially designed for our "54 Case Maryland Triple Stand." It can be used anywhere in an office.

Price, each.....75¢
Express charges from factory added.



DEARING CITY BOOK STAND.

This model Book Stand was originated in 1873, and is now extensively used all over the country.

The top lower cases slide back readily, giving easy access to galley for emptying or distributing matter. The upper top cases are brought forward several inches nearer the hand, making composition easier and ensuring rapidity.

Stand to hold 34 full-size cases, with 2 galley shelves..... $8.00

This Stand, although called "Book," is very convenient and suitable for other branches of the printing business where space is to be economized.

The cases may be arranged to be used from the rear.

MADE ONLY TO ORDER.

All the other Cabinets are finished on the natural wood, and are given a high polish wherever susceptible of it. All have bronzed pulls, moulded panels and cherry-filled cases. Their superior cannot be found in the market.

PROJECTING-FRONT STAND WITH OUTSIDE RUNNERS.

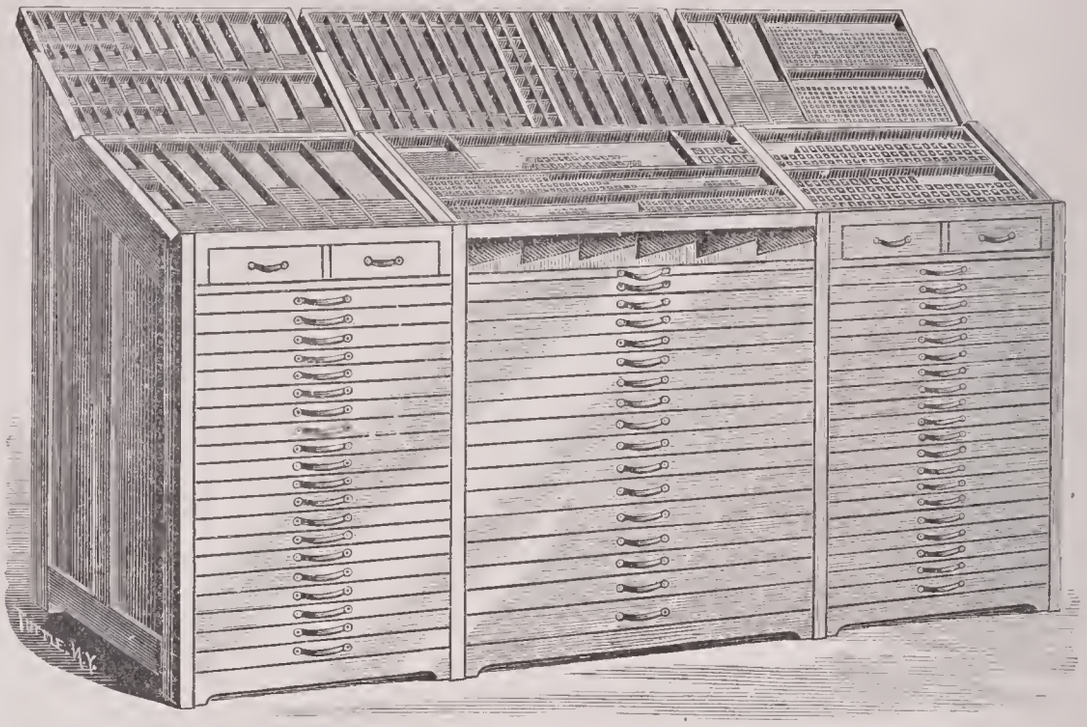
This Stand allows a gaining of 16 cases for every extra stand put in an "alley" or line. On the two adjoining ends the runners can be utilized for a single or double galley cabinet.

It makes an office compact, lessening the labor of compositors. Cases arranged and drawn out from either front or back. Price each, $9.50.

CASE BRACKETS.

For use on any style of Flat-top Cabinets, etc.

Price, per pair, $2.00.



THE ECONOMIC CABINET.

THE ECONOMIC contains, on the left, 2 copy drawers and 20 two-third job cases; in the centre, safe receptacles for 6 brass galleys and 16 full-size job cases; on the right, 2 more copy drawers and 20 two-third job cases; on the left upper surface are subdivisions for labor-saving leads of various thickness from 4-ems Pica up, and on the right are spaces for the larger display type, face up, both of which are sunk sufficiently to admit of putting up a pair of cases, left and right, without injury to their contents, and in the centre upper surface there is every convenience for labor-saving rules, combination borders, ornaments, etc., and standing galley room.

This cabinet occupies a space of 3×8 feet, and embraces the necessary stands, cases, cabinets, galley racks, etc., for an office which, with ordinary furniture, would require a room 15×20 feet.

Price, in cherry, including 60 cases mentioned	$120.00

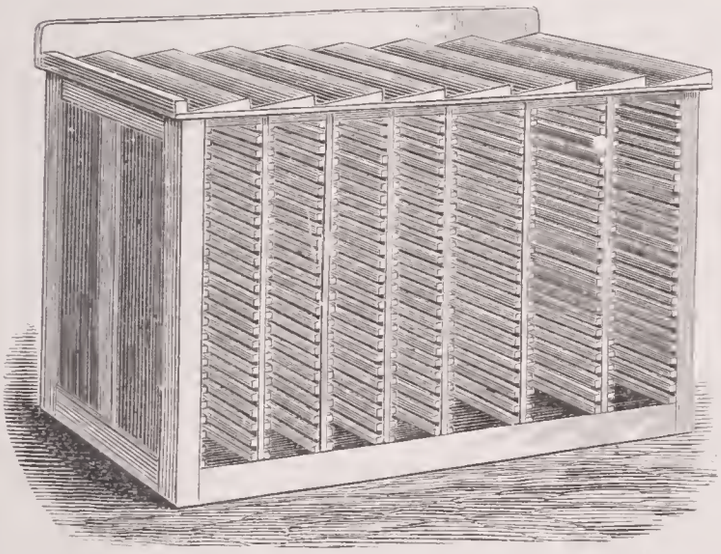
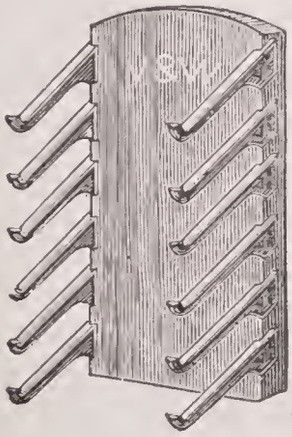
THE SPENCER GALLEY CABINETS.



THE IMPERIAL GALLEY CABINET.

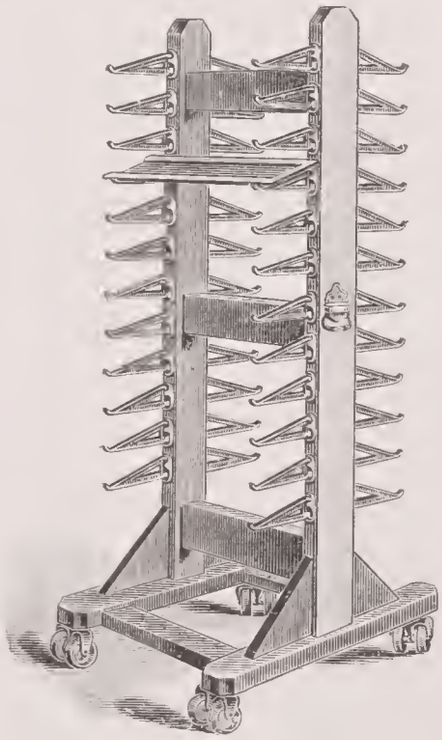
Made to fit and hold any size and number of galleys, from 50 up to 300, only to order. Prices much less than usual styles. Estimates furnished. Tops fitted with the Dearing All-Brass Standing Galley if desired. Offices having a large number of galleys will find our "IMPERIAL" Galley Cabinets far superior to any galley racks.



Quite a variety of styles of iron arm galley racks are made, the one here shown being the least expensive. The brackets have a firm bearing against the angle of the wooden frame and are held in place by lugs or screws, making a strong, durable rack.

To hold 6 galleys.... $3.00
" 8 " 4.00
Racks to hold 10, 12, 15, 20 or more galleys, at a uniform price of 50¢ per pair of arms.
Brackets, per pair..... 40¢

IRON-ARM GALLEY RACKS.



ROLLING GALLEY RACK.

This Rack is a novelty in every way. It is made of seasoned material, stained cherry and varnished. It is mounted on the new patent Giant Direct-Bearing Casters, which cost $1.75 per set; and the Brackets—12 pairs on each side, 24 pairs in all—are the celebrated Reversible Galley Brackets.

Price complete, as shown in cut, $25.00.

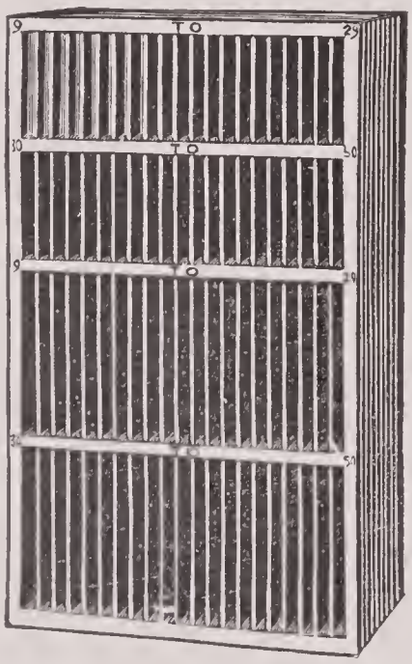
Imposing stones must be in the best light, and if an old-style stationary galley rack is used, and is at all conveniently placed near to the stone, that much more of the most valuable space is taken up. On the other hand, the Rolling Rack, when not in use, can be stowed away in any otherwise unavailable space.

LABOR-SAVING WOOD FURNITURE CABINETS.

We show below the different styles of Labor-saving Furniture Racks and invite a careful study of the list. Remember, that the most expensive way to buy wood furniture is to get full lengths, cut it yourself, then pile it pell-mell into a drawer, thus wasting more time in handling than several of these labor-saving, time-saving and money-saving Cabinets will cost. The furniture in all our Cabinets is planed perfectly smooth and finished in oil, with the size stamped on end of each piece.

PRICES OF CABINETS, INCLUDING FURNITURE.

CABINET A.—Without partitions; lengths, 10, 15, 20, 25, 30, 40, 50 and 60 ems Pica; widths, 2, 3, 4, 5, 6, 8 and 10 ems Pica; five pieces of each length, or 280 in all	$ 5.00
CABINET B.—Without partitions; same sizes as Cabinet A, with 10 pieces of each length, or 560 pieces in all	8.00
CABINET C.—With partitions separating each size, making 56 compartments in all, and same furniture as in Cabinet B	10.00



THE HANDY REGLET RACK.

This style of Rack is made only for labor-saving material varying in length by single Picas. It is a rearrangement of our Lead Rack in a shape sometimes required by the necessities of the office. It is used from both sides, a long and short length being opposite, so that no room is wasted.

This Rack is designed for four kinds of reglet, cut in lengths from 9 to 50 Pica ems, each size and kind by itself.

There are 6,300 pieces in the Rack, or 150 each of 50 Nonpareil, 38 Brevier, 38 Pica, 24 Great Primer.

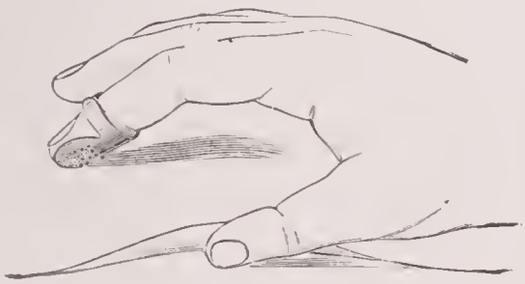
BOOKBINDERS' CABINET.

This Cabinet, especially designed for bookbinders, is sometimes called for by printers. It has flat too and paneled sides.

INK CABINET.

Contains four compartments for storing ink, etc. The top has 18×24-inch marble slab, which will be found very useful for many purposes.

Price, $13



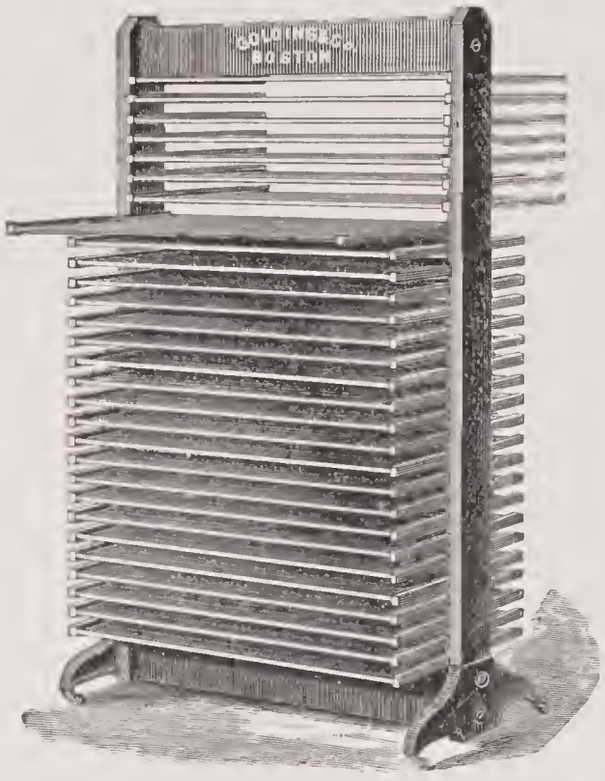
PEERLESS FEEDERS.

This new and much-needed device, for the quick, easy and clean handling of sheets being fed to the press, every employing printer should keep in his pressroom and insist upon its being used by the feeders. Moistening the fingers, or using a rubber shield, soils the sheet, giving the job an untidy appearance, causing much waste of material and consequent expense to the office.

Can be adjusted to size, and used on the fore or middle finger. Put up in neat wooden boxes, and will be sent by mail, postage prepaid, for $1.25 per dozen. Send your order for a box and try them.

ZINC AND BRASS OILERS.

Zinc, 20¢ and 35¢ each. Brass, 35¢ and 60¢ each.



MOVABLE DRYING RACKS.

This has movable racks with narrow slats on which to dry paper when it comes from the press. They are made in two sizes, to take paper 24×36 or 28×42. The racks may be used independently of the frame if desired, being so constructed that when piled one upon another there is considerable space between them. The frame is on casters.

No. 1, 20 dryers, 24×36 inches	$14.00
No. 2, 30 " " "	20.00
No. 3, 20 " 28×42 "	20.00

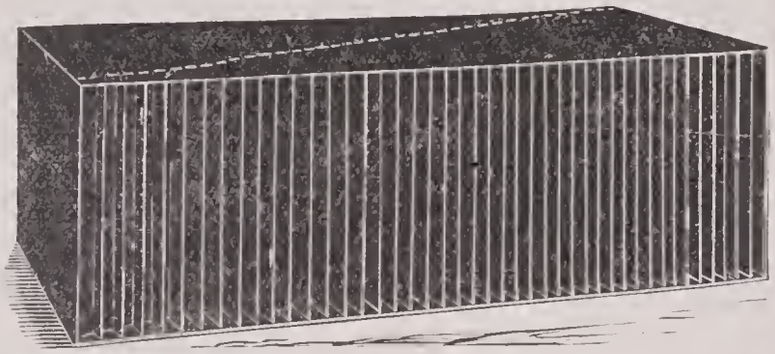
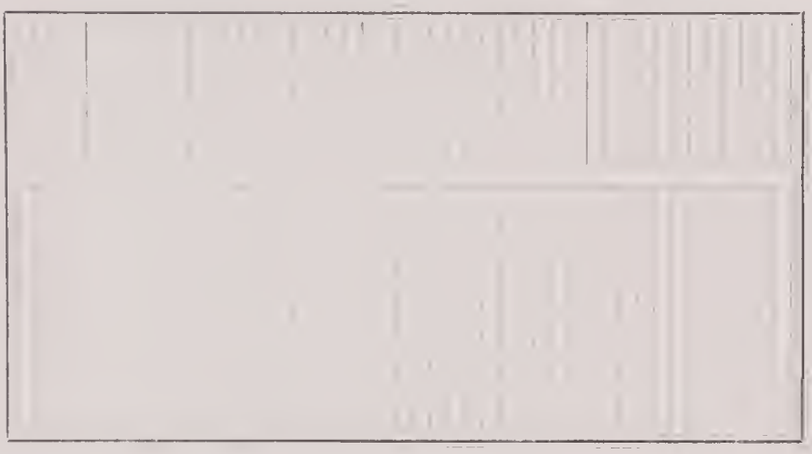
DEARING'S PATENT LEAD RACKS.



DEARING LEAD RACK No. 2.

This Lead Rack is the original of all the various styles now shown in the specimen books and is still the best offered to the trade. It has been in constant use for twenty-five years. The leads cannot fall out nor fall over. It holds leads running from 6 to 50 Pica ems in length and is 18 inches high. This size rack holds about a ton, and a boy can reach every length without moving his position.

Price of Rack, $10.00. Larger sizes made to order.

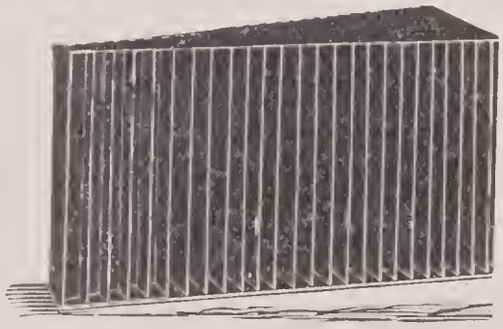


DEARING LEAD RACK No. 3.

The No. 3 Rack is divided into two rows of boxes, as shown in the diagram above; the upper row is 12 inches and lower 20 inches high, inside measure. This makes the Rack measure 18×34×8½ inches, outside, and it holds over a ton. Leads and slugs can be kept separate.

We also furnish labor-saving reglet, sufficient to fill the 12-inch compartment, consisting of 36 pieces of Pica and 72 pieces of Nonpareil, of each length, from 6 ems to 50 ems inclusive, making in all 1,460 pieces.

Price of Rack.....$15.00
Font of Reglet..... 13.50



DEARING LEAD RACK No. 1.

Designed to meet the wants of small offices. Will hold over 200 pounds of leads or slugs, running from 6 to 50 ems in length. Every lead lies flat on its side, and therefore cannot fall over. It is the best style of Lead Rack, without exception, in the world.

Price, $1.25 each.

LEAD RACKS FOR ANY SPECIAL DESIGN PROMPTLY MADE TO ORDER. ESTIMATES FURNISHED ON RECEIPT OF PLANS.

EMBOSSING PUNCH.

For embossing envelope flaps. This tool is made with a compound action, making its operation very powerful. The letters are small and neat, and as they are sunk in copper by steel punches, are very durable.

They are sent out with dies arranged for envelope flaps.

If wanted for the lower edge of a card or circular, the fact should be stated in ordering.

The Maryland Triple Stand.

A NOVEL AND UNIQUE JOB STAND.

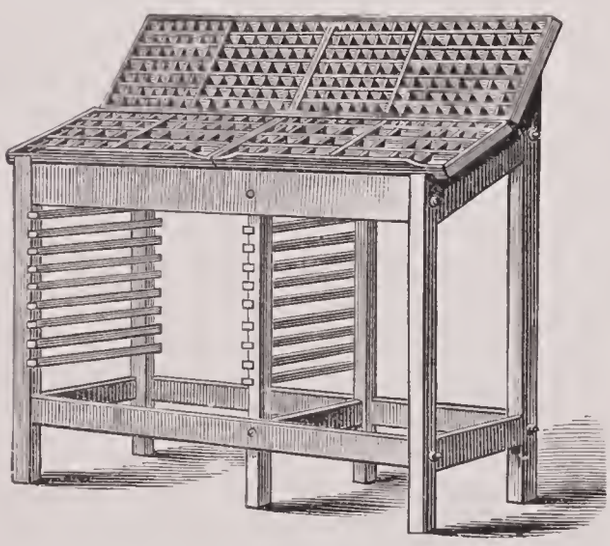
MOST CONVENIENT AND CHEAP CABINET.

DESCRIPTION.

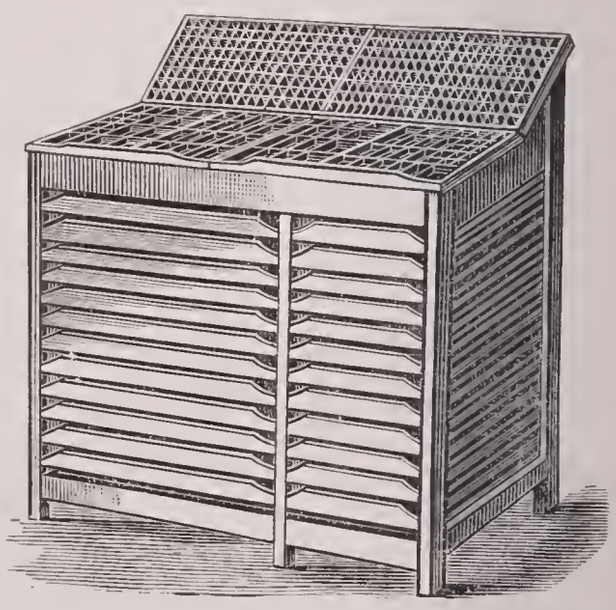
THE MARYLAND STAND has racks for 48 two-third California cases, 2 two-third space and quad cases and allows for 2 pairs on top—in all, 54 cases. The cases go in from the back of the stand, so that while one or two compositors can work without being disturbed, from the news cases on top, job compositors have free access to the fifty cases on the other side. The two space and quad cases accommodate ten sizes of type. The upper runners in the central rack are left vacant and are provided with a pair of our newly-invented suspension hooks, by means of which any case taken from the racks can be placed in convenient position to set from, without stopping, and at exactly the same height and position as if placed on top of the stand. The ends of the stand are paneled. It will be found the cheapest cabinet on the market.

Price of Stand, with paneled ends (practically dust-tight)	$10.50
" " with 54 cases, as above described	50.00
Two stands, with outside runners on one end of each, accommodating 125 cases and occupying 2×14 feet of space, cases included	112.00

These two stands have more than double the capacity of the most favored "economic" cabinets, and at about $25 less cost



NEWS STAND.



No. 2 JOB STAND.

PRICES OF NEWS AND JOB STANDS.

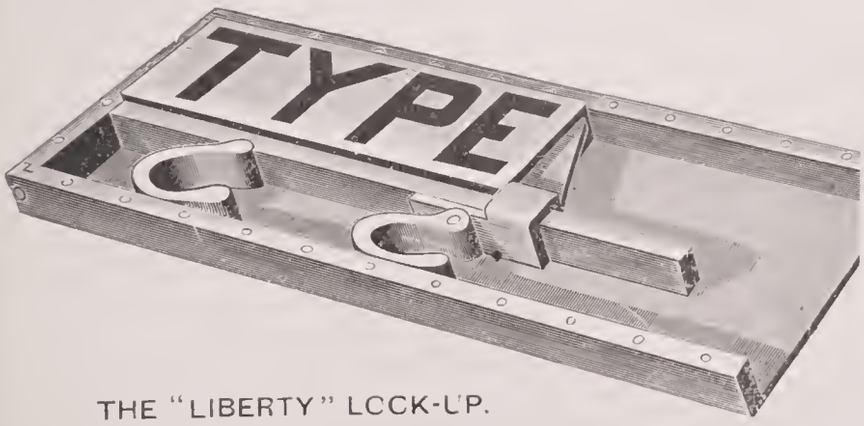
Boxing extra.

BRASS STANDING GALLEY.

Standing Galleys or Batteries, in four foot sections, to fit wooden frames, at a cost of $1.00 per foot, lineal measure of column. Thus, a 5-column battery, each column eight feet in length, would cost $40.00. An 8-column battery, eight feet long, complete with stand and racks for 16 full-size cases, will cost $70.00, against $84.00 and $99.00, the prices of other manufacturers.



THE "LIBERTY" LOCK-UP.

This device does away with quoins, side sticks, shooting stick and mallet. Is complete and secure, and cannot get out of order. Is always ready for use, and neither water nor acid has any effect on it.

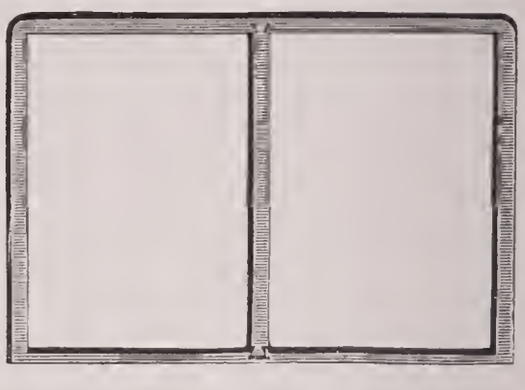
Fits any size galley.

Price, each..... $1.50

WROUGHT IRON CHASES.

TWIN CHASES.

This style Chase is used for all folio papers. They are guaranteed true and well made.



TWIN CHASES WITH BARS.

This cut represents but one Chase of the pair. It is the style to use for all quarto papers. The cross bars are not removable. All our Chases machine-finished, and are flat and true.

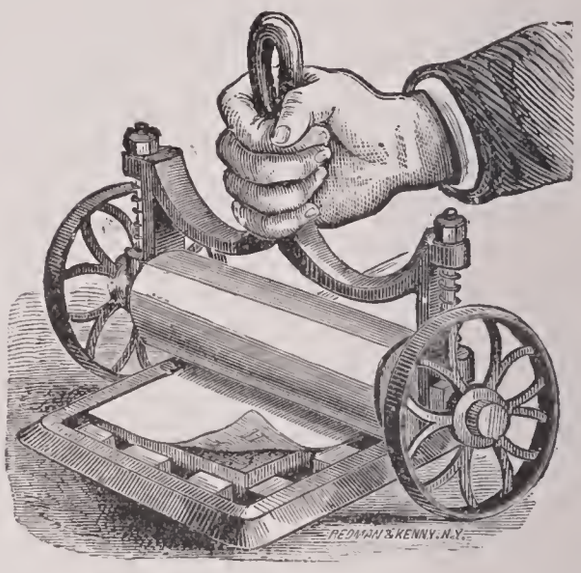
PROOF PRESS.

Thoroughly Braced, Strong and Durable.

No. 1, with Iron Frame, bed 10×31 inches....$30.00
No. 1, without frame, " " " 22.50
No. 2, with Iron Frame, bed 16×31 inches.... 42.00
No. 2, without frame, " " " 30.00

Each furnished with extra large and heavy roller neatly covered with best felt blanket.

Both are thoroughly constructed, are strong and substantial, with no part to regulate or get out of order; angle irons, attached to each end of frame door, act as brackets when it is open, and as catch when it is closed. The frame is of iron; the closet is of walnut, very handy for roller, ink and paper.



PROOF ROLLER.

On examination this Proof Roller will be found to resemble the ordinary brayer roller, with this difference—it operates on wheels. The wheels, with a spiral leverage, raise the india rubber impression cylinder a little over the proper height for taking an impression from a galley, which is supposed to be lying flat upon an imposing stone or an ordinary table. The spiral springs yield to the pressure as the roller passes over the type, taking a perfectly legible proof. A pair of thumb screws make allowance for the difference in thickness between brass and wood galleys or no galley at all. It is equally applicable to a job locked up in chase or tied with string. Size, 9 inches between wheels.

Price, complete, $5.00.

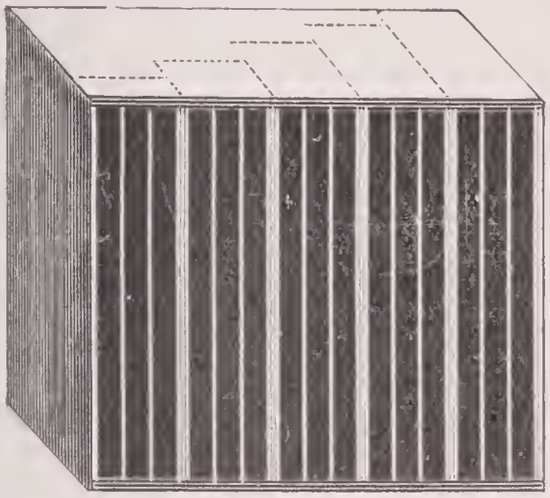
METAL FURNITURE RACKS.



QUOTATION FURNITURE RACK No. 1.

This Rack will hold a 50-pound font of Quotation Furniture, giving a box for each size. There are five lengths, and three boxes for each length, as 2×1, 3×1 and 4×1. The lengths are 4, 8, 12, 16 and 20 Pica ems, and widths 2, 3 and 4 ems. This style is considered by practical printers to be the most economical and handiest of any metal furniture made.

Price of Rack with 50 lbs. furniture	$15.50
Rack without furniture	3.50
Sorts of this furniture, per pound.....	.30

2 × 4	2 × 8	2 × 12	2 × 16	2 × 20
3 × 4	3 × 8	3 × 12	3 × 16	3 × 20
4 × 4	4 × 8	4 × 12	4 × 16	4 × 20

Quotation Furniture Rack for 100 lbs. Size 36×7×4 inches outside, and it will hold about 300 pieces. A separate box for each size, front flush and smooth and marked on top and bottom the lengths, and on side the widths. Racks on the same principle can be furnished to hold 200 pounds.

This is one of the several styles of Racks for leads, wood and metal furniture, etc., which we show in this catalogue. For our special Racks we claim over others this advantage: the natural law of gravitation acts to throw the material into the correct position, instead of out of it. That is, furniture or the leads cannot tumble down *out of* place; it tumbles down *into* place. Our Racks are examples of "common sense applied to printing offices." It is acknowledged by the trade that we are the headquarters for the manufacture of "Money-saving Specialties," and that our goods are unsurpassed in quality and finish.

QUOTATION RACK No. 2.

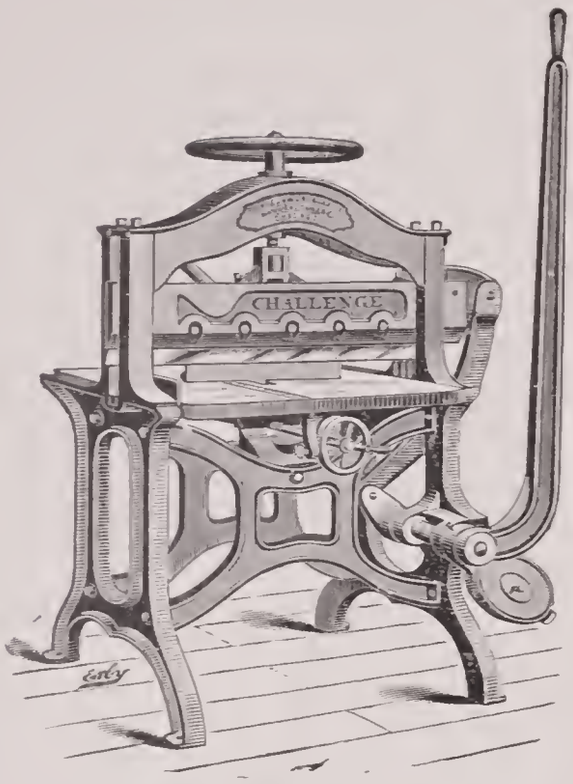
IMPROVED METAL FURNITURE RACK.

This cut shows front elevation, and plan of laying the font, of one of our Racks for holding 100-lb. font of Improved Metal Furniture. The size is 42×11×8 inches, and each box will hold six pieces of each length, making the Rack contain 318 pieces, and a separate box for each of fifty-three sizes. The plan of laying will be found consecutive and natural, and is readily learned at a glance. The face of the rack is square, the back of each section being set in so as to allow each length to be flush with the front. Each piece lies on its side and the size is easily seen. The length is marked on each section at top and bottom, and the width on each side. The up and down sections are all of one length, and the cross sections all of one width. It is the most compact arrangement that can be devised for storing this amount of furniture.

Rack, with 100 lbs. furniture.....	$30.00
Rack alone	6.00



THE CHALLENGE.

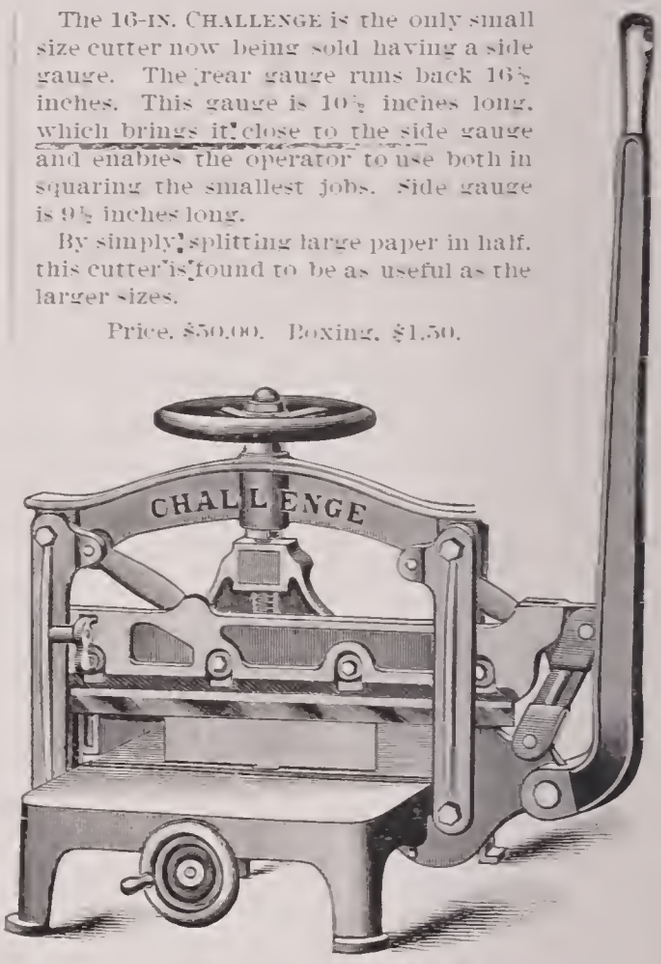
16-inch square cut	$50.00.	Boxing.	$1.50
25-inch " "	125.00.	"	4.00
30-inch " "	175.00.	"	6.00
32-inch " "	200.00.	"	6.00

THE CHALLENGE Paper Cutter is built in the very best manner, and utmost care has been exercised in the construction of all parts, so that the highest degree of strength, accuracy and convenience may be obtained; and these three points are the essential qualities of a good lever cutter, adapted to varied uses of a printing office.

The 16-IN. CHALLENGE is the only small size cutter now being sold having a side gauge. The rear gauge runs back 16½ inches. This gauge is 10½ inches long, which brings it close to the side gauge and enables the operator to use both in squaring the smallest jobs. Side gauge is 9½ inches long.

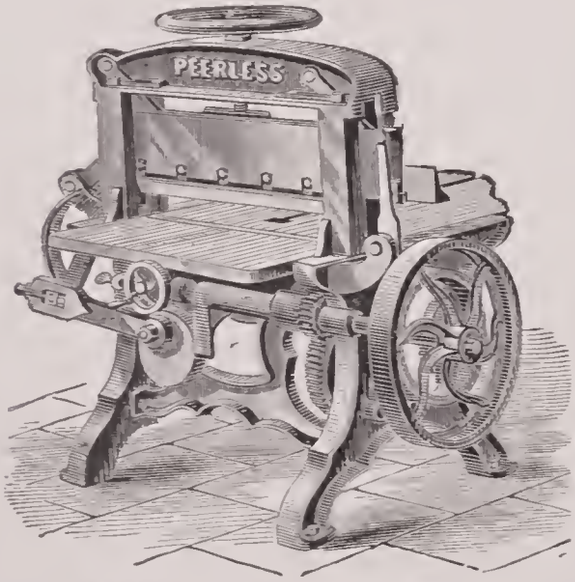
By simply splitting large paper in half, this cutter is found to be as useful as the larger sizes.

Price, $50.00. Boxing, $1.50.



THE 16-IN. CHALLENGE.

A most desirable feature of this machine is the "dip cut." The knife enters the paper at an angle, the forward end being 5-15 of an inch lower than the other; yet when it reaches the cutting stick the knife is exactly parallel with the stick. The cut is thus made much easier than otherwise.

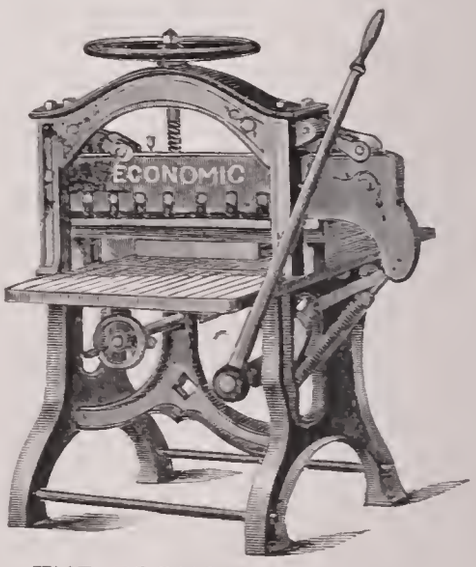


PEERLESS POWER CUTTER.

30-in. square cut.	Price $400.00.	Weight	1,500 lbs.
32-in. " " "	450.00.	"	1,600 lbs.
36-in. " " "	600.00.	"	2,000 lbs.
38-in. " " "	700.00.	"	2,400 lbs.
44-in. " " "	800.00.	"	2,600 lbs.

Boxing, $10.00.

The PEERLESS Machines are well built, powerful and rapid cutters.



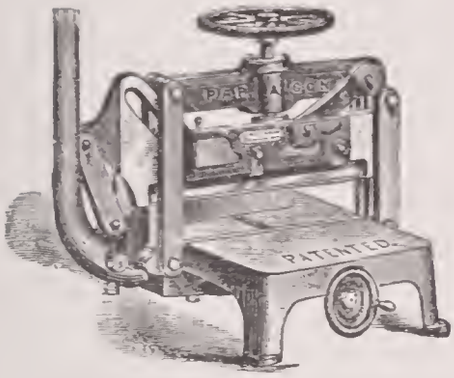
THE ECONOMIC CUTTER

is a very heavy, compact, firm and rigid machine; works easily and smoothly; knife cuts perfectly true; the clamp has free and quick motion; back, side and split gauges and adjustable lever.

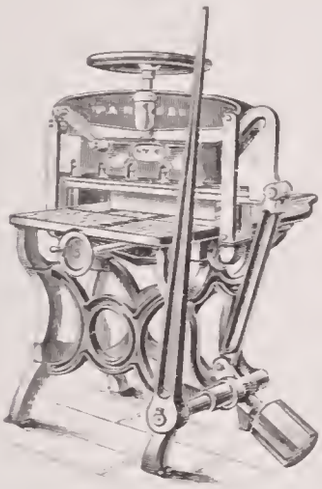
This machine is designed to meet the demand of the small printing offices. It is very simple in construction, yet it is strong, powerful and as well built as any higher-priced cutter.

24-inch Cutter	$115.00.	Weight.	575 lbs.
30-inch "	150.00.	"	650 lbs.

THE PARAGON CUTTERS.

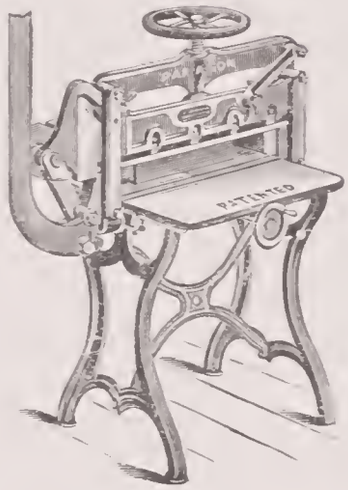


14-INCH LEVER.
Price, $ 45.00. Weight, 200 lbs.
Squares 14 inches; cuts 2½-inch thickness paper.



30 AND 32 INCHES. FRONT LEVER.

30-inch Front Lever,	$ 175.00.	Weighs	1,000 lbs.
32-inch " "	200.00.	"	1,200 "



22½ AND 25 INCHES. END LEVER.

22½-inch End Lever,	$ 80.00.	Weighs	450 lbs.
25-inch " "	110.00.	"	550 "

The 22½ in. machine cuts 3 inches, and the 25 in. cuts 3½ inches thickness of paper or cardboard.

THE PARAGON Lever Machines are well built, powerful and rapid cutters, fitted perfectly in all their parts, and of ample strength to bear any strain that may be placed upon them. They cut cardboard and paper perfectly true and smooth. The full cut is made by one stroke of the lever.

They have also that valuable feature of THE PARAGON, the ability to gauge very narrow jobs, as the traverse gauge can be set to three-fourths of an inch of the knife. The peculiar motion of the knife which makes the cut so easy is used on all sizes and is protected by patent.

PEERLESS FRONT LEVER.

30-inch square cut	Price,	$ 175.00
32-inch " "	"	200.00

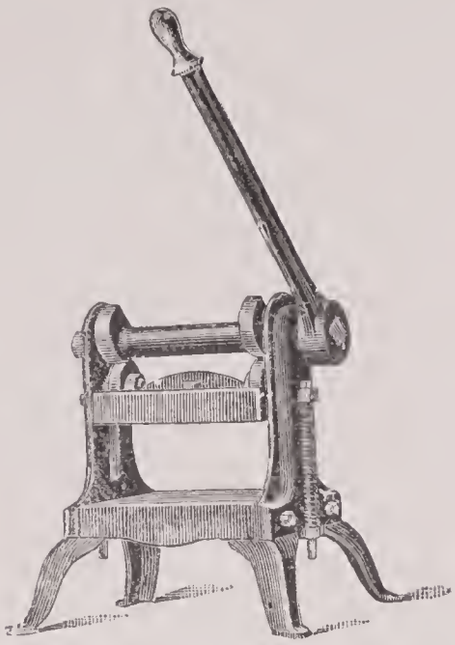
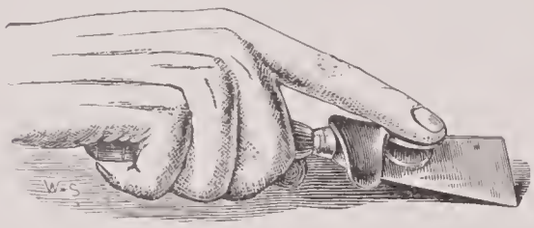
32-inch " "	"	225.00

Boxing, $ 6.00.



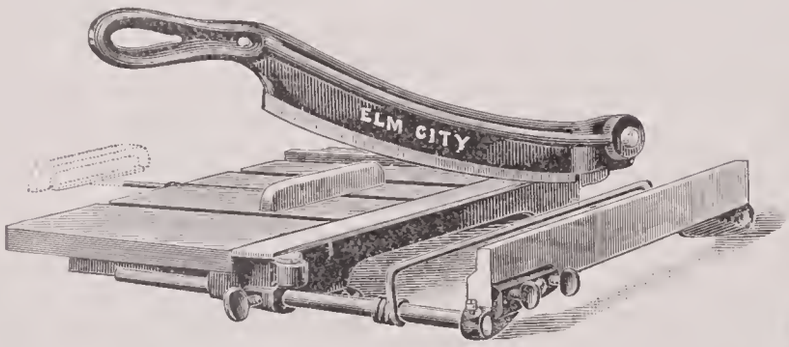
LITTLE GIANT LABEL CUTTER.

A good machine for cutting all kinds of labels with dies. It is strong, accurate and simple. It can also be used as a letter-press. Price, including a long handle, $35.00.



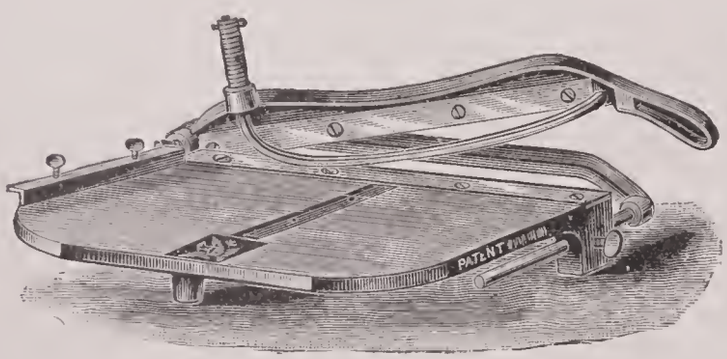
ST. JOHN PAPER KNIFE.

Made of fine steel and suitably pointed for cutting paper. Upon the back of the blade is fixed a broad guard, shaped to fit the finger, by which the operator is enabled to cut much faster and easier than with the common knife. Price, 50¢ each.



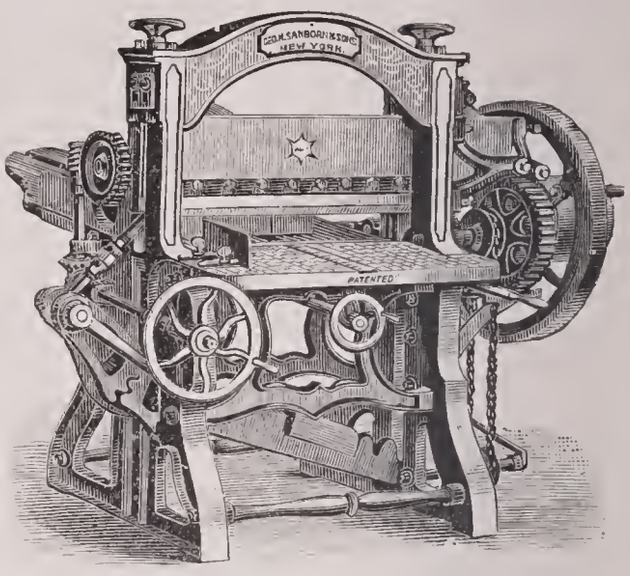
ELM CITY CARD CUTTER.

The blade of this cutter is 12 inches long, but a full sheet of cardboard can be cut upon it. It is a good machine. Price, $12.00.



THE EAGLE CARD CUTTER.

The Automatic Binding Clamp on this machine is a new device to hold the sheet firmly. 24½-inch steel blade and solid iron bed. Cuts 24½ inches. Price, $12.00.



THE "STAR" CUTTER.

A heavy, strong, powerful and strictly accurate machine. The construction is simple and of the most substantial kind. After the cut is made the knife runs back automatically, and is almost in an instant ready for another cut. The table has brass measuring rules set in front and back, parallel lines marked on the back, and the same marked in half inch squares on the front.

34-inch.,	$600.00.	Weight,	1,000 lbs.	Boxing	$10.00

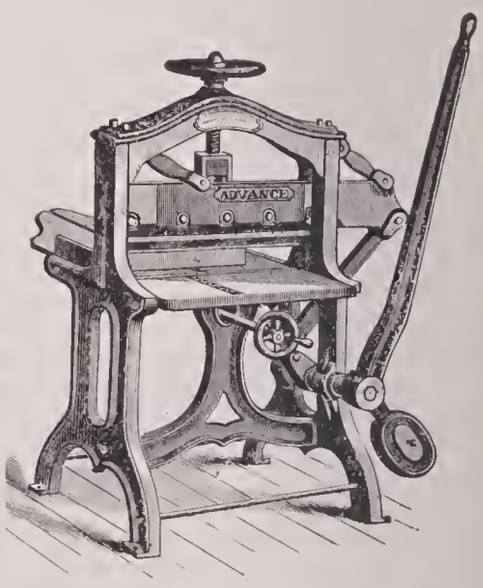
44-inch	900.00	"	1,000 "	"	15.00
48-inch	1,100.00	"	1,000 "	"	20.00



THE ADVANCE PAPER CUTTER.

The ADVANCE Paper Cutter is intended to meet the wants of printers and others whose business demands a lever cutter, but who cannot as yet afford a high-priced machine. It is built with the strictest mechanical simplicity, in order to bring the price within reach, and yet no essential quality is sacrificed that is required in a cutter designed for general use in a printing office. It is, beyond all comparison, the best cheap lever cutter in the market. It is strong, has powerful leverage, and has no gears or springs to wear or get out of order.

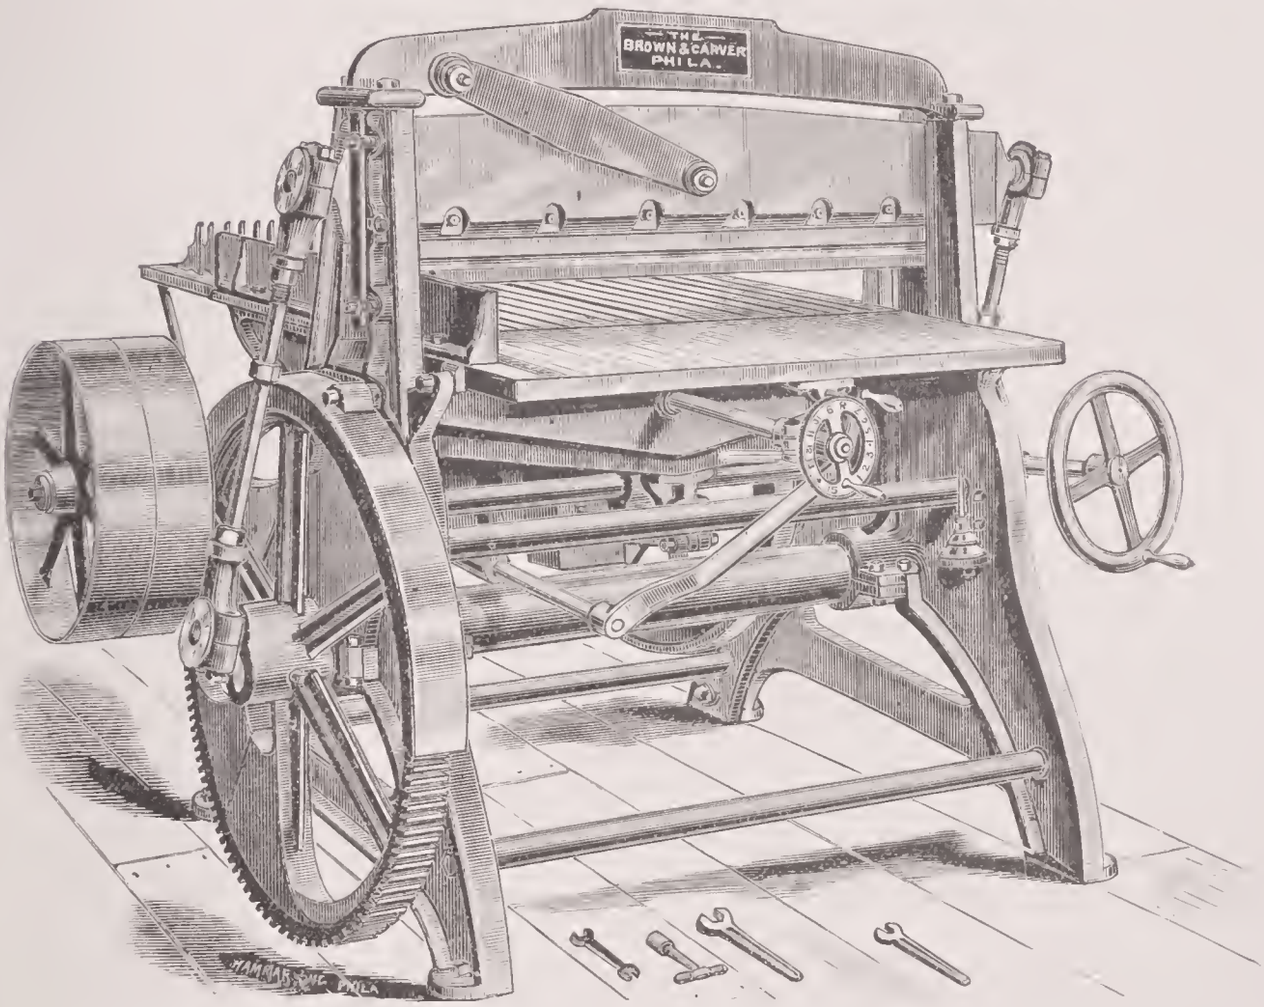
These machines, over 22½ inches, are now made with interlocking gauge, by which paper can be cut to within half inch.

22½-in.,	$90.00.	Weighs	575 lbs.	Box'g	$2.00
25-in.,	110.00.	"	675 "	"	1.00
30-in.,	165.00.	"	975 "	"	5.00

THE BROWN & CARVER

PAPER CUTTER.

THE BEST AND MOST RELIABLE IN THE MARKET.



34-inch square cut	Price,	$575.00
38-inch " "	"	700.00
44-inch " "	"	885.00
50-inch " "	"	1,200.00
56-inch " "	"	1,500.00

These cutters are unquestionably the best in every respect of all power cutters manufactured. They are unequaled for durability, excellence of construction, accuracy of work, rapidity of movement, and are in every particular the most reliable machines in the market. Their peculiar construction and perfect adjustment make them the strongest and most powerful machines in use.

We would respectfully call your attention to the following points of superiority, which are wanting in other cutting machines:

Superior proportions and construction of frame, giving vast strength and solidity without excess of metal.

Superior manner of hanging and adjusting knife bar, thus relieving head or top of frame from undue strain during the cut, allowing easy and accurate adjustment of knife from either end.

Superior arrangement of table, having slots or grooves for the traverse gauge to move in, thus preventing paper becoming wedged between the bottom of gauge and table.

Superior arrangement of the clamp and traverse gauge in combination—construction is such as to permit stock to lie cut to last half inch, thus effecting great saving in paper and facilitating the cutting of small work.

Superior position of clamp wheel, enabling the operator to clamp stock rapidly without stopping.

Adjustable side gauges, front and back of clamp, facilitating the handling and cutting of small work.

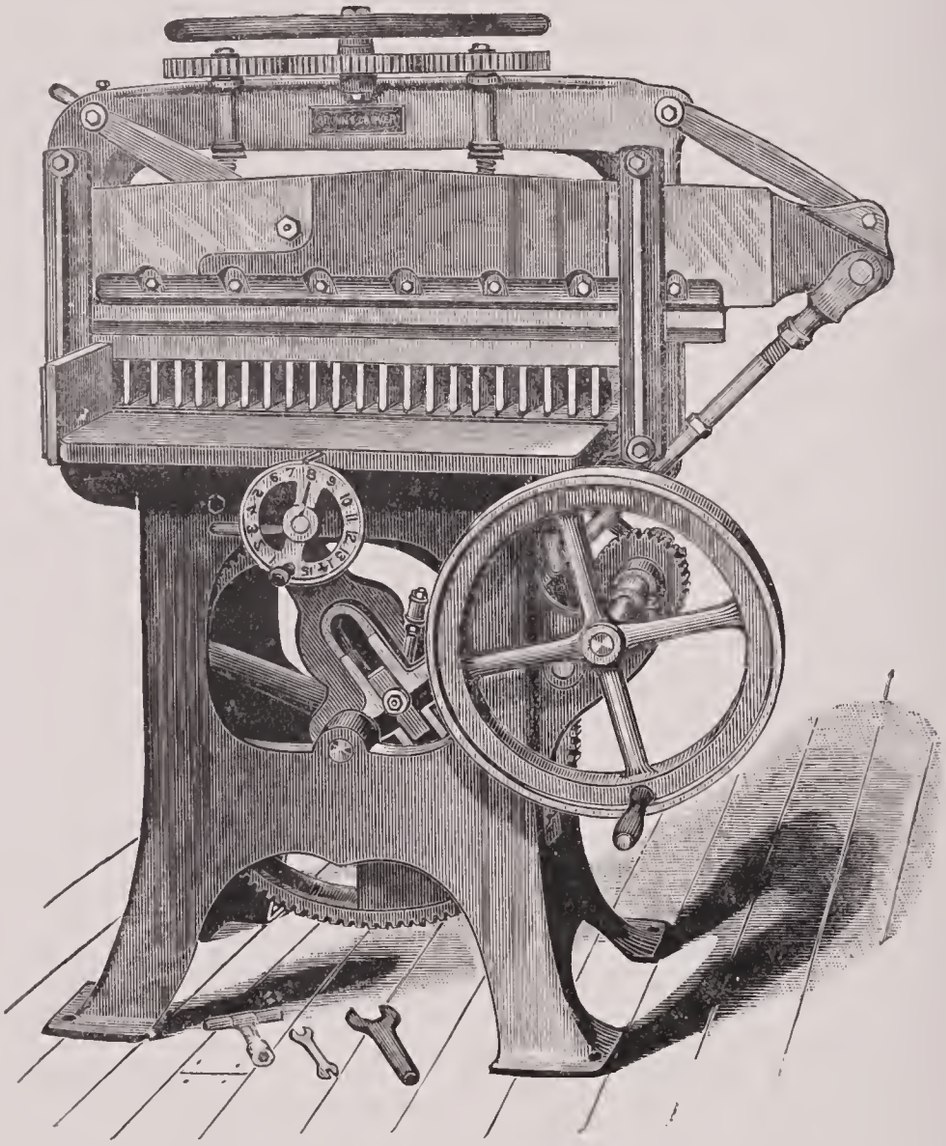
Simplicity of machine—no traps or springs of any kind; all parts are easily accessible.

Noiseless friction clutch for starting and stopping the machine, easily and without any jar, whereby a greatly increased speed is obtained without endangering the machine.

JOHN RYAN FOUNDRY, SOUTHERN AGENCY, BALTIMORE, MD.

THE CARVER.

A New Hand-Power Paper-Cutting Machine.



Size, 33 Inches. Weight 1,700 Lbs. Price, $300.00.

This is the quickest and most powerful Hand-power Paper Cutter ever made. We have them working in Baltimore offices, where they can be easily explained.

It is in no way inferior or deficient to the renowned steam-power Cutter known as the Brown & Carver.

It is a New Design! It has a New Name! It is a New Cutter!

The machine has a pedestal base, to which are strongly bolted the upper frame and table, making a solid foundation for cutting. In addition to this admirable feature, it has the Grooved Table, which allows the bottom of the gauge fingers to move in grooves about 1-32d of an inch below the surface of the table, preventing the sheets of paper being wedged between the table and gauge.

It has the Interlocking or Close Gauge, allowing the stock to be cut to the last half inch, which is most valuable in cutting labels, cards and small work.

It is the only paper-cutting machine having a mechanical appliance for changing the speed and power. The gears for transmitting power are so arranged that, by a simple movement of the lever, you can increase the speed and decrease the power adaptable for small work, or decrease the speed and increase the power adaptable for heavy work.

It has the Double Clamp Screw, which insures equal pressure at all points—with the clamp almost parallel with the table.

The large gear wheel is cast from an accurately cut metal pattern, and is driven by a cast steel pinion; all the other gears are cut, giving an easy, noiseless movement when the machine is in operation.

The adaptable construction of this machine renders it adequate to all paper cutting demands.

The Shafts are all steel.

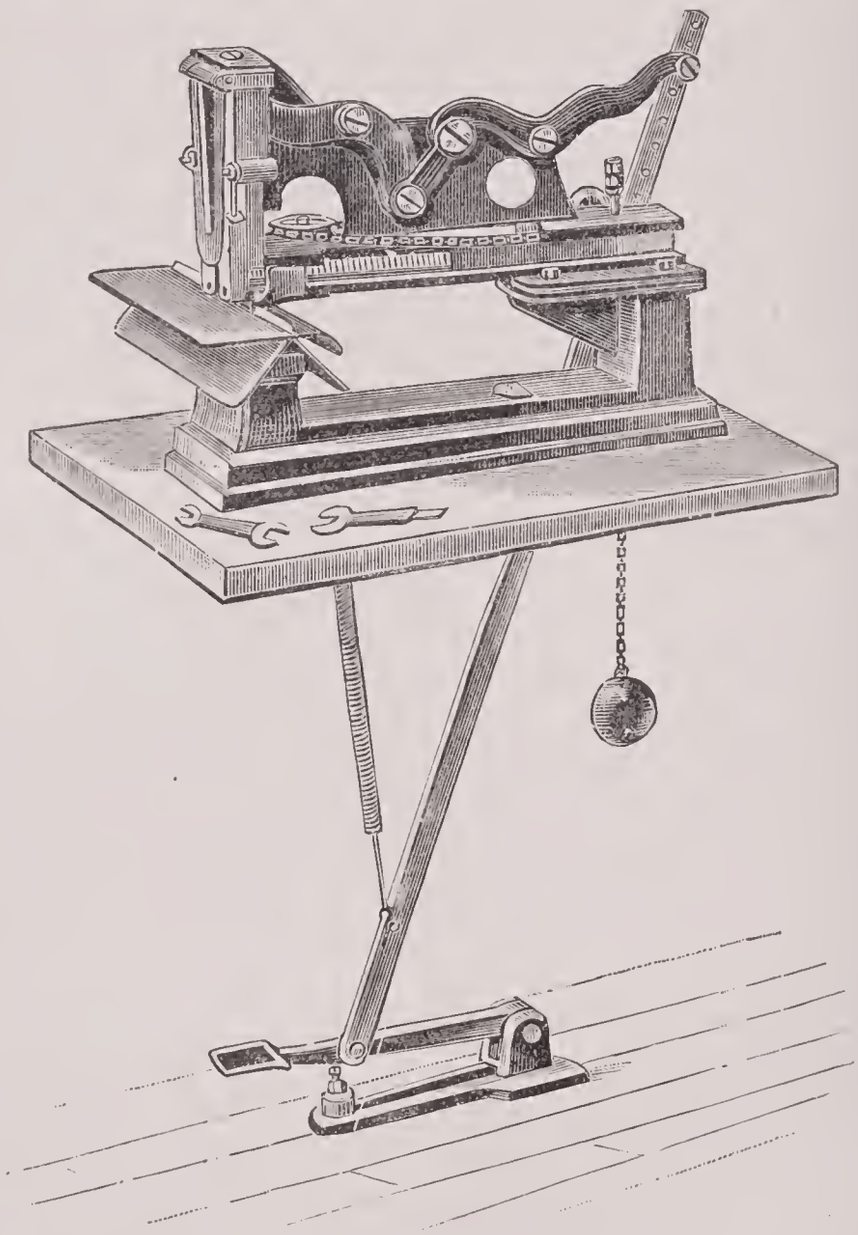
No. 9

IMPROVED BINDER.

Staples used on this Machine are one-half inch wide.



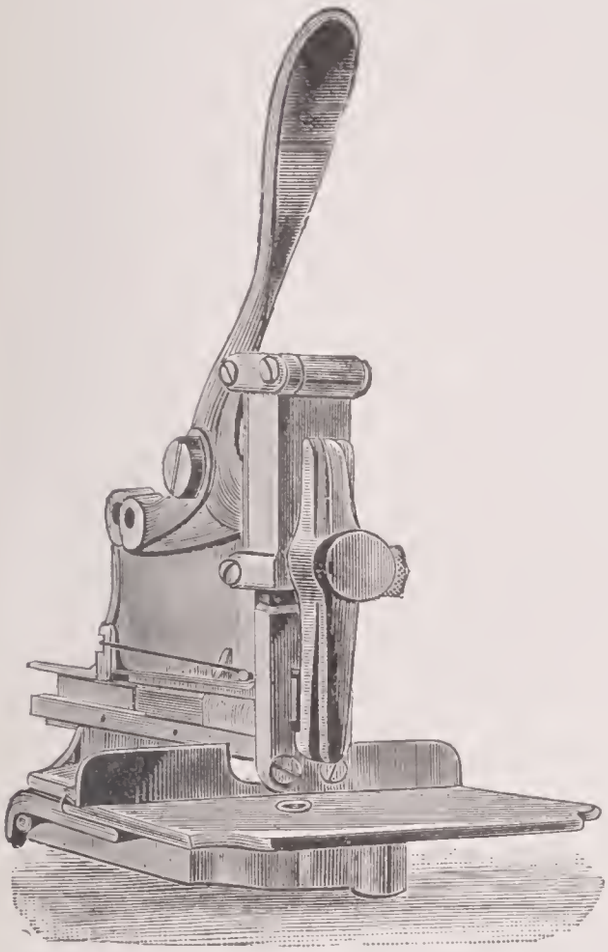
Our new clinching device on this Machine perfects the clinch equal to any high-priced steam-power machine made.

WITH BOTH FLAT AND SADDLE TABLES.

PRICE, WITH FOOT-POWER ATTACHMENTS, FLAT AND SADDLE TABLES COMPLETE, - $36.00.

Staples strung on Wood, in Boxes of 5000 each Size, Price 25 c. per 1000.

SIZES:—No. 2 Staples, 1-4 inch length of Leg.
" 3 " 5-16 " " " "



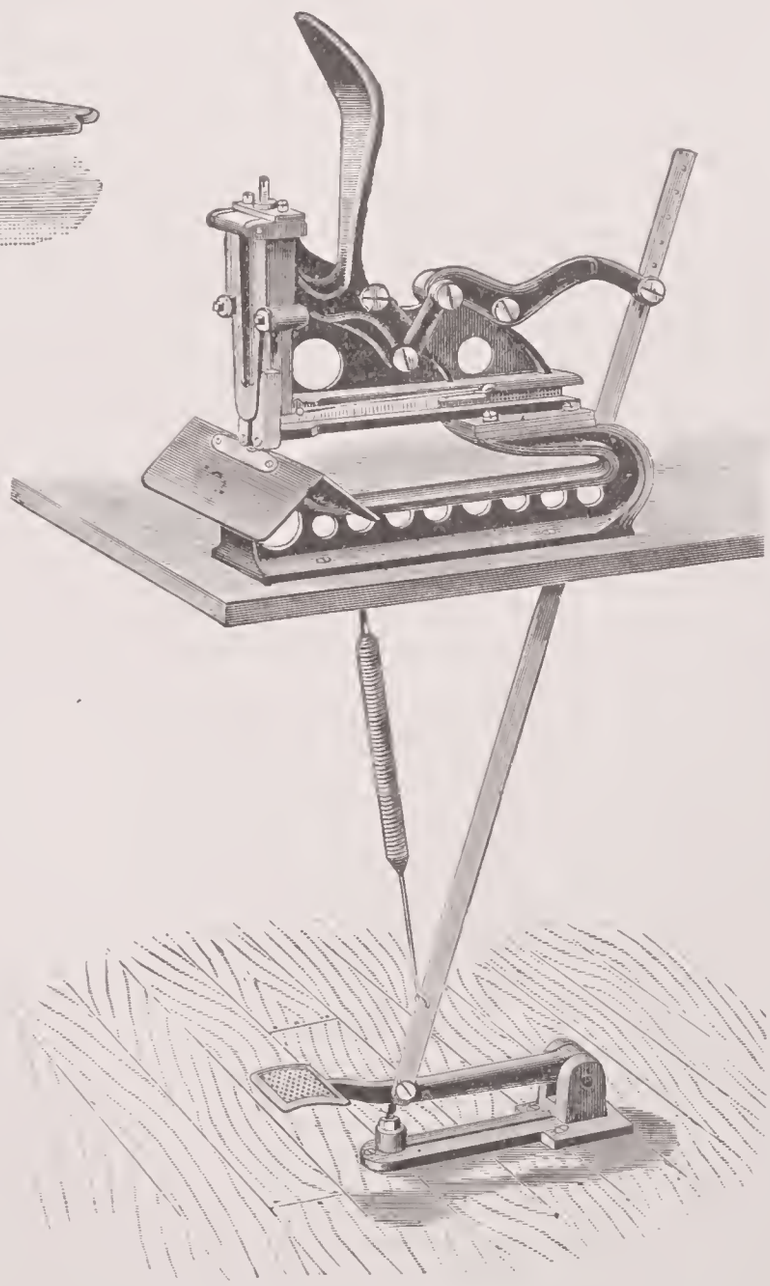
THE HERCULES STAPLE BINDER.

This machine was designed to answer a demand for a Wire Stapler, of considerable capacity, at a low price. It discharges and fastens the staples at one action of the lever. It does its work well, as fast as the operator can handle the sheets, and will bind up to 200 pages. For so small an article our customers find it reliable.

These machines are very thoroughly built, and all the parts are interchangeable. Each machine is charged with staples, and is thoroughly tested before being packed.

Price, complete with foot-power, $ 10.00.

Staples, 5,000 in a box, per M, 25¢.

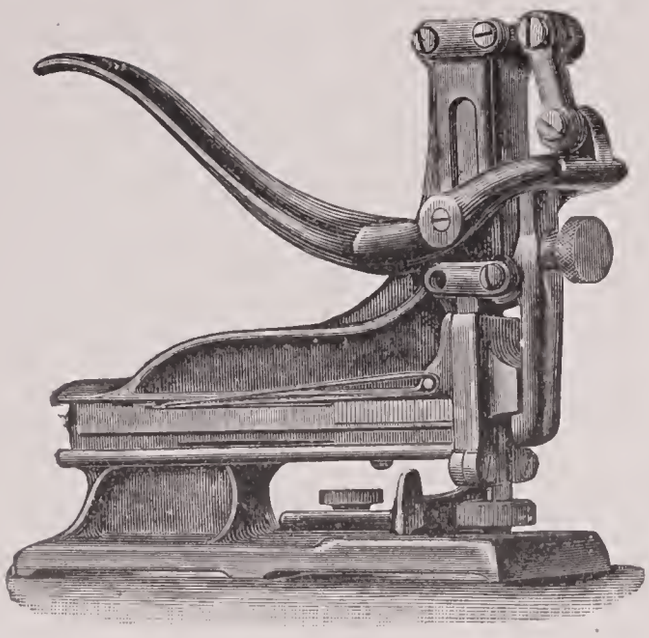


THE SADDLE-BACK STAPLER.

This machine is so constructed that it binds pamphlets of any thickness, under 125 pages, through the fold. The table is Λ shape, inverted, and the sheets to be bound are opened over the Λ, and the staple driven through the fold and then clinched on the inside of the book.

Price, $ 30.00.

Complete with foot-power.



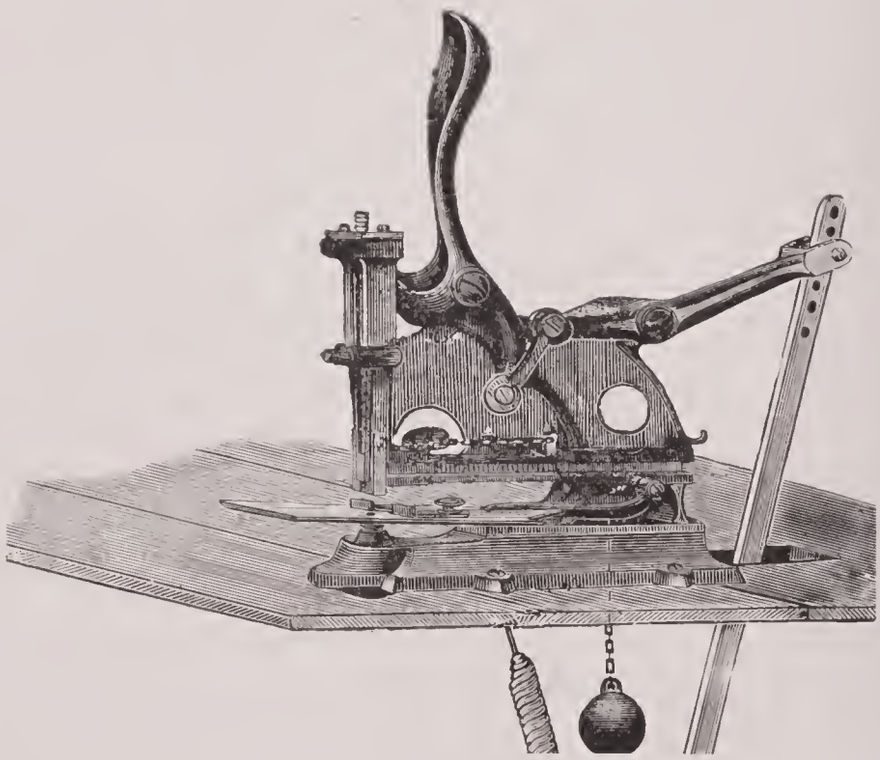
BROWN'S BREECH-LOADER STAPLE BINDER.

A new machine for binding papers of any kind and light pamphlets with wire staples; holds 100 staples at a charge and automatically feeds same so that they may be inserted one by one and then automatically clinched on the under side of the papers.

It is not guaranteed to do the work of the larger machines, nor stand the same usage, and no printer has the right to expect it; nevertheless its capacity is really marvelous. It will bind any thickness, from one sheet to documents, papers or pamphlets of forty or fifty sheets, and do its work very well. It is the best cheap machine in the world.

Price, $3.00.

Staples, in boxes of 1,000, per box 50¢.



BROWN'S LIGHTNING STAPLER.

This machine is complete for foot-power, making it automatic in every way. It is strong, quick and reliable, and is an indispensable machine for printers and stationers. Will bind 200 pages.

Price, complete with foot-power, $21.00.

STAPLES IN BOXES.

Staples are made of the following lengths of leg:

F.....Three-sixteenths of an inch.
G.....One-quarter of an inch.
H.....Five-sixteenths of an inch.
K.....Three-eighths of an inch.

PRICE OF STAPLES.

Put up 5,000 in a box, per M..... 25¢

Always mention name of machine you use when ordering staples.

The H. C. HANSEN

POWER IMPROVED

Pin-Hole Perforating Machine.

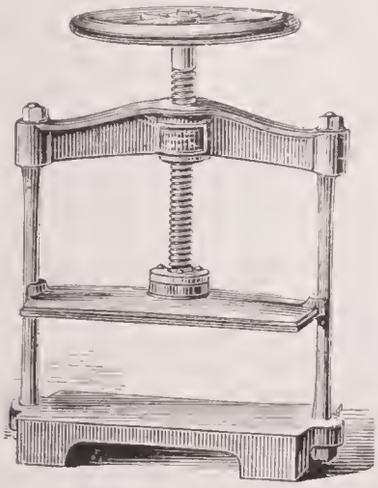
The cut represents the New Pin-Hole Perforating Machine. The manufacturer claims that for durability, strength, and general adaptability to the purposes for which it is intended, it stands second to none, having many advantages over all other machines. It will perforate a sheet 26 in. wide and any desired length.

It consists of two die wheels placed in such a position as to register perfectly, with no gearing to get out of order.

It has a nicely finished table with gauge on side which can be quickly and accurately set at any desired distance from point of perforation.

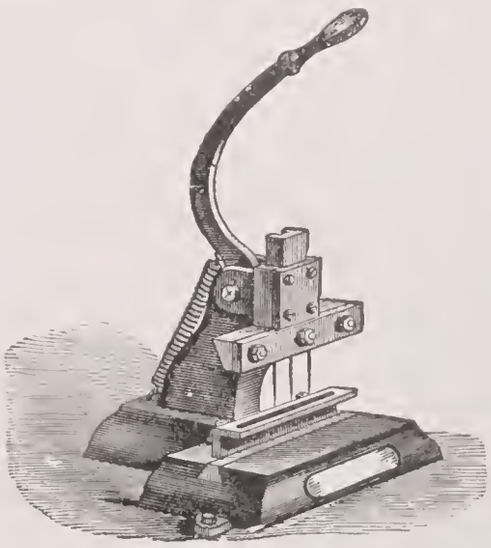
An excellent feature of this machine, and one that will be duly appreciated, is that it does the work in less than one-fourth the time consumed by any other machine, being run by hand or steam power.

Price, $60.00.



HICKOK'S STANDING PRESSES.

No. 0½, platen 16×24, hand $50.00
No. 2, " " lever 100.00
No. 6, " 20½×28½, lever, 6 rods..... 120.00
With pawls, extra. Larger sizes up to 32×50.



HAND STABBER.

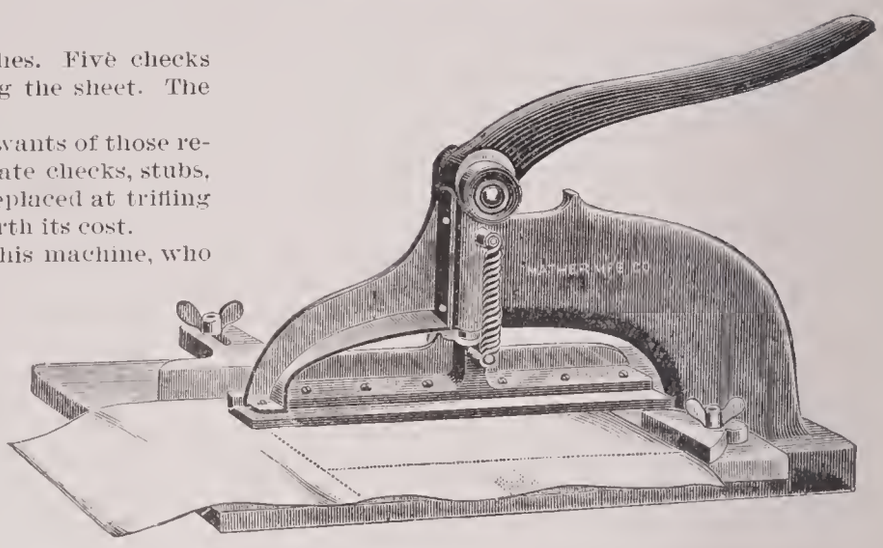
Very useful in pamphlet binding. Price, $15.00
Foot-power attachment, extra.... ..... 20.00
Needles for machine, per dozen 3.00

THE FRANKLIN perforates 10 inches. Five checks can be perforated without turning the sheet. The perforation is round and perfect.

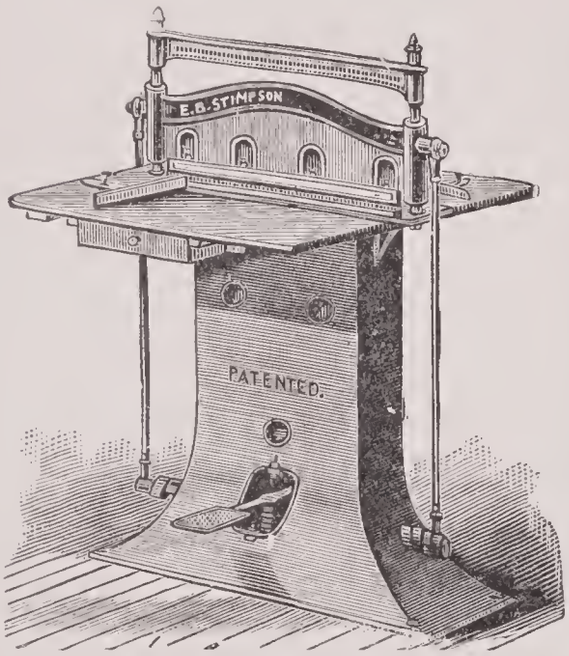
This machine is adapted to the wants of those requiring a small machine to perforate checks, stubs, labels, etc. The needles can be replaced at trifling expense. It is a machine well worth its cost.

It will pay any printer to buy this machine, who prints checks, clothing tickets, price marks, and other matters requiring separation. There is a great variety of work which the small printing office can do with the aid of this machine which would otherwise go to the larger offices. With ordinary management the machine will pay for itself in a few months.

Price, $35.00.

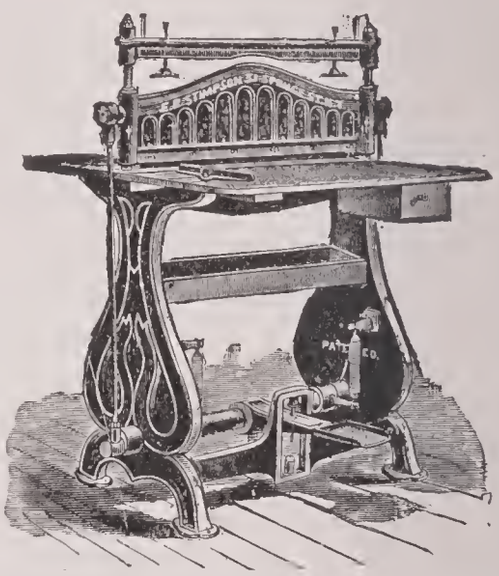


THE FRANKLIN HAND PERFORATOR.



STIMPSON'S PERFORATOR No. 1.

Perforates 20 inches. Price, $150.00.

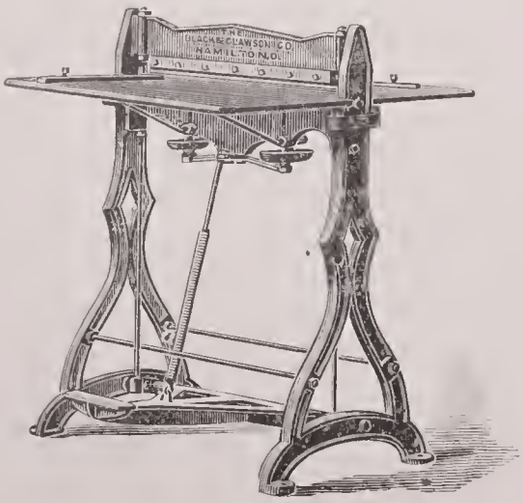


STIMPSON'S PERFORATOR No 2.

Two sizes. 25 and 30-in. Perforators.

No. 2, 25-inch Perforator	$225.00
No. 2, 30-inch "	300.00

These Perforators are first-grade machines. They are carefully constructed, and of sufficient weight to insure strength and durability. Tables are of walnut, with the most improved adjustments front and back, to gauge and square the work. The shafts are of steel, 2½ inches in diameter. The punch-plate and stripper are also of steel, and the die of the finest quality of hardened steel.



BLACK & CLAWSON'S PERFORATOR.

These machines give perfect satisfaction. They are well made. The perforations are round, similar to those made in postage stamps. The punch-clamping device is so arranged that any number of punches may be removed to give any length or position of rows of perforation, or any length of stub.

We recommend these machines as thoroughly reliable All sold by us have given every satisfaction.

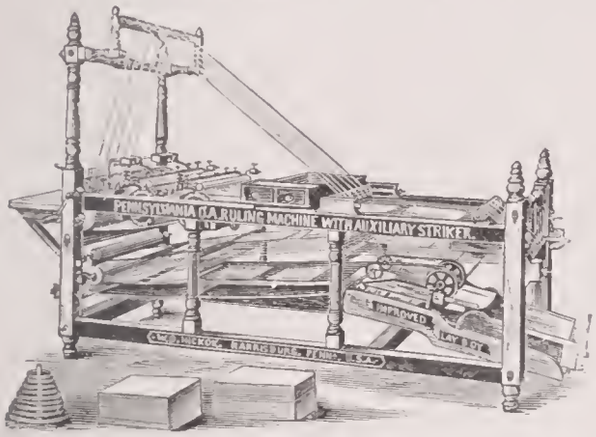
BOOK BINDERS'
MACHINERY AND SUPPLIES,
PAPER RULERS,
PENS, MACHINES AND DEVICES.

THE W. O. HICKOK MF'G CO.'S MACHINERY.



THE "HICKOK" PAPER RULER.

WE illustrate the best make of machines in this branch of trade, and would call attention to prices, etc., which must necessarily be condensed on account of limited space.

THE Paper Ruling Machine is one needing great accuracy, and has been steadily improved by constant and careful experimental work. There are several devices like the Sheet-lapper, Pen-underlifts, Auxiliary strikers, Lay-boys, etc., which the work of recent years has perfected. All are noted below.

PRICE LIST.

THESE HAVE TWO AUTOMATIC STRIKERS.					

WE GIVE PREFERENCE TO THE NO. 1½ LAY-BOY

THE SHEET LAPPER (HICKOK).

THIS device has as its object the Lapping of the tail of one sheet over the desired depth on the head of a preceding sheet, thus preventing the pens from ruling where a head is desired to be left blank, as in Ledger, Bill-head work, etc. This saves much time, as there is no lost space in feeding. The pens remain down constantly, as in feint-lining. No Striker is used while Lapping. Write for full particulars.

PRICE $75.00. Boxed, f. o. b. Cars at Factory.

Illustration on Opposite Page.

THE PEN-UNDERLIFTS (HICKOK)

HAVE two Underlift Bars with fingers for lifting individual pens or clusters of pens at desired points, and lowering them again upon the paper at any other desired points, thus enabling the operator to strike from several head-lines, in addition to heads struck by Striker proper, at one feeding. These Underlift Bars are placed across the machine between the Beam and Mahogany Cylinder, carrying the Dogs or Holders for the Pen lifters, and are operated by adjustable cams in double Cam-head on a higher shaft, also running across the machine, which shaft is driven from Striker proper by means of intermediate gears, thereby insuring positive uniform motion between the Striker proper and the Underlift attachments. (See cut on other page.)

PRICE $75.00. Boxed, f. o. b. Cars at Factory.

"HICKOK" SHEET-LAPPING DEVICE.

UNSURPASSED FOR

RAPID BLANK BOOK RULING

OF ALL KINDS FROM ONE HEAD-LINE.

MAY be used with success on our ordinary 1-A, or Faint-line Machines, having power attached, by adding a Gate to them; thus enabling the ruler to "sheet-lap," doing very rapid work as described on opposite page.

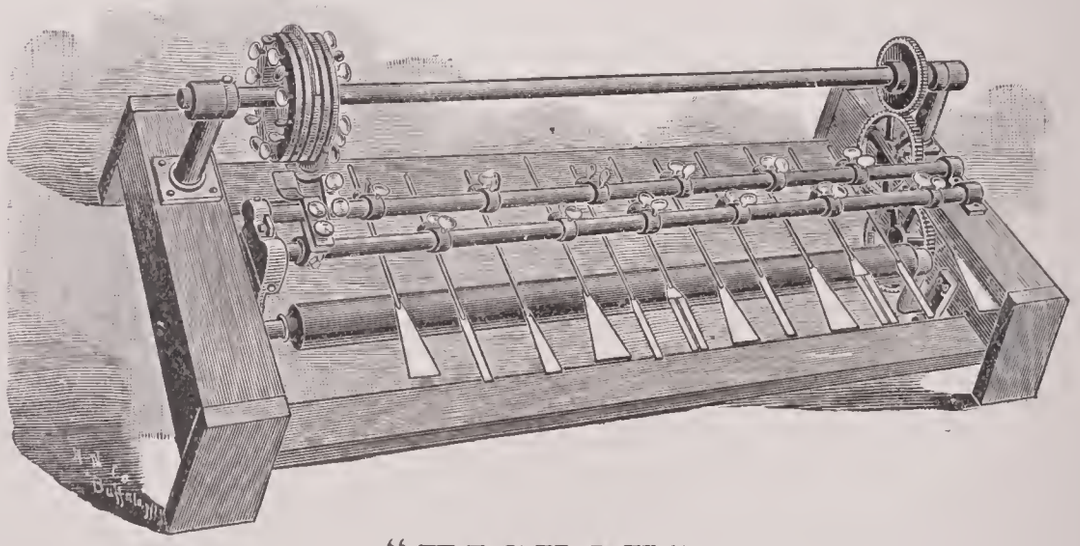
For use on "O-A" Machines (they have a Gate).

Price, $75.00.

For use on "1-A" Machines (including Gate), $100.00.

Boxing, Free.

AS SEEN ON "O-A" MACHINES.

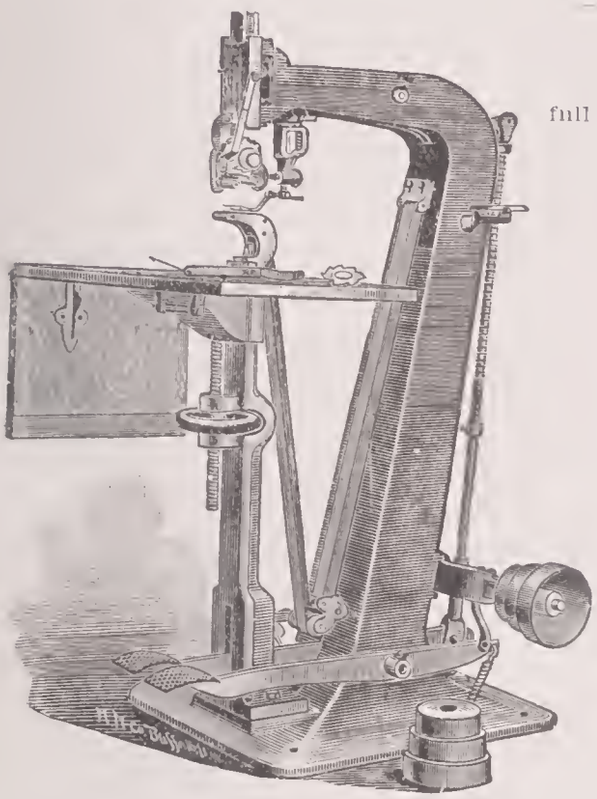


"HICKOK"

MANIFOLD PEN-UNDERLIFT DEVICE—WITHOUT GATE.

On Frame ready to box for shipment, when ordered for the purpose of attaching to our "O-A" STRIKER MACHINES now in use. Will strike several extra head-lines in addition to heads struck by the Striker or Strikers proper. Easily attached and adjusted by Ruler himself. The pen-lifters or "Spoons" touch the desired pens underneath and near their points; when slightly tilted by the cans, they raise the pen-points a trifle from the paper and there hold them until the instant for striking the next desired line. **Price, $75.00. Boxing Free.**

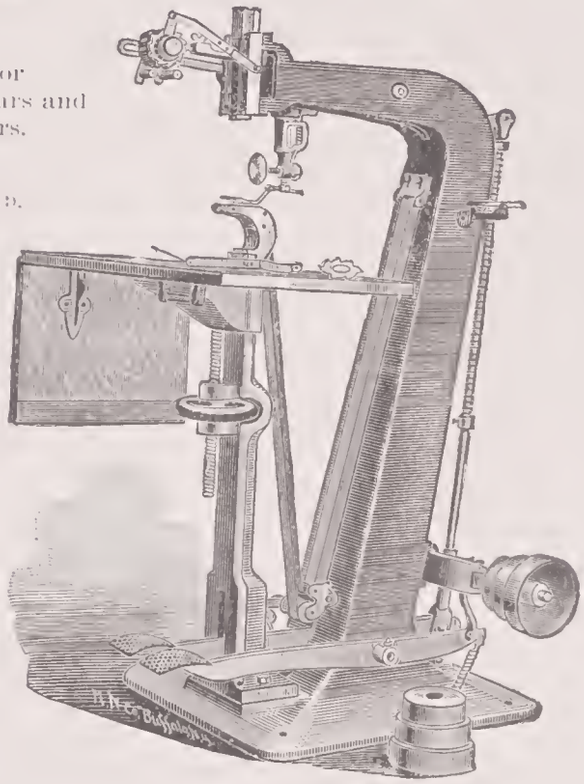
Hickok Paging and Numbering Machine



HEAD DOWN, READY FOR PRINTING.
Steam or Foot Power.

Write for full particulars and circulars.

PATENTED.



HEAD UP, FOR INSPECTION OR SETTING.
Steam or Foot Power.

SOME OF THE ADVANTAGES OF OUR NEW "1890" PATTERN.

No lost motion.

The figure-head and disc thrown forward and adjusted in a moment, by a device on no other machine.

The only inking device used to-day that can possibly give perfect distribution. NO STREAKING OR SPOTTING OF THE INK ON THE DISC.

Only the rollers and disc to be cleaned in changing inks.

The supply of ink kept up without the operator leaving his seat.

Any number of colors may be worked on this machine without expense for additional inking parts.

No parts to be changed in changing colors.

Great depth for long sheets to hang back of feed table standard.

Wide space from feed table to back main standard of machine, to accommodate high bound books having several blanks on a page from top to bottom to be numbered.

The only absolute and mechanically correct movement for a paging or numbering head is directly UP AND DOWN. No other machine can be a lasting success.

The head of our machine works in PERPENDICULAR BEARINGS. The alignment and impression must be absolutely perfect.

An "impression screw" regulates the impression as on a printing press. Can be done only on this machine.

The longest smut band on any machine manufactured; works automatically after each impression—same on foot or steam machines. Impossible to slip.

Power attachments may be added to foot-power machines at any time. This attachment is the neatest, most complete and compact made. Is perfect in every case.

The pressure of a child's foot will operate the steam attachments. An impression is made instantly, at the will of the operator, by MERELY TOUCHING a small treadle.

A more convenient way to raise and lower the feed table than on any other make, by a screw in front of operator's lap.

PRICES ON OPPOSITE PAGE.

THERE ARE PLENTY OF REASONS FOR BUYING THE "HICKOK."

THE "HICKOK" ROUND AND FANCY CORNER CUTTER.

THIS MACHINE is one of the most perfect pieces of the Hickok Co.'s Manufacture. Works like a charm. Steam-power or Foot-power Machines are each equally perfect. An Automatic clamp holds the paper or cards fast, while the cut is made, and until the knife is wholly withdrawn. Gives a clean, clear cut.

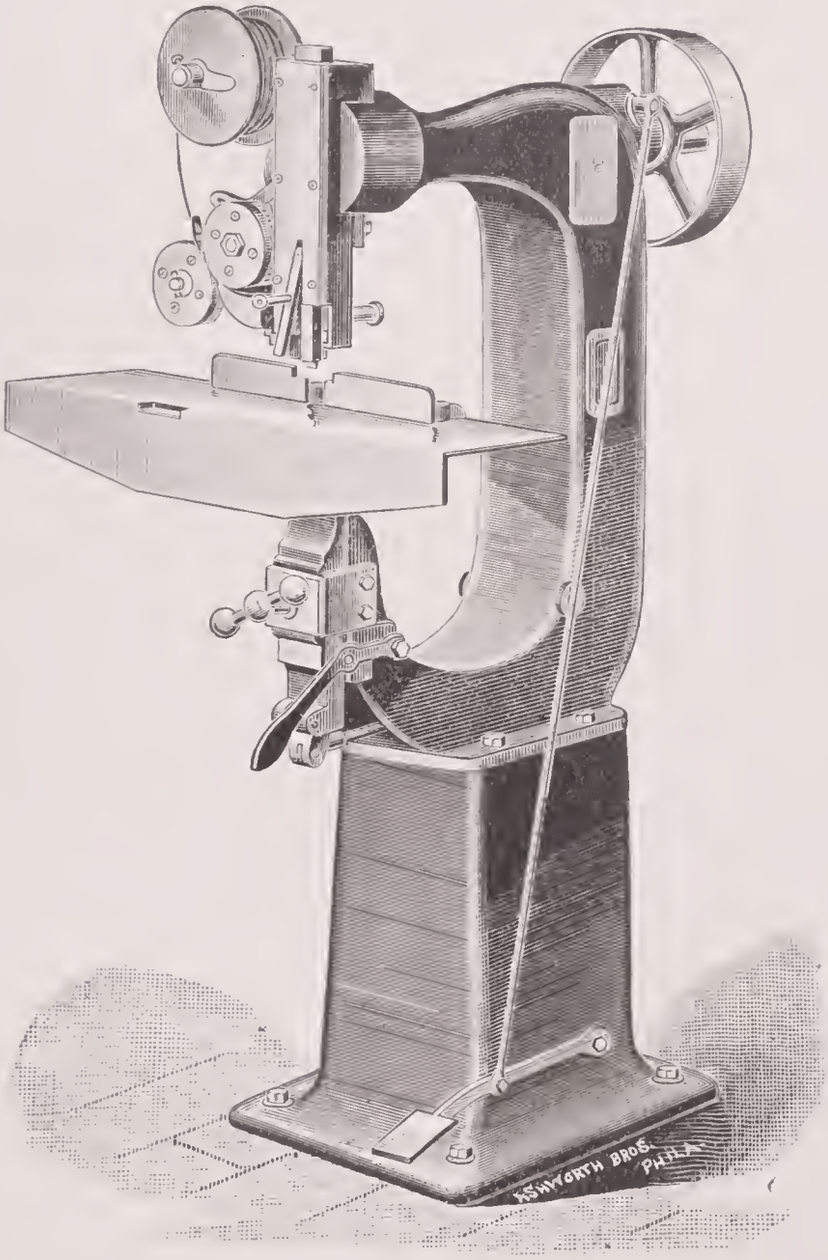
THIS MACHINE is patented, yet the prices are only $85.00 for Steam power, $60.00 for Foot power.

☞ BOXING FREE.

LATEST AND BEST

WIRE STITCHER

ON THE MARKET.



THE NEW JERSEY WIRE STITCHING MACHINE Is without cams, a new departure in mechanical motions, which is the life, attraction, power and grace of the machine. Its simplicity, easy running, quiet movements please everyone, especially experts. DIRECT, POSITIVE AND POWERFUL ACTION. Large table capacity, conveniently arranged, stitching both flat work and through the fold. Every machine is fully guaranteed. Made in four sizes. No. 1 stitches up to ¼ inch; No. 2 stitches up to ⅜ inch; No. 3 stitches up to ¾ inch; No. 4 stitches up to 1¼ inch. Send for prices and particulars. . . **JOHN RYAN FOUNDRY, SOUTHERN AGENTS.**

BLACKHALL'S WIRE STITCHERS.

No. B.

HAS STEEL ROLL FEED

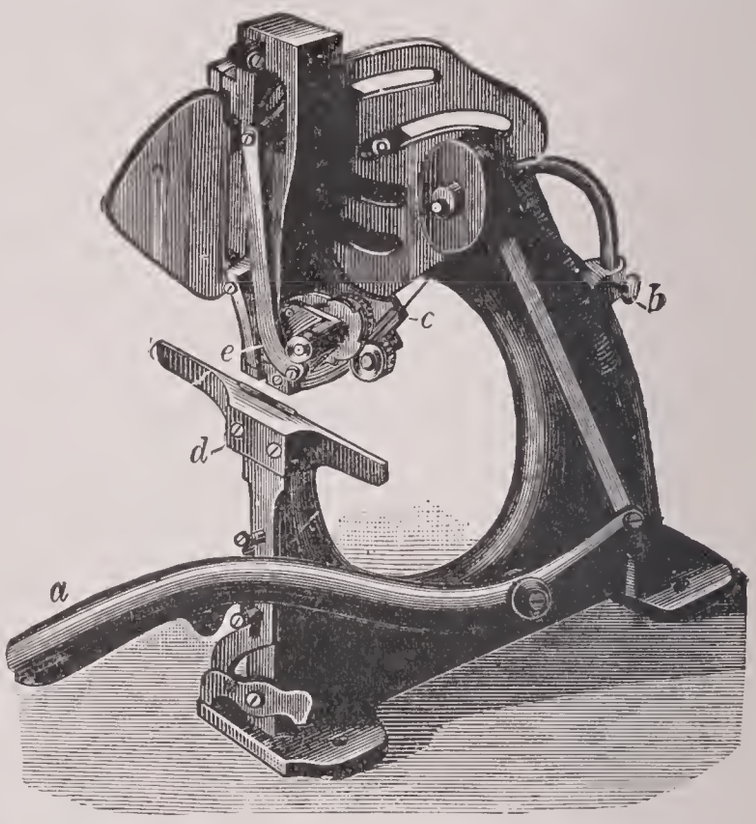
(which is always positive).

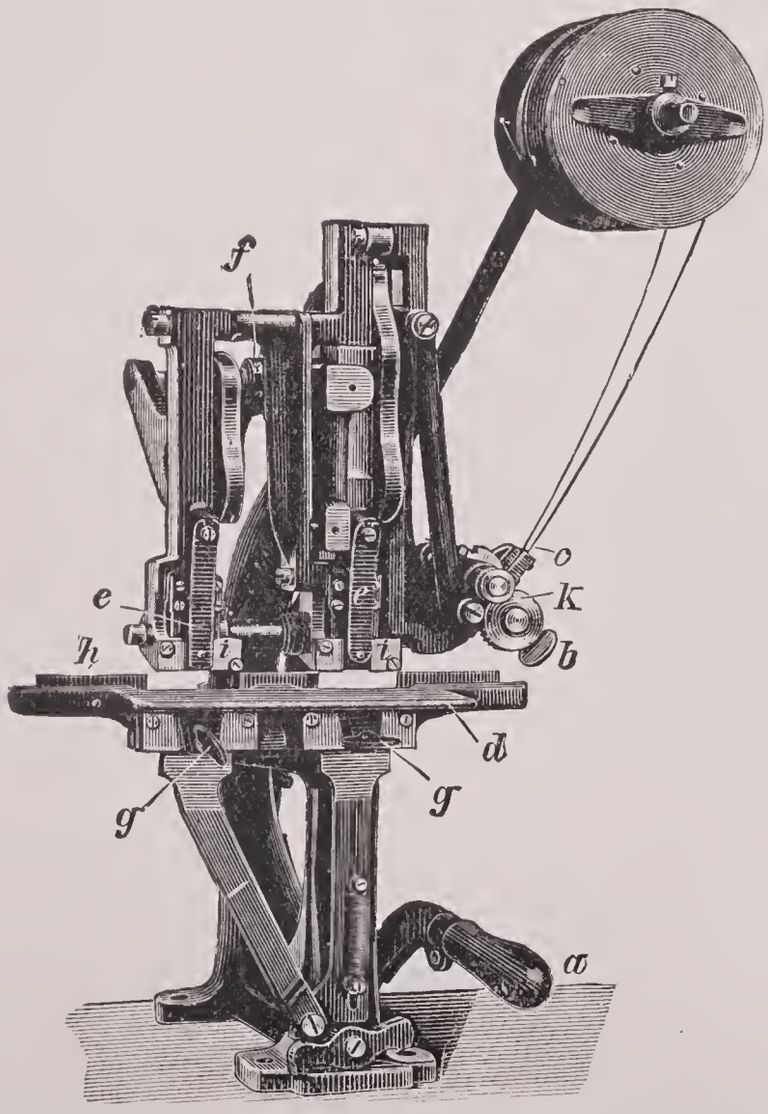
Stitches from one sheet to 3-16 inch, through side or saddle.

Wire used, 24, 25, 26, 27, 28, 29 and 30 gauge.

Hand and Foot Power,
$95.00

Steam Power,
$115.00





No. C.

Designed for More Rapid Work;

CAPACITY SAME AS No. B.

Distance between stitches 4 inches which is fixed and is not alterable.

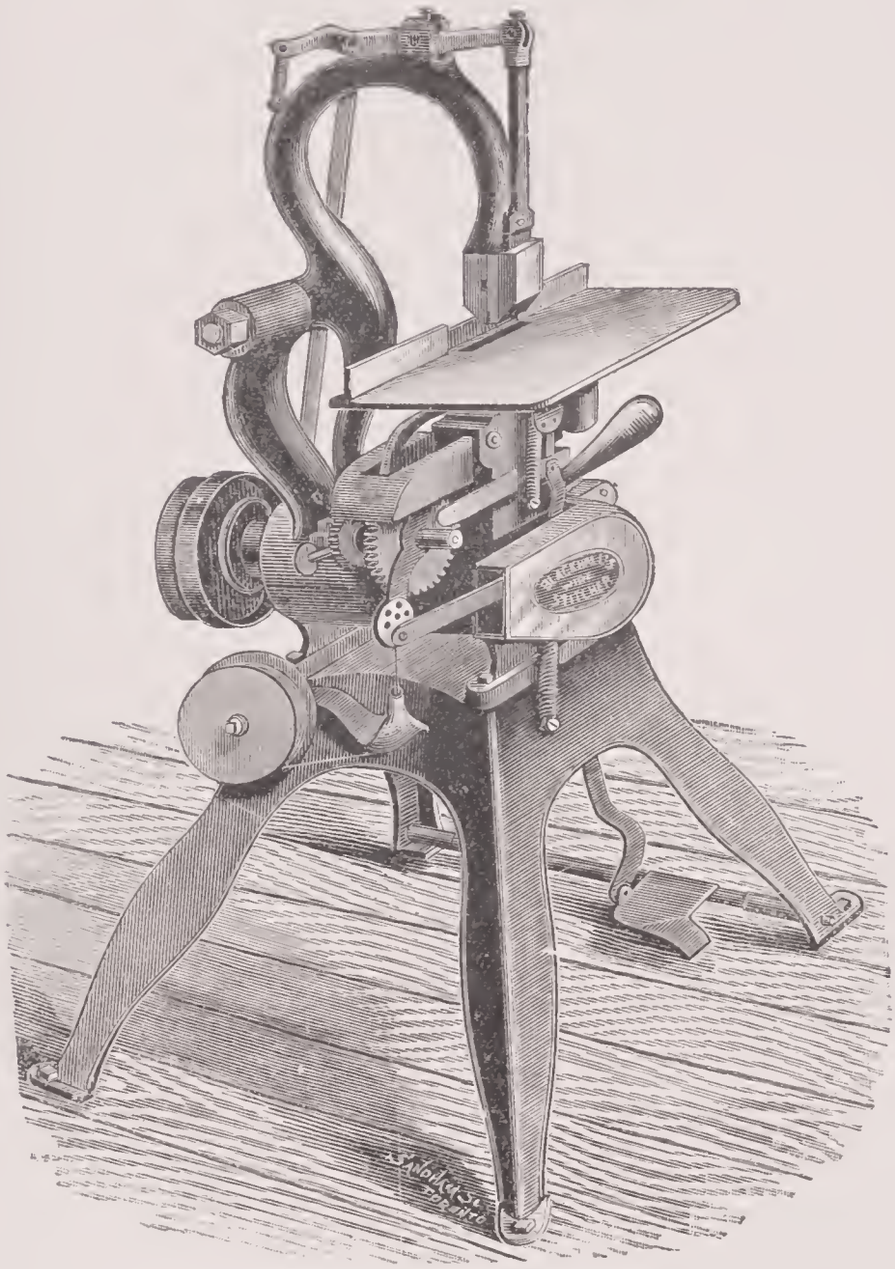
Machine can be worked to make one or two stitches, if required.

Wire used, 24, 25, 26, 27, 28, 29 and 30 gauge.

Hand and Foot Power,
$110.00

Steam Power,
$130.00

BLACKHALL'S WIRE STITCHERS.



No. D.

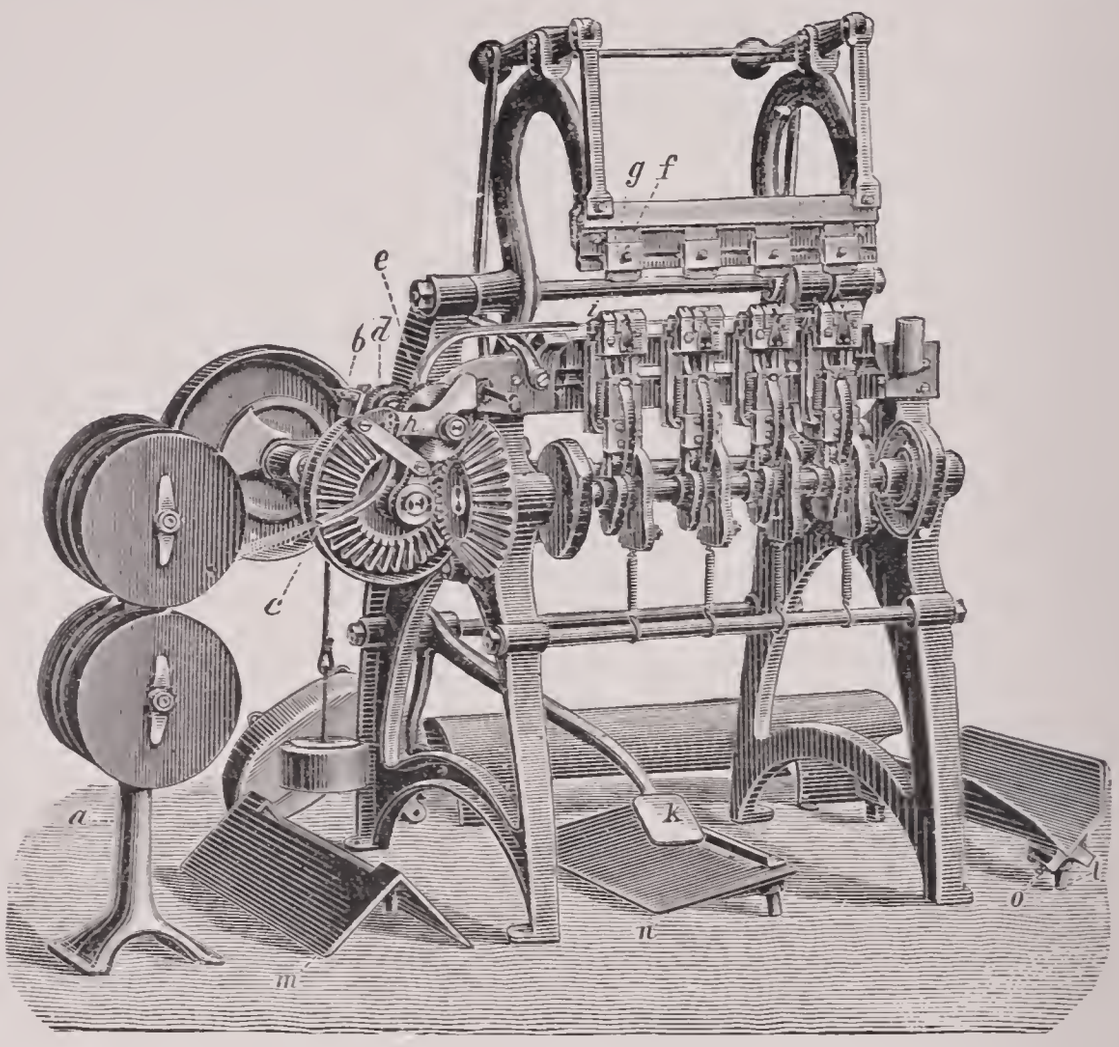
Stitches through side, saddle or inverse of saddle, from one sheet up to five-eighths of an inch thick, of soft paper, and one-half of an inch on hard paper; has steel roll feed, adjustments are all positive; turn round wire into flat when required.

Wire used, Nos. 20, 21, 22, 23, 24, 25, 26, 27 and 28 gauge.

Foot or Steam Power. Speed, the limit of the feeder.

STEAM POWER..... $280.00
STEAM AND FOOT POWER..... 295.00

BLACKHALL'S WIRE STITCHERS.



No. K.

All of these Machines are guaranteed as represented, and are acknowledged the best on the market. All movements are positive, there being no gimcrack arrangements to get out of order. Each Machine stitches through side or saddle, and Nos. D, E, F, G, H and K turn round wire into flat when desired.

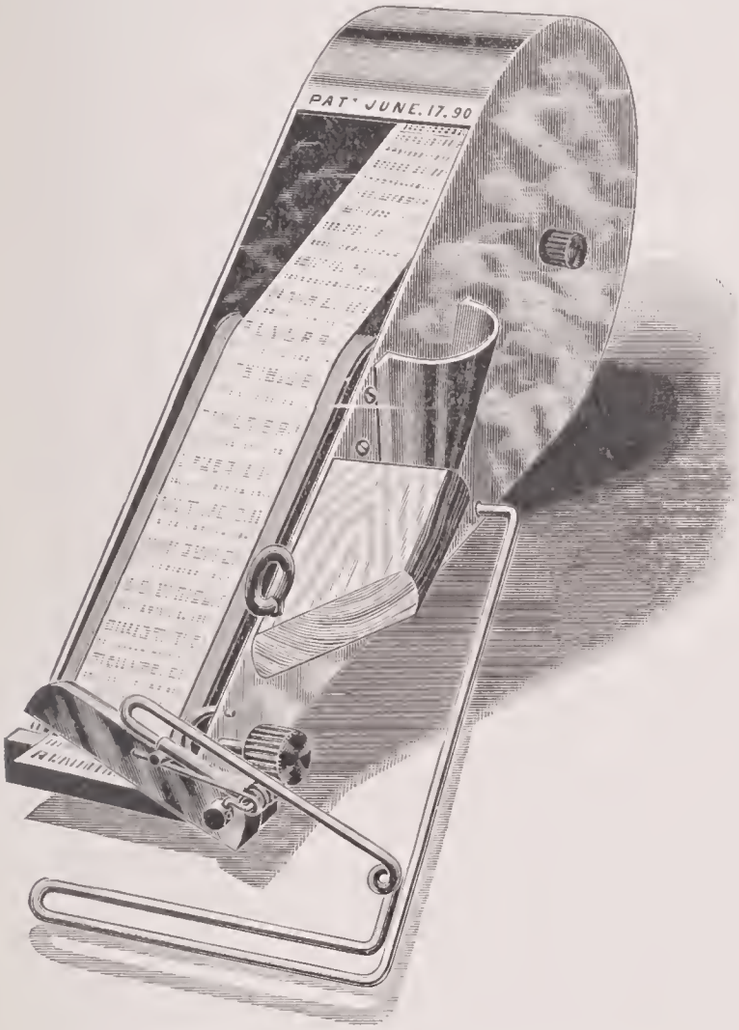
"ACME" STANDARD MAILER



ONLY $15.00

NO ROYALTY.

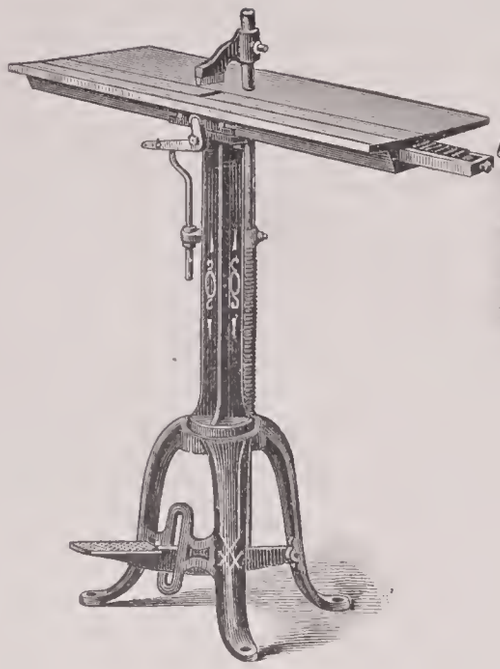
In offering this mailer to the trade we do so with the consciousness of having produced an article in every way superior to the older makes. We have simplified, strengthened and improved the mailing machine without materially altering the shape of the mailer. Anyone who has used the others will at once be able to operate ours with increased rapidity, because it is much lighter and more convenient. That the machine is a favorite wherever used is attested by the numerous testimonials from those who use them daily.

The machine was designed by a practical mailer, who for many years was employed on one of Chicago's largest dailies, and he has produced something that will do the greatest amount of work in the smallest space of time with less labor to the operator.

POINTS OF EXCELLENCE OF THE "ACME" STANDARD MAILER

It is economical. Is easy to learn.
Its action is automatic.
It is not liable to get out of order.
It is the lightest, most durable and rapid machine in existence.
It is highly finished, nickel plated and every part can be duplicated.
It is sold outright and not leased. No royalty is charged for its use.

Easy to handle. Does rapid work.
Works to perfection.
Its lasting quality is second to none.
Its simplicity of construction renders it free from "break-down."
In fact it is a perfect mailer and the cheapest machine in the market.
It is securely packed in a light wooden box and can be sent at small cost.



McFATRICH MAILING MACHINE.

Pronounced superior in every respect to anything yet offered. Boy twelve years old can address 1,000 or 2,000 papers an hour. Being operated by treadle it leaves both hands at liberty for handling papers.

PRICE LIST.

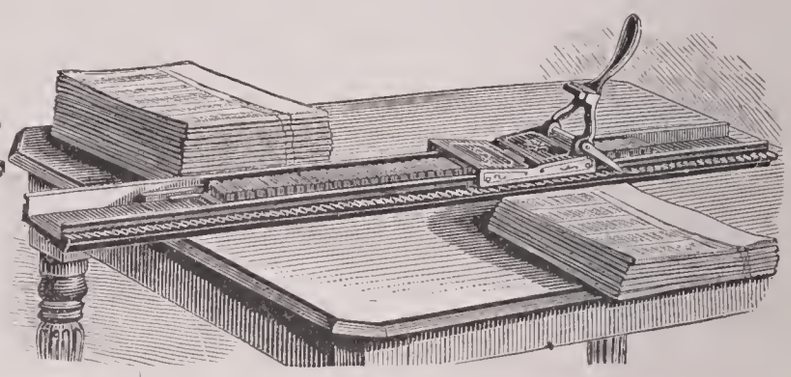
Machine (galleys 10 ems)	$35.00
36-inch all zinc galley, each	1.00
100 Long Primer reglets, cut to measure	.25
100 " " slugs, " "	1.00
Bell slugs, per dozen	.55
Mailing type, per pound	.39

COMPLETE OUTFIT FOR 1,000 NAMES FOR $78.00.

One McFatrich mailing machine	$35.00
Ten all zinc galleys	10.00
75 lbs. Long Primer mailing type, complete with logotypes and postoffice type	27.00
1,000 wooden reglets, cut to measure	2.50
Six dozen Bell slugs	3.00

Material for 1,000 additional names, $50.00.

MAIL LIST CABINET. Price, $27.00.



PINERS'S MUSTANG MAILER.

This machine prints direct on paper or wrapper and does away with pasting. It is made entirely of iron, without springs or complications of any kind to get out of order.

Price $10.00. Galleys 50¢ each.

Weight of machine, 15 lbs.; galleys, 1 lb. each.

COMPLETE OUTFIT FOR 1,000 NAMES FOR $53.00.

Long Primer type, etc., and outfit complete, with Mustang Mailer (galleys to match).

Material for 1,000 additional names, $43.00.

Embossing Composition

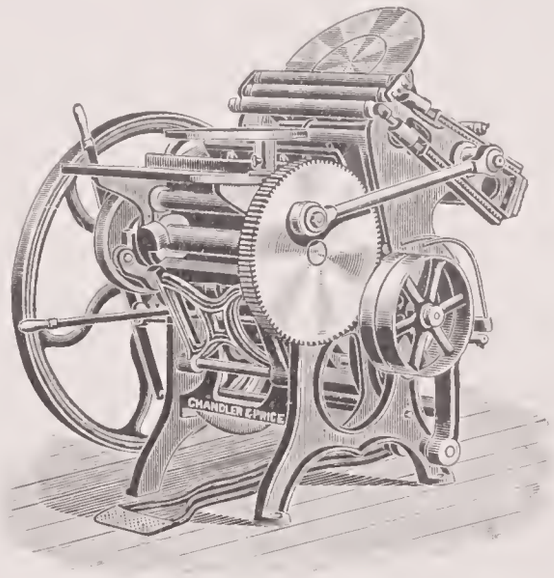
This is a new preparation for making counter-dies for embossing on job presses. A small quantity of the composition is spread on the platen of the press, and an impression taken, forcing the composition into the die. This preparation differs materially from other substances used for the same purpose, having among its ingredients certain chemicals which are sensitive to the action of light. When dry, after a short exposure to light and air, the composition is of stone-like hardness, forming a most effective medium for forcing the paper or cardboard into the interstices of the die. Requires no heating, does not dry up in the jar, and is always ready for use. Complete instructions sent with every lot. Put up in screw top glass jars. Price per jar, 75 cents.

A Trial Outfit. To enable printers unacquainted with the process of embossing to test the ease with which this work can be done, we will send a beautiful, electrotyped design of the words "Artistic Printing," from which the die may readily be made with the composition, complete with trial size jar of composition, for $2. The cut can be used for cards or note headings, and printed in gold and embossed, with type matter in light blue ink, the effect is handsome. Write for circular, showing sample of the work.

THE CHANDLER & PRICE

Old Style Gordon Press.

THIS PRESS, while retaining all the desirable features of the justly celebrated Gordon, has many important improvements and advantages which no other Gordon press ever possessed. It is heavier and stronger, and, while being a very quiet, smooth, quick and easy running machine, will do all grades of printing, from the lightest to the very heaviest, in the best manner possible, and with the least danger of break or strain. In fact, there is no other job press now in existence better suited for general work; that will endure more years of actual service; that is less expensive to keep in repair; or that will withstand more abuse than the Chandler & Price press.



The Side Arm and Shaft are forged from solid steel bars, without seam or weld, and are not steel castings or other inferior grade as might be advertised under the name of steel. Printers should bear in mind that there is a difference in the qualities of steel as there is of iron. The Cam Rollers are of hardened tool steel and, if properly oiled, will wear a long time.

The Impression Throw-Off is perfect and excels all others hitherto introduced, being positive in its action and easily operated at any position of the platen, without the use of spring, catch or clamp. The lever handle is in a most convenient place, yet away from all gear and danger, thus insuring the hand against accident.

The Grippers are depressible, but cannot twist or turn in any direction or, by accident, get on or beneath the rollers, but are securely held in position.

The Steam Fixtures, constructed on the most improved principles, are simple, convenient, strong and easily operated by hand or knee.

The Chase Clamp is also a great improvement over all old methods, being strong, simple and perfectly safe and reliable, yet instantaneous in action, and thus a time-saver.

For complete distribution of ink, this press meets the demand. Adding to the original, double movements of the disk, the new improvements in both disk and roller carriers, whereby a greatly increased distribution is given, a perfection is reached in this respect which we believe to be unequalled by any other press now made.

Regarding speed, these presses are geared to run rapidly by steam power, even faster than possible to feed them; while the nearly horizontal platen, with its long rest, makes them the most desirable of all presses for quick and easy feeding.

N. B.—To those who contemplate purchasing a job press, we respectfully call their attention to the fact that we have sold and have in the hands of printers over three thousand of our Gordon presses, and never yet have been called upon to take one back; ALL having given satisfaction. Such is the result of superior material used, care in construction and sparing neither pains nor expense. We therefore claim that, while the dealer may charge you more for the Chandler & Price press than any other make of old style Gordons, (or possibly try to persuade you to accept another make), our press will be the cheaper in the end. It pays to purchase the best, most durable and most carefully finished machine—so be careful in ordering and distinctly state it is the Chandler & Price press you want and WILL HAVE. *Mfrs. Circular.*

SIZES AND PRICES.

Eighth Medium,	7x11,	with Throw-off and Depressible Grippers	$150.00
" "	8x12,	" "	165.00

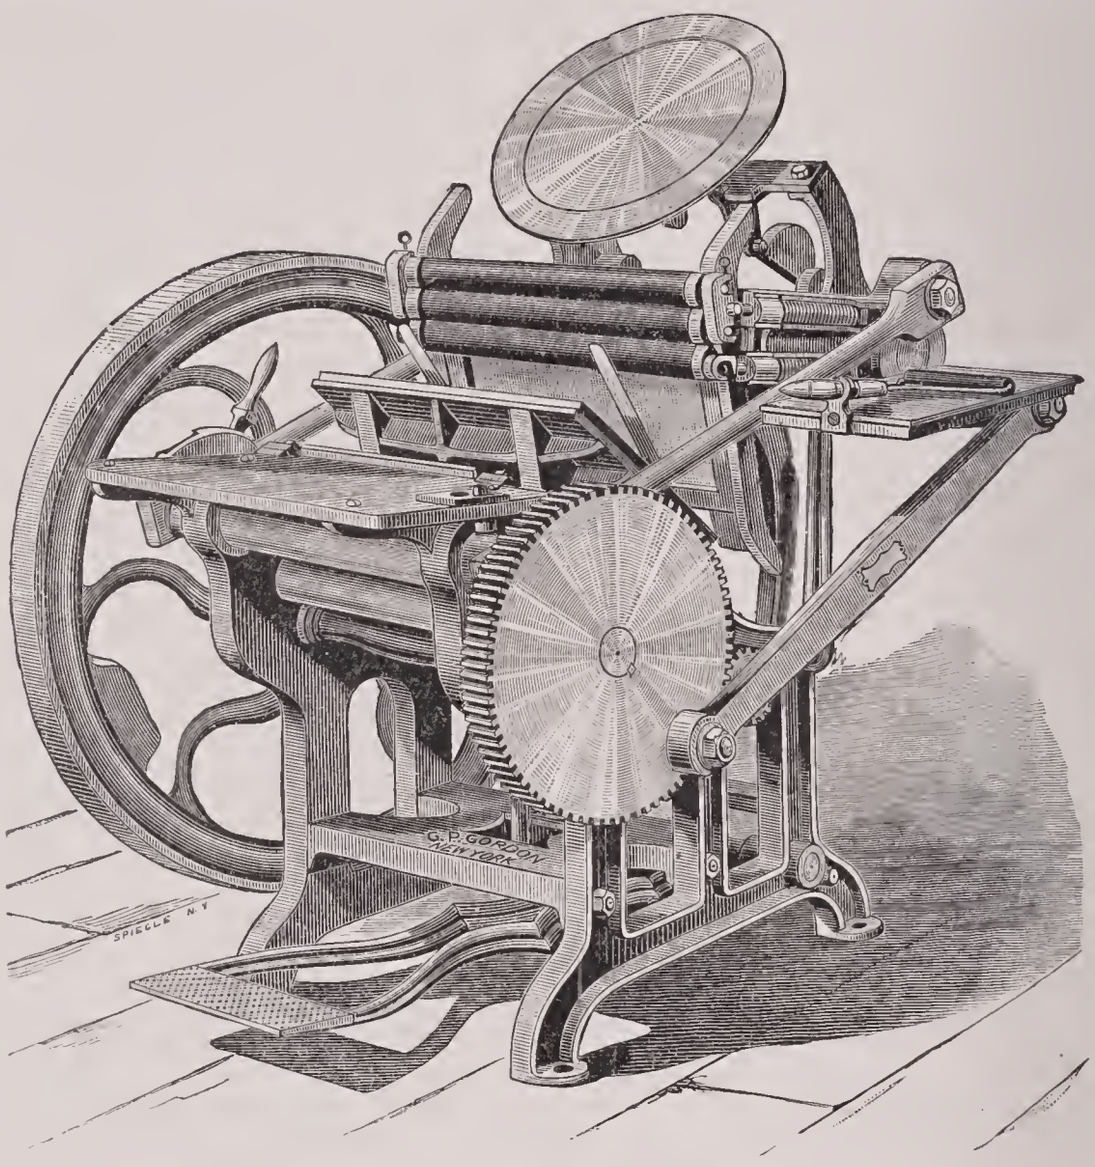
With each press there are 3 Chases, 1 Brayer, 2 sets of Roller Stocks, 2 Wrenches and 1 Roller Mould. If desired, will furnish either two extra Chases or cast three Rollers instead of Mould.

No charge for boxing and shipping.

All our goods guaranteed in every respect.

GORDON'S FRANKLIN PRESS



THE MANUFACTURES SAY OF THE IMPROVED GORDON:

THE NEW PRESS is extremely simple. Its movements are easy and graceful. It employs the Fewest Pieces Possible, to give the desired results—is the easiest running press built—the mechanical principles are those most approved—the facility of changing from form to form, or ink to ink, is unsurpassed—has a wide opening between bed and platen—is the quickest to make ready—is thorough in distribution—gives a long dwell to the platen to receive the sheet—is perfect in impression—gives the impression with great ease—has a long dwell upon the impression—suspends the impression up to the latest moment—allows the grippers to be depressed to the tympan and set—fastens the chase to, or releases it from, the bed instantly—is accessible in all parts—is perfect in register—can be easily comprehended—possesses GREAT STRENGTH—is noiseless—and, in brief, it is improved all over.

INK ARMS.—New and substantial Ink Arms, positive and direct in their movement, with ink rods having DOUBLE bearings, are now used for conveying the form rollers, and take the place of the brass roller carriers formerly used. With these new Ink Arms it is impossible for the rollers to fall out of place.

The impression connections are forged from one solid piece of steel.

SIZES AND PRICES OF THE GORDON PRESS NEW STYLE.

	SIZE.	PRICE.	BOXING.
Eighth Medium	8×12 in. inside chase.	$225 00	$6 00
" "	9×13 " "	250 00	6 00
Quarto "	10×15 " "	300 00	7 00

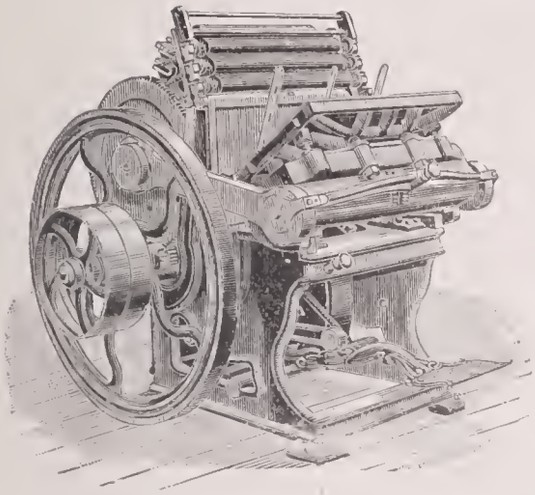
Quarto Medium,	10×15	1,500 pounds.	
Eighth "	9×13	1,050 "	
Eighth Medium,	8×12	1,000 pounds.	



M. GALLY'S NEW UNIVERSAL.

The inventor of the well-known original "Universal," who has so many years been proprietor of the Universal Press business, now offers to the craft his NEW UNIVERSAL, made under his new patents, and so greatly improved that it is undoubtedly the strongest, most durable, fastest and best Job Press in the world. The New Universal Presses, as compared with the old, have heavier shafts, gear wheels, bridge and platen; greater weight, strength and durability; lighter, smoother and almost noiseless movement; improved distribution, without any danger of tearing rollers; no bridge lugs, no bridge springs, no crescents, and the least possible liability to breakage.

COLT'S ARMORY PRESS.

The manufacturers of the Colt's Armory Press make the assertion that it is not a "new" machine made up by re-hashing old patterns, but an original model embodying in its design the most advanced ideas in mechanical engineering. They are entirely beyond comparison with the crude, unmechanical affairs generally offered to the trade and dear at any price.

Its success has been most complete. We have the honor of referring to many of the best printers of the country. What we particularly claim is that, dollar for dollar and pound for pound, the Colt's Armory Press is the best value in the market.

		Price.	Fountain.	Steam Fixtures.
Eighth medium,	8×12	$225.00	$18.00	$ 7.00

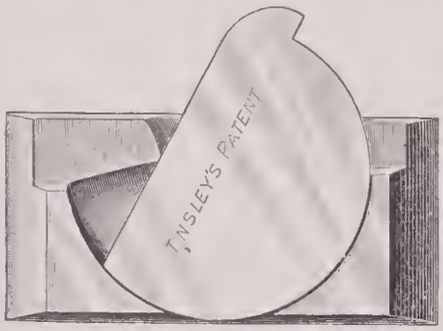
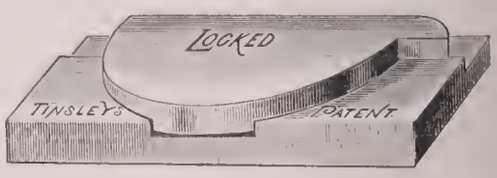
Fountain, $25.00. Steam fixtures, $15.00. Overhead fixtures, $15.00 to $30.00. Boxing, $5.00 $7.00 and $10.00.

THE MIDGET QUOIN.



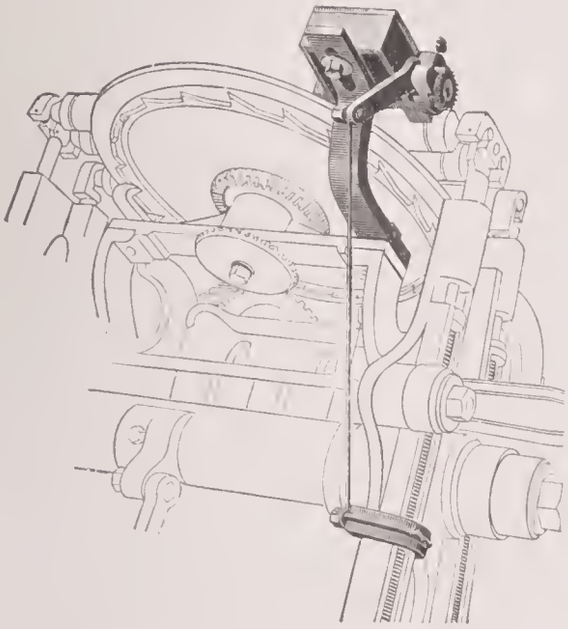
No. 1.

Price, $2.00 Per Dozen, including Key.



No. 2.

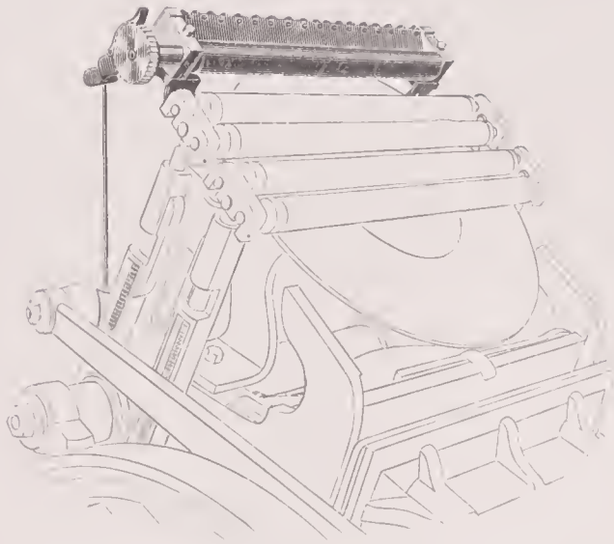
The "Midget" Quoin is adapted and especially recommended for use in crowded forms, where little room is left between the matter and chase. When unlocked it occupies a space of a little more than a pica in thickness. Its pressure when locked is perfectly even, square and powerful. As there is no slipping or sliding of either part of the quoin whilst locking, it can often be used with perfect safety between blank spaces where the matter completely fills the chase. Cut No. 1 shows the quoin unlocked, as it is placed in the form. A few light taps on the upper portion of the semi-circular part forces it down even with the square part, as shown in Cut No. 2. Should the form prove to be insufficiently tight, a lead or two placed beside the quoin will adjust it. The entirely new principle upon which this quoin is constructed makes it unnecessary to use the key in locking, it being only required in the process of unlocking. There is absolutely no friction in its operation, which makes entirely credible the claim that it will never wear out. Price, $2.00 per dozen, including unlocking key.



THE BUCKEYE FOUNTAIN.

The manufacturers say this Fountain will be found the easiest to attach, the easiest worked, and also the most practical Ink Fountain on the market. Its roller is so adjusted as to supply ink uniformly on either large or small jobs. Its size also makes it practicable to use good or expensive ink without any waste, only a small amount being required to supply the Fountain.

Price, $10.00.



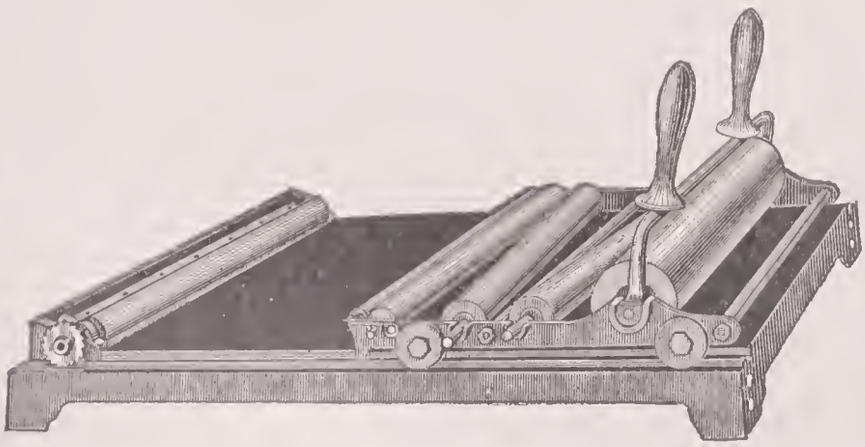
CHANDLER & PRICE FOUNTAIN.

To those whose special work requires greater capacity than can be obtained with the Buckeye, we offer the Chandler & Price Fountain, which is so made as to permit contact with the rollers their whole length, and will thus furnish a greater supply of ink than the Buckeye. Price $20.00.

PONY FOUNTAIN.

This Fountain, for Old Style Gordon Presses, has a composition ductor roller, which turns when in contact with fountain roller receiving the ink, and is then depressed to meet the form rollers, turning twice in contact with each of them.

For eighth-medium press	$12.00
For quarter-medium "	13.50
For half-medium "	15.00



HENRY'S SELF INK DISTRIBUTER FOR HAND PRESSES.

The simple pushing forward and pulling backward once is all that is necessary to take ink and distribute for each sheet as printed.

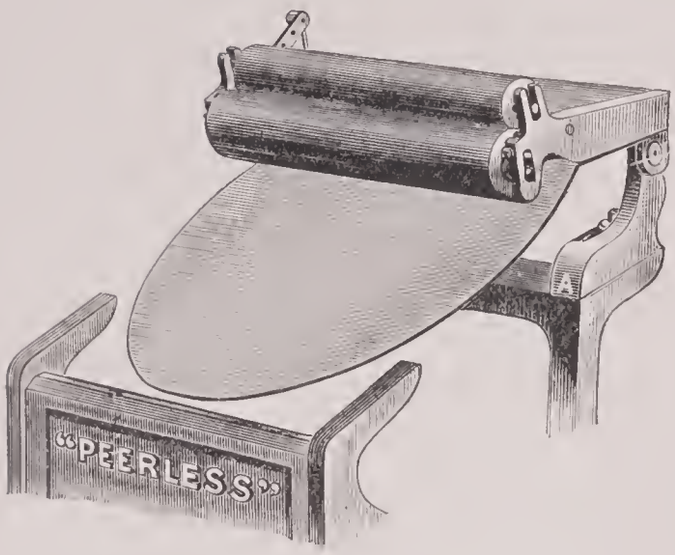
This new, perfect and popular machine is rapidly coming into use. Hand press printers have long felt the need of an improved method for inking their "Forms," and this new DISTRIBUTER supplies this want. It enables them to secure an EVEN, SHARP, CLEAR, CLEAN print, and to issue as finely printed sheets as the cylinder press offices, and do it much QUICKER and EASIER than by the old method.

When the paper is ready for press one can make a straight run, the roller boy being able to ink for rom 400 to 500 impressions per hour.

The Henry Machine is light running; is strongly and handsomely built; clean, occupying but little more space than the common slab and roller, and is so simple in construction that any one can operate it, and there is nothing to get out of order. The machine is furnished complete, ready for use, as seen by the accompanying cut.

PRICE.—Six Column	$25.00
Seven "	27.00
Eight "	30.00

JOHNSON CYLINDER-DISK DISTRIBUTION.



The demand made upon printers in this progressive age for rapid, and at the same time first-class work, has made it a necessity that ink should be fed to the Job Press automatically.

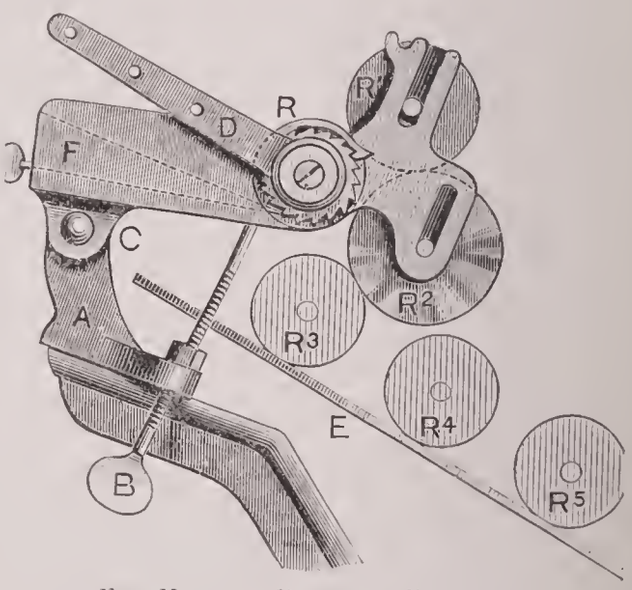
Thorough distribution of the ink fed by fountain to a press provided with a rotating-disk has long been desired by the practical, money-making printer, and the state of the art and competition in prices make the demand imperative.

The "Johnson" Cylinder-Disk Distribution shown in the cut (a combination of cylinder and disk distribution in its simplest form) meets this demand in all respects. Examine it carefully; it is worthy of your attention and adoption as a practical, economical and money-making inking and distributing device for rotating-disk job presses.

COMBINATION OF CYLINDER AND DISK DISTRIBUTION AT WILL.

Printers will find great convenience and economy in this combination of *cylinder and disk distribution*, for the reason that one or both can be used as desired. For heavy forms requiring a body of ink, for tints, for cuts, for colors, and for fine work of all kinds, use the *cylinder-disk distribution*. For light forms requiring but little ink, remove the distributor, also the ink cylinder if desired, or, by use of the large screw, raise the fountain and ink cylinder so as to avoid contact with the form rollers, disconnect the rachet dog and use only the disk, and the ordinary disk distribution is at command, with its simplicity and ease of manipulation. These are points of convenience and economy of great value.

Every practical printer knows that more than half of the "jobs" that come into the general job printing office are "worked" satisfactorily and more economically by the disk method of distribution; hence, will be seen the benefit of having the *cylinder-disk distribution*, to be used *at will*, that through its use colors, cuts, tints, and all fine work can be done in the best manner on the same press.



End View of Peerless Fountain.

For 14½×22 press	$50.00	For 11×17 press	$15.00

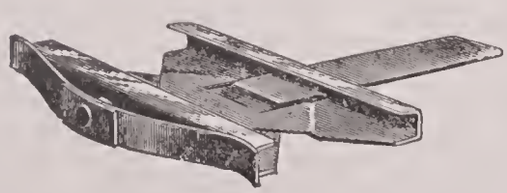
AUTOMATIC AUXILIARY GRIPPER.



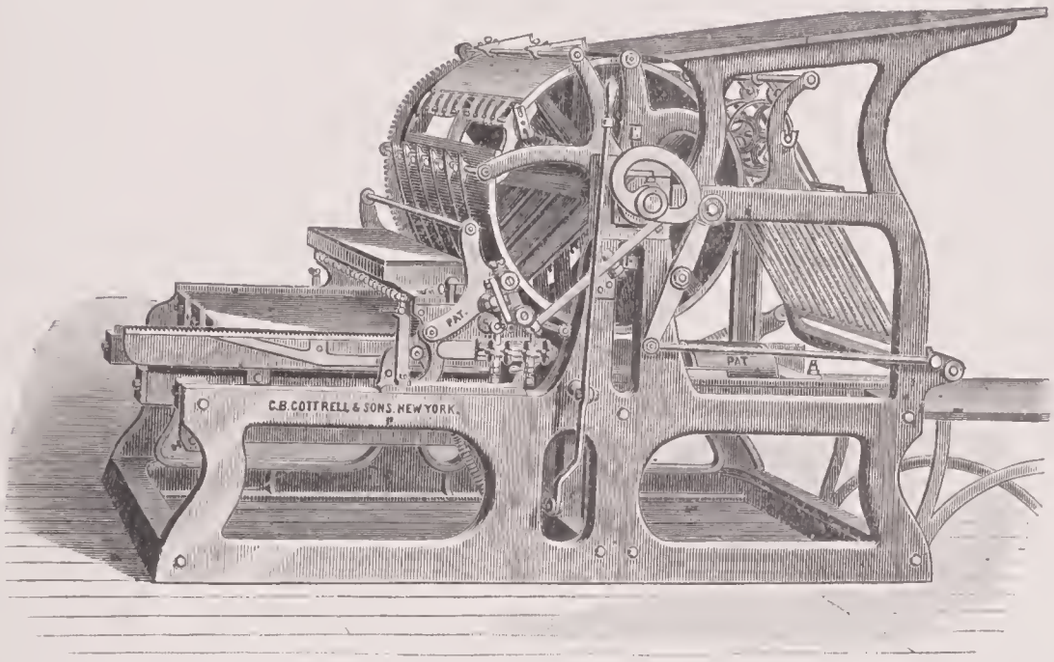
Pressmen have always been given to the use of all sorts of cumbersome devices in cardboard, string, rubber, or wire for temporary relief when the grippers fail. The Automatic Auxiliary Gripper cures all this trouble.

Can be placed instantly at any point of gripper and will stay. Admits of the use of a left-hand gauge pin. If margin is scant, gripper tongue may be worked between lines.

Four sizes, to fit any modern job press. Per pair, $1.00

COTTRELL PATENT AIR SPRING
COUNTRY PRINTING PRESS

NEW SERIES.



THE illustration above shows COTTRELL'S LATEST IMPROVED COUNTRY PRESS—New series. It is adapted to printing Newspapers, Posters, Pamphlets, Circulars, and all classes of Commercial work. The machine has been thoroughly remodeled and reconstructed, special attention having been given to the design and to the proportioning of all parts of the work required, making a STRONG, SIMPLE AND RAPID MACHINE. The side frames are changed in design, the flanges projecting inward, the whole presenting a smooth, massive and clean appearance.

The Press is supplied with Patent Air Springs, the resistance of which is increased or decreased according to the speed of the Press. It is well known that the faster the speed the greater strength of spring is required. The Patent Air Spring covers these requirements. If the Press is running at 500 per hour, the spring can be easily regulated for that speed, and if running at 1,000 or more per hour, the proportionate increase of spring can be obtained. The Air Spring is provided with an automatic throw-off that releases the spring when the Press is stopped, and the pressman can move the bed to and fro without compressing the spring. When the Press is started the spring is applied automatically.

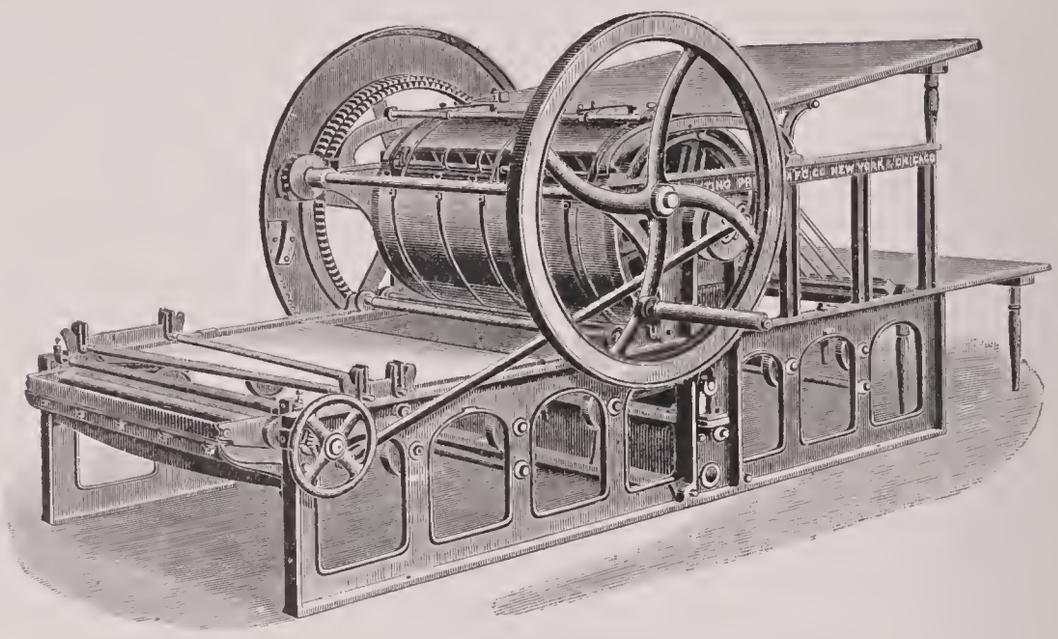
The Press has Patent Hinged Roller Frames, which permit of the form rollers being instantly uncovered for removal or other purposes, without unscrewing the sockets. The whole machine is substantially built, simple in construction, can be set up and run by any printer, and, by the aid of the Patent Air Springs, will run one-third faster than any other country Press.

Size of bed, inside bearers. 33x47 inches, ... $1,100.00
Steam fixtures, extra, ... 50.00

This Press will print a 6-column quarto newspaper, without crowding.

Driving wheel, blanket, wrenches, extra roller stocks, roller moulds, or a set of cast rollers, and boxing and shipping, are included in price.

COUNTRY NEWSPAPER PRESSES.

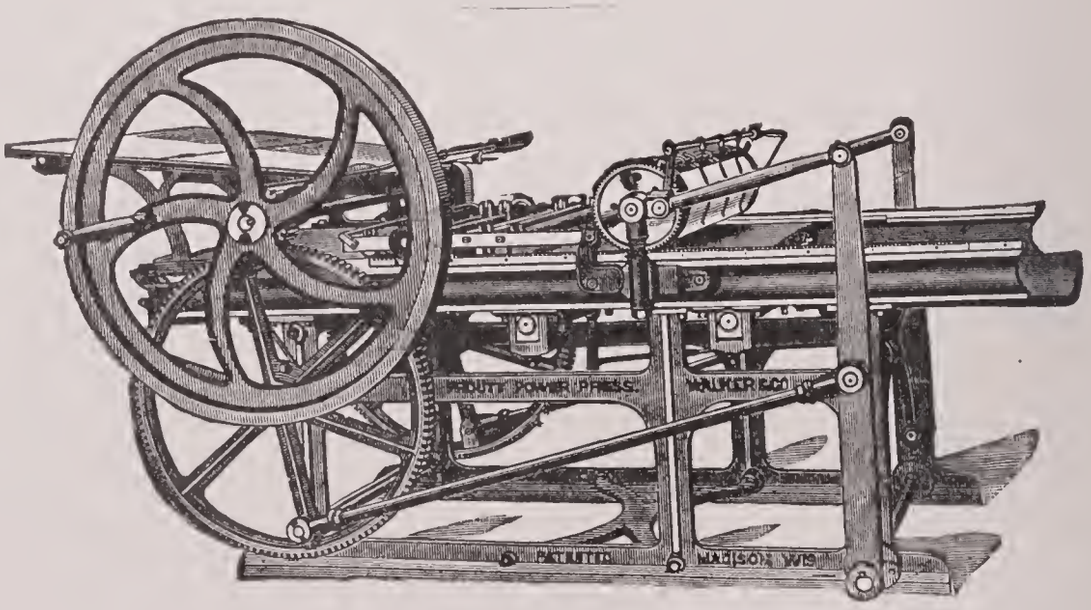


NEW CAMPBELL COUNTRY HAND-CYLINDER SERIES.

This is a Press for the times. For quality, price, convenience and economy it is pre-eminently unequaled. It is the climax of simplicity, capacity, speed and cheapness in cylinder presses. It is the result of many years of invention and study, with the expenditure of great sums of money on the part of the Campbell Company, whose mechanical and inventive resources are well nigh inexhaustible, and we say unhesitatingly that it is without exception the best and cheapest press in the world for the country publisher who has to run by hand power. Speed, 600 to 800 impressions per hour.

No. 2, bed 33×48, standard size for 9-col. folio or 6-col. quarto $800.0

No. 3, bed 30×43, standard size for 8-col. folio or 5-col. quarto 700.00



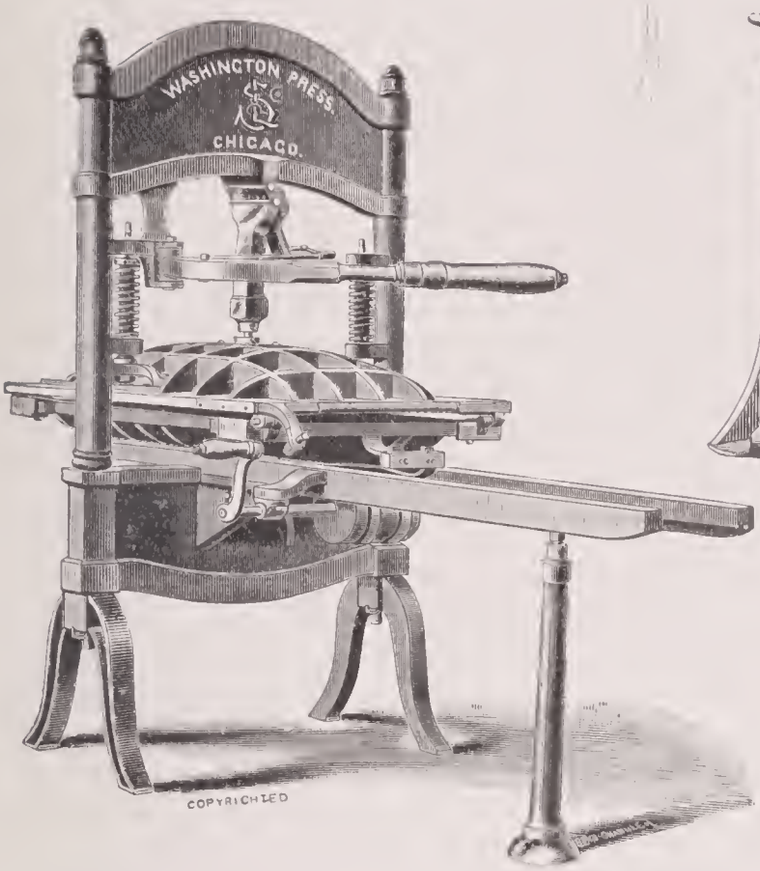
THE IMPROVED COUNTRY "PROUTY."

Square Sides, Patent Square Drop Bed, and Patent Throw-Off.

	Inches inside Bearers.	Weight.	Speed per Hour.	Price.
No. 1, 7-column folio.....	27×37	3,600 lbs.	1,000	$600.00
No. 2, 8-col. folio or 5-col. quarto.....	27½×43½	4,000 lbs.	900	700.00
No. 3, 9-col. folio or 6-col. quarto.....	32½×46½	4,600 lbs.	800	800.00

The above prices include fountain, rubber blanket, set of rollers, set of extra cores, and patent throw-off and impression lock. All boxed and on board cars. Steam fixtures, $15 extra. If fly is wanted for any reason, it can be added to this Press for $25 extra.

The freight to Eastern points on these Presses is unusually heavy, as the shipping point is Madison, Wisconsin.



WASHINGTON HAND PRESS.

No. of Press.	Size of Paper.	Bed. Inches.	Platen. Inches.	Price. New.	Weight in lbs.
3	5 col.	20×29	19×25	$200.00	1,650
4	6 col.	26×34	22×30	225.00	1,759

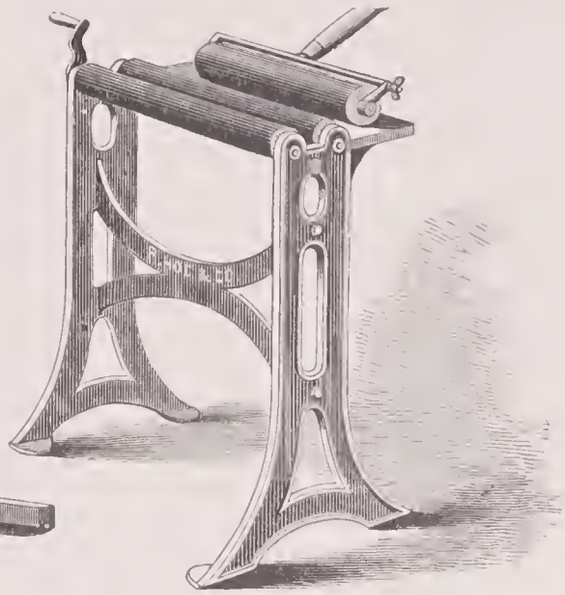
6	9 col.	32×47	28×43	275.00	2,843

Second-hand Presses usually kept in stock, prices for which are governed by their condition.



INK DISTRIBUTORS.

The single roller style here shown is mostly used. The vibrator style has a large vibrating cylinder, worked with a crank, to more evenly distribute the ink on the two rollers that pass over the form.

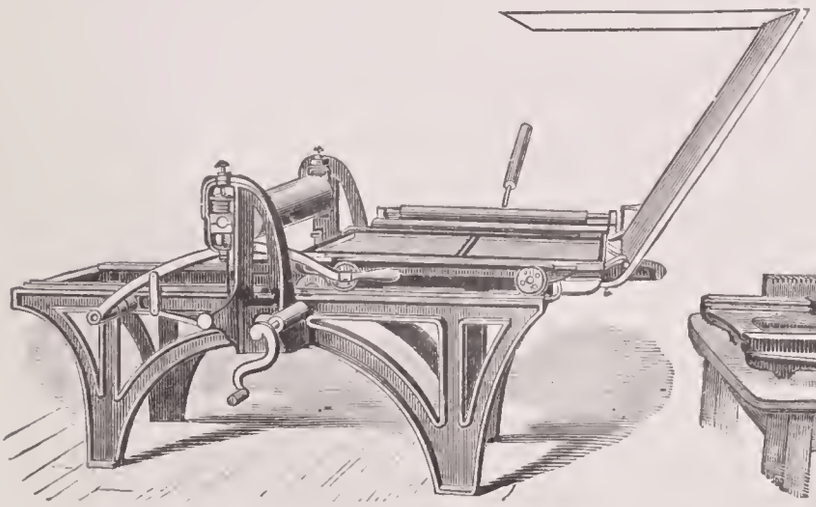
Second-hand Distributors usually in stock at reduced prices.

Single Roller Distributor–

For No. 4 Press	$19.50
" 4½ "	21.00
" 5½ "	24.00
" 6 "	25.50

Two Roller Distributor, with Vibrator—

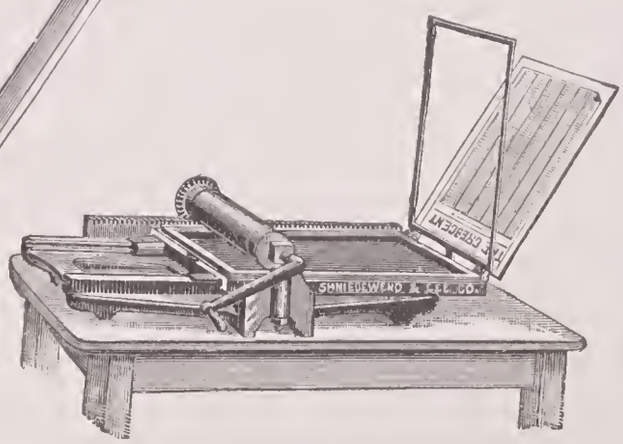
For No. 4 Press	$45.00
" 4½ "	50.00
" 5½ "	60.00
" 6 "	65.00



ADAMS' HAND CYLINDER.

Specially designed for country newspapers. Is complete with felt blanket, inking apparatus, roller frame, roller and extra roller core. All "pulling" of lever is dispensed with, and is simply a question of rolling the bed under the cylinder and back and the sheet is printed.

24 ×35 inches,	prints	6-col. folio	$225.00
27¼×40½	"	" 7-col. folio..	240.00
28¼×43	"	" 8-col. folio.....	260.00
33 ×48	"	" 9-col. folio.....	300.00

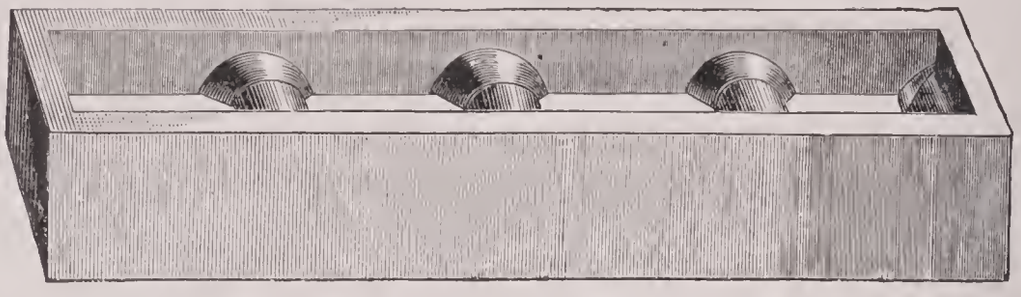


THE ARMY PRESS.

The Army Printing Press resembles the modern Hand Press, having ways, bed, tympan, and frisket. In place of platen and levers, it has a cylinder, by the rotation of which the bed is moved and the impression given at each motion back and forth. The sheet is worked folded, then turned, requiring four impressions to complete each paper.

14 ×20 inches	$60.00
16⅞×22¾ inches	85.00

Improved Metal Furniture.



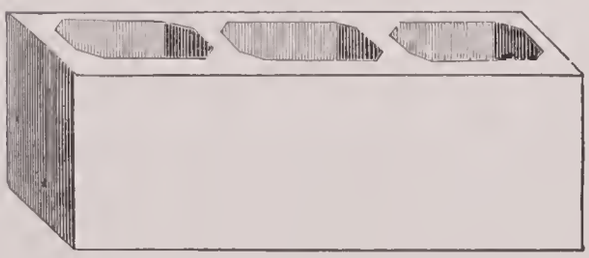
ON THE POINT SYSTEM.

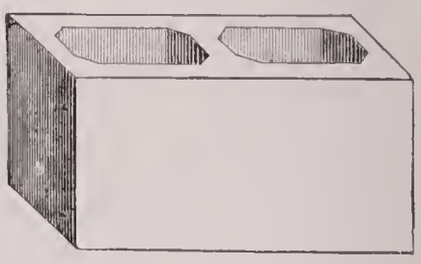
12 lb. font	$3.00	50 lb. font	$12.50
25 lb. font	6.25	100 lb. font	35.00

SORTS TO ORDER, 30 CENTS PER POUND.

By the above illustration of a piece of Improved Metal Furniture, it will be seen that the ENDS are cast SOLID, which gives it great strength. It is accurately finished to a uniform standard, and can always be relied upon to give satisfaction. No printer can afford to be without a font of this furniture, as the time saved will soon pay for it. The pieces are *2, 3, 4, 5, 6, 8* and *10* ems pica in width, and *4, 5, 6, 8, 10, 15, 20, 25* and *50* ems pica in length. In the smaller fonts the 50-em pieces are omitted unless specially ordered.

QUOTATION METAL FURNITURE.





ON THE POINT SYSTEM.

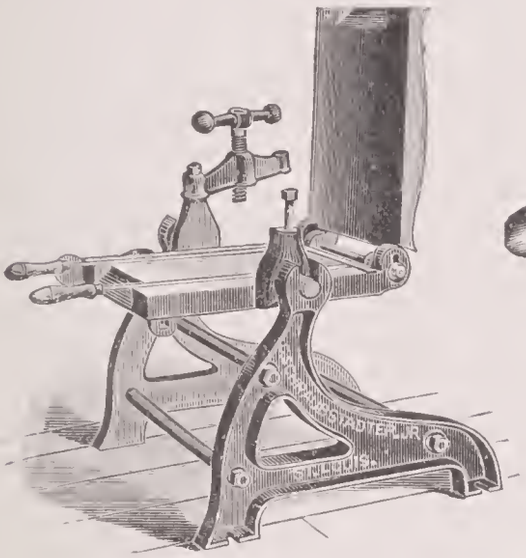
1 lb. font	$2.50	40 lb. font	$10.00
2 lb. font	5.00	80 lb. font	20.00

SORTS TO ORDER, 30 CENTS PER POUND.

This is preferred by many practical printers on account of its simplicity of combination, and, being cross-braced every four picas, it is ALMOST EQUAL TO SOLID METAL in strength and durability. The pieces are *2, 3* and *4* ems pica in width, and *4, 8, 12, 16* and *20* ems pica in length. This is also finished to the same uniform standard, and is unequaled for accuracy.

STEREOTYPING OUTFIT.

The following Outfit for Stereotyping will be found very useful for small as well as large Printing Offices. It is one of the cheapest as well as most desirable Outfits made. It is of the best material and workmanship.



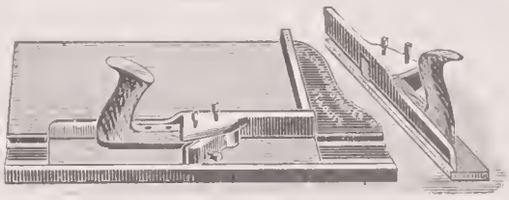
CASTING BOX.

This cut illustrates the most popular size of our casting boxes. The bed measures 13×18 inches, and it can be used both for casting type-high and thin plates, also, by the addition of a heating apparatus, as a matrix-drying press.

Price, including Brass Bearers for Thin Plates.....$12.00
Type-high Steel L Bars or Cast Iron Parallel Bars..... 15.00
Matrix-drying Attachment for Gasoline..... 3.00
Matrix-drying Attachment for Gas.... 3.50

STEREOTYPING BRUSH.

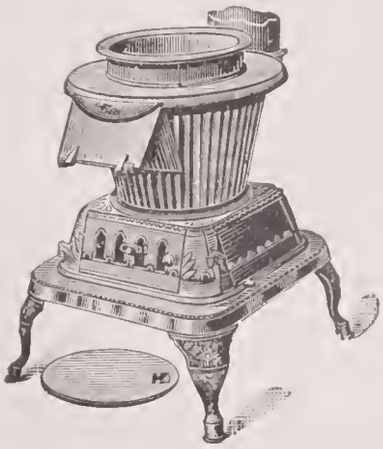
"B," the Standard Newspaper Stereotyper's Brush, made of best gray Okatka bristles closely set, and projecting 1¾ inches; face of brush, 3½×8½ inches.
Price.....$7.00



SHOOT BOARD.

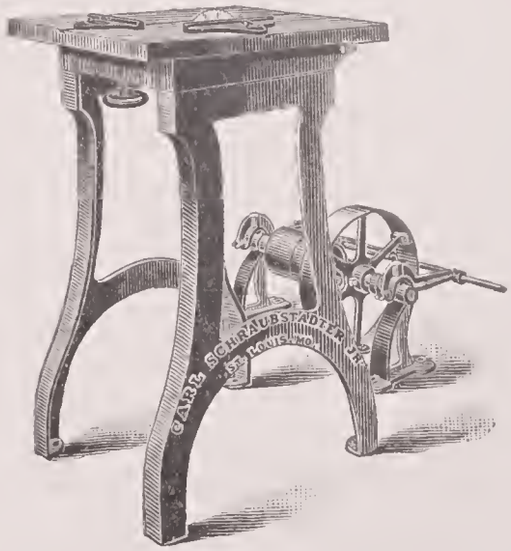
This shoot board is made entirely of iron and steel. It measures 13½×21½ inches, the bed for stereotype being 11×16½ inches. The planes are of iron, with steel blades and pins and wooden handles.

Price, with one plane.....$16.00
Extra beveling plane for patent blocks... 1.00



FURNACE.

This furnace is adapted to the needs of job offices doing a limited amount of work. The pot furnished will contain and heat about one hundred pounds of metal.
Price, including ladle.....$10.00



SAW.

This saw is built entirely of iron and steel. The table measures 20×24 inches, and is furnished with front and back gauges, as also counter shaft.

Price, including brass or metal saw.....$70.00
With Vernier gauge for sawing labor-saving brass rule..... 82.00
